The background of the entire page is a vibrant, abstract organic pattern. It features large, irregular, glowing red and orange shapes that resemble cells or liquid droplets. These are set against a dark, almost black, background. Within these larger shapes, there are numerous smaller, dark, circular or oval structures, possibly representing organelles or nuclei. In the bottom left corner, there is a distinct, flowing shape composed of blue, green, and red colors, which appears to be a stylized representation of a cell membrane or a specific type of cellular structure.

Scientific Director

**María del Mar Malagón Poyato**  
Deputy Scientific Director

# DIRECTOR'S FOREWORD TO THE SCIENTIFIC REPORT 2023

This report provides a summary of IMIBIC's activity during 2023, in which the Scientific Management Team was renewed and the Development Agreement with IMIBIC patrons was also extended (until January 2026). This year we have addressed the objectives set forth in IMIBIC Strategic Plan 2021-2025 and also tackled new challenges to develop in the near future. All this work is aimed at placing our Institute as an international benchmark, on par with the large research institutions leading this field, the most pioneering branch of science. Together with the External Scientific Committee, we have carried out the scientific evaluation of our groups with a final balance that shows the good health that IMIBIC enjoys. This has also helped us to propose future strategies for further growth.

As an outstanding achievement, we would like to highlight the obtention, for the first time for an IMIBIC researcher, of an European Research Council (ERC) Advanced grant, that was awarded to Prof. Tena Sempere. This represents a milestone in the institute's story that sets a before and after in the capabilities of IMIBIC researchers and serves as a good example for the rest of our scientific community. In addition to this, the IMIBIC is leading several European projects, including the eprObes or the e2 -ducass within the European Partnership model (ERA4Health). At the national level, we would like to highlight the 40% growth in the funds granted by the ISCIII, as well as the granting of an independent clinical trials project, a Personalized Medicine project and 2 Public-Private projects from the MICINN, which also awarded the vast majority of grants requested from IMIBIC PIs.

During 2023, we intensified our innovation activity. The Scientific Management team fully supports this commitment, since we consider that innovation is a critical feature for a biomedical research institute. The growing activity of the Innovation Unit, as well as of all the rest of IMIBIC's technology units, some of which have been also strengthened with the latest equipments, guarantees IMIBIC's position at the forefront of translational research. In this context, we would like to highlight the development of the First Biotechnology Hackathon, a pleasant experience developed in collaboration with the Engineering School of the University of Cordoba that has served to bring innovation in biomedicine closer to the youngest engineers. This year a major investment has been made to upgrade our biosafety level 2 facility to BSL-3, which will offer new possibilities on diagnostic work and research on pathogens.

Armed with these facts, our next objective for the coming year is to promote IMIBIC growth, based on the principles of excellence and translation to the healthcare environment. This includes our commitment to the promotion of young researchers, aiming to foster talent and creativity so that the Institute continues to evolve and attract researchers of excellence. This will help consolidate IMIBIC as an international reference centre. In addition, we will continue to focus our attention on attracting international funds, prioritizing European and NIH projects, and encouraging innovation and transfer as tools to reduce the gap between research and transfer both to clinical practice and to companies in the health sector. There are many steps and goals yet to be fulfilled, there are many challenges and difficulties to be overcome, but the spirit of the IMIBIC has humbly shown the path to promote the interaction between basic and clinical research, to combine competitiveness with cooperation, to support profound changes while maintaining coherent and solid project goals, and to attain excellence and quality in research.

Finally, in order to become more aligned with the new requirements of the Carlos III Health Institute, we are working on aspects related to the 6 principles of Responsible Research and Innovation: ethics, gender equality, responsible governance, open access, science education and public engagement. In this line, to highlight just one action among many, the organization of the First IMIBIC Race for Research, uniting in its route all the hospitals, both public and private, in the city of Cordoba.

Over the next pages, you will have the opportunity to see the results of this continued growth and the consolidation of our efforts to progress in the field of biomedical research, but most of all, you will witness the robust willingness to continue rising altogether in this common and enduring pathway.

