INSTITUTO MAIMÓNIDES DE INVESTIGACIÓN BIOMÉDICA DE CÓRDOBA

SESSION II
Nutrition, Endocrine and metabolic diseases

11:15-12:00: Carmen María Haro Mariscal. The gut microbial community in metabolic synbiosis.

12:00-12:15: Rafael Ríos Varo. Bone marrow mesenchymal stem cells are more proangiogenic in insulin-resistant individuals.

12:15-12:30: Gustavo Díez López. Role of monocytes subsets in the atherothrombosis.

12:30-13:00: Natalia Sánchez de Moya. Novel cannabidiol derivatives are dual PPAR activators.

13:00-14:00: Gema Martínez-Rubio. Zinc phosphates improve smooth muscle cells calcification.

14:00-15:00: Santiago Valenzuela. Role of VRE-003.2 is a novel cannabigerol derivative that promotes sexual differentiation in zebrafish.

15:00-16:00: Esperanza Mª Romero Rodríguez. Identification of new substrates for DYRK2 and its implication in carcinogenesis: Cdc25A regulation.