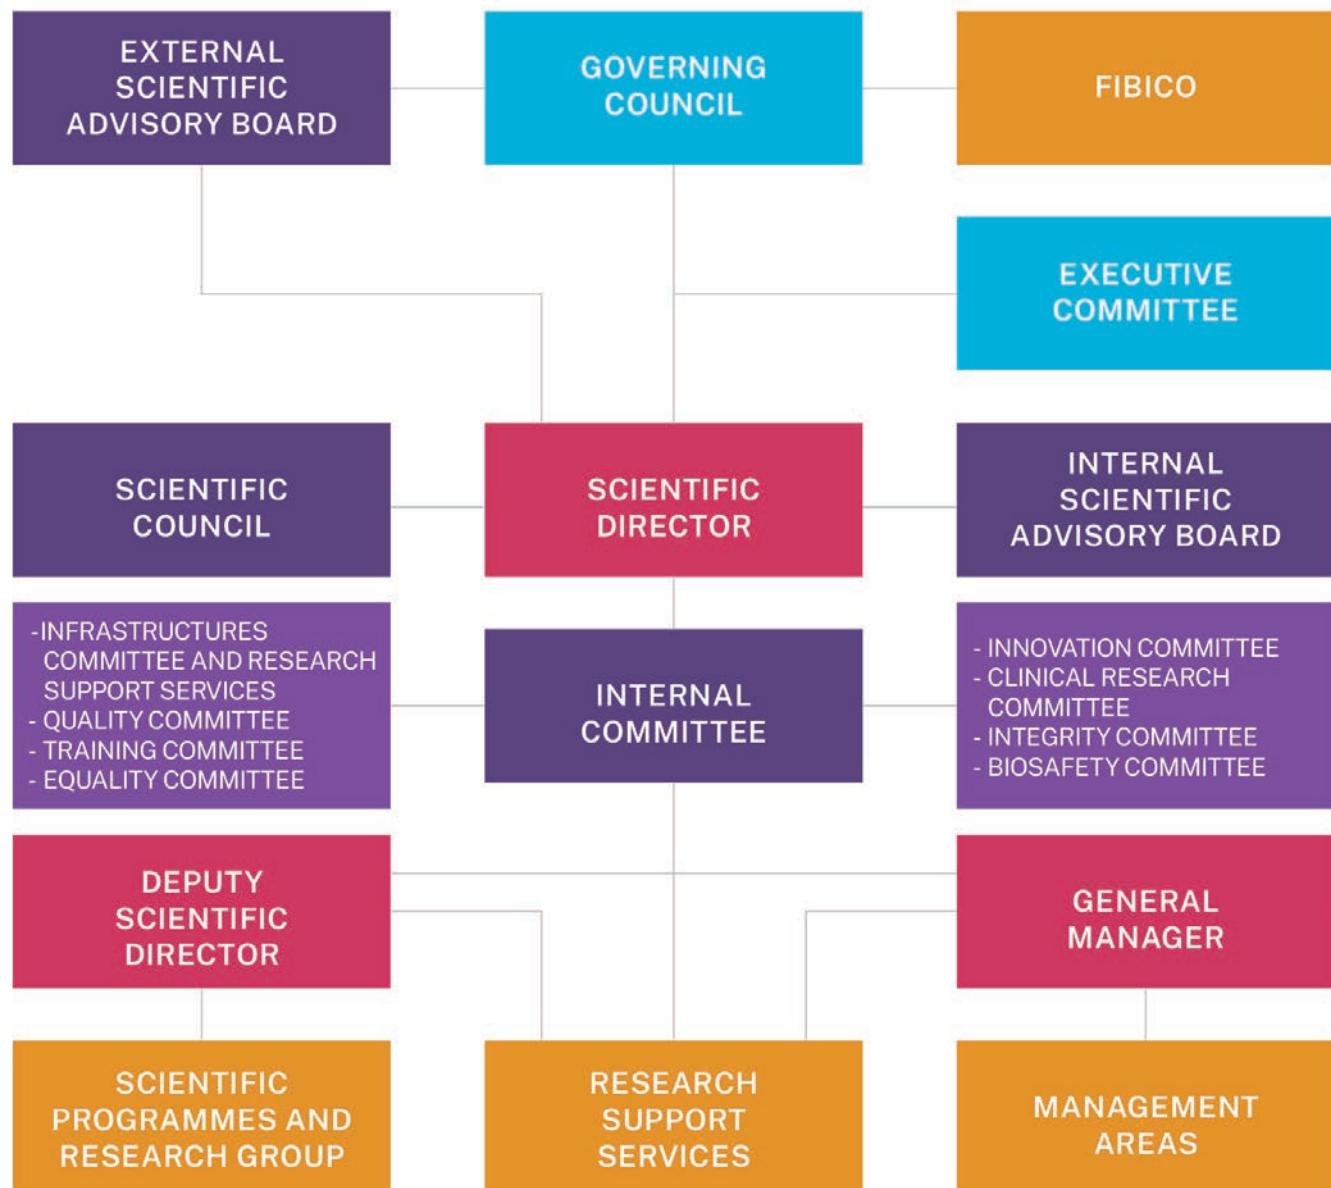

**GOVERNANCE  
AND STRUCTURE**

**2**

## 2.1 ORGANIZATION CHART

The governing and representative bodies of IMIBIC are set out below:

## A. 1. COLLEGiate BODIES

The collegiate bodies that make up the IMIBIC are the Governing Council, the Executive Committee, the External Scientific Advisory Board, the Internal Scientific Advisory Board and the Scientific Council. Each body is composed of a number of specialists and has its own competencies.

### » GOVERNING COUNCIL

The Governing Council is the main governing body of IMIBIC. The Governing Council is composed of the following members:

- Two representatives from the Regional Ministry of Health and Consumer Affairs of the Regional Government of Andalusia  
**Mr. Isaac Túnez Fiñana**  
Secretary General of Public Health and R&D+i in Health of the Regional Ministry of Health and Consumer Affairs
- Two representatives from the Regional Ministry of University Research and Innovation  
**Mr. Librado Carrasco Otero (until 19 july)**  
**Ms. M<sup>a</sup> del Mar Cerbán Jiménez (since 1 dicember)**  
Director General of Research Planning
- Two representatives from the University of Córdoba  
**Ms. M<sup>a</sup> José Polo Gómez**  
Vice-Rector for Science Policy  
**Ms. Lourdes Arce Jiménez**  
Vice-Rector for Innovation and Transfer
- One representative from the Andalusian Public Foundation for Progress and Health (FPS)  
**Mr. Gonzalo Balbontín Casillas**  
Managing Director
- Scientific Director, IMIBIC  
**Mr. Pablo Pérez Martínez**
- General Manager, IMIBIC  
**Mr. Álvaro Granados del Río**

### » EXECUTIVE COMMITTEE

On July 27, 2015, the Governing Council adopted the agreement to create an Executive Committee to facilitate efficient decision-making. The Executive Committee is made up of one member from each of the institutions that constitute the Governing Council, as set out in the collaboration agreement between the Regional Ministry of Health and Families, the Regional Ministry of Economic Transformation, Knowledge, Industry and Universities, and the University of Córdoba. The Scientific Director and General Manager participate in an advisory capacity, but without voting rights.

- One representative from the Regional Ministry of Health and Consumer Affairs of the Regional Government of Andalusia  
**Ms. Valle García Sánchez**  
Managing Director of the Reina Sofia University Hospital and President of FIBICO
- One representative from the Regional Ministry of University Research and Innovation  
**Mr. D. José Francisco Viso Sánchez**  
Territorial Delegate for Educational Development and University Research and Innovation
- One representative from the University of Córdoba  
**Mr. Rafael Solana Lara**  
Vice-Rector for Health and Welfare of the University Community
- One representative from the Andalusian Public Foundation for Progress and Health (FPS)  
**Mr. Gonzalo Balbontín Casillas**  
Managing Director
- Scientific Director, IMIBIC  
**Mr. Pablo Pérez Martínez**
- General Manager, IMIBIC  
**Mr. Álvaro Granados del Río**

## » EXTERNAL SCIENTIFIC ADVISORY BOARD

The External Scientific Advisory Board is appointed by the Governing Board and its mission is to assist the Governing Council, the Scientific Council and the Scientific Director in the performance of their duties. It acts as an advisory body to the Scientific Management, although its opinions and recommendations are not legally binding. It was created on July 9, 2009, under the name of the External Advisory Board, and ratified by the Governing Council on December 21, 2009. The External Scientific Advisory Board is made up of a minimum of three and a maximum of ten highly qualified professionals with recognized experience in their field of research. Members of the External Scientific Advisory Board must carry out their professional activity outside the Autonomous Community of Andalusia, and at least one of them must not be resident in Spain. Members must be able to individually demonstrate that they have no conflicts of interest. The members of the board are:

- **Ms. Lina Badimón Maestro**

Director of the Cardiovascular Research Center (CSIC-ICCC) at the Hospital de la Santa Creu i Sant Pau, Autonomous University of Barcelona (UAB), Institute for Biomedical Research (IIB-SPau), (Barcelona). President of the CCE

- **Mr. Carlos Diéguez González**

Scientific Director of CIBER Obesity and Nutrition (ISCIII) and Director of the Centre for Research in Molecular Medicine, University of Santiago (CIMUS). (Santiago de Compostela)

- **Mr. José María Ordovás Muñoz**

Senior Scientist, Director of the Nutrition and Genomics Laboratory and Chairman of the Functional Genomics Core Facility of the Jean Mayer USDA Human Nutrition Research Center on Aging, Tufts University (Boston, USA). Scientific Director of the Madrid Institute for Advanced Studies (IMDEA) (Madrid)

- **Mr. Francisco Sánchez Madrid**

Professor of Immunology at the Autonomous University of Madrid and Scientific Director of the Health Research Institute of the Hospital de La Princesa (Madrid)

- **Mr. Pura Muñoz Cánores**

ICREA Research Professor and Professor of Cell Biology of the Department of Experimental and Health Sciences, University Pompeu Fabra. Leader of the Tissue Regeneration group at the National Centre for Cardiovascular Research (CNIC) in Madrid

## » INTERNAL SCIENTIFIC ADVISORY BOARD

The Internal Scientific Advisory Board is an advisory body to the Scientific Director. It is composed of the Scientific Director and Researchers (including researchers in training) and represents all priority scientific areas of the Institute. The Internal Scientific Advisory Board consists of the following members (a maximum of 18). It includes those responsible for Quality, Innovation and Training. It was established on November 25, 2019 (and was previously known as the Permanent Committee of the Scientific Council). The members of the board are as follows:

• <b>Mr. Pablo Pérez Martínez</b>	Scientific Director
• <b>Mr. Álvaro Granados del Río</b>	General Manager
• <b>Ms . Mª del Mar Malagón Poyato</b>	Deputy Scientific Director
• <b>Mr. Juan de la Haba Rodríguez</b>	Coordinator of Clinical Research
• <b>Mr. Fernando Sarramea Crespo</b>	Coordinator of Active Ageing and Frailty Program
• <b>Mr. Manuel Tena Sempere</b>	Coordinator of the Nutrition, Endocrine and Metabolic Diseases Program
• <b>Mr. Antonio Rivero Román</b>	Coordinator of the Infectious & Immunological Diseases and Organ Transplantation Program
• <b>Mr. Marco A. Calzado Canale</b>	Coordinator of the Cancer (Oncology and Oncohematology) Program
• <b>Ms. Marina Álvarez Benito</b>	Coordinator of the Chronic and Inflammatory Diseases Program
• <b>Mr. Raúl Luque Huertas</b>	Designated representative of the Training Committee
• <b>Mr. Eduardo Muñoz Blanco</b>	Designated representative of the Innovation Committee
• <b>Mr. Miguel González Andrades</b>	Emerging Researcher (until 20 november)
• <b>Ms. Ana Gordon Bermúdez-Coronel</b>	Emerging Researcher (since 20 november)
• <b>Ms. Elena Yubero Serrano</b>	Emerging Researcher (until 20 november)
• <b>Mr. Álvaro Arjona Sánchez</b>	Emerging Researcher (since 20 november)
• <b>Ms. Nuria Barbarroja Puerto</b>	Emerging Researcher
• <b>Ms. Laura Martín Piedra</b>	Predoctoral Researcher (until 20 november)
• <b>Ms. Ana Mantrana Soldado</b>	Predoctoral Researcher

## » SCIENTIFIC COUNCIL

The Scientific Council acts as an advisory body to the Scientific Director. It is composed of the Scientific Director, the Deputy Scientific Director, Principal Investigators (PI), Emerging Researchers (ER), one representative from the Reina Sofia University Hospital (RSUH) Board of Directors, one representative from Research Support Services, one representative of the management staff and the General Manager of the IMIBIC. It was established on July 9, 2009.

## B. INDIVIDUAL MEMBERS

The Management Team is responsible for ensuring the effectiveness of performance in order to increase the quality and impact of IMIBIC's research activity.

- SCIENTIFIC DIRECTOR

**Dr. Pablo Pérez Martínez**

Full Professor of Medicine at the University of Córdoba and specialist in Internal Medicine, Reina Sofia University Hospital, Córdoba.

- DEPUTY SCIENTIFIC DIRECTOR

**Dr. María del Mar Malagón Poyato**

Full Professor of Cell Biology at the University of Córdoba and Principal Investigator of the GC11 research group.

- CLINICAL RESEARCH PROGRAM COORDINATOR

**Dr. Juan de la Haba Rodríguez**

Specialist in Medical Oncology, Reina Sofia University Hospital, and Associate Professor at the University of Córdoba.

- GENERAL MANAGER

**Mr. Álvaro Granados del Río**

BSc in Business Administration and Management. Advanced Program for Management of Health.

## C. 1. INTERNAL COMMITTEES

### » QUALITY COMMITTEE

This Committee ensures the maintenance of quality and ethical codes in all research activities and among researchers, in accordance with Quality Plan guidelines.

• <b>Dr. Mª del Mar Malagón Poyato</b>	Deputy Scientific Director
• <b>Ms. Marisa Escabias Parejo</b>	Quality Specialist
• <b>Dr. Sandra Mª Gil Hernández</b>	Head of Quality and Clinical Documentation, RSUH (since 28.11.2023)
• <b>Dr. Mª Antonia Álvarez de Lara Sánchez</b>	Head of Quality and Clinical Documentation, RSUH (until 06.06.2023)
• <b>Dr. José Manuel Aranda Lara</b>	Technical Advisor to the Territorial
• <b>Dr. Mª Teresa Roldán Arjona</b>	Delegate of the Andalusian Regional Ministry of Health and Families
• <b>Dr. Luís Martínez Martínez</b>	Principal Investigator GC22
• <b>Dr. Rafael Solana Lara</b>	Principal Investigator GC24
• <b>Dr. Juan Ruano Ruiz</b>	Principal Investigator GC01
• <b>Dr. Fernando López López</b>	Principal Investigator GC29
	Biobank Technician (since 28.11.2023)

### » TRAINING COMMITTEE

This committee is responsible for carrying out the Training Plan, in particular, the Master's and Doctoral Programmes in Biomedical Research.

• <b>Dr. Juan Manuel Castellano Rodríguez</b>	Postdoctoral Researcher GC10
• <b>Mr. David Luna Gómez</b>	Training Technician
• <b>Ms. Inmaculada Varo Urbano</b>	Training Officer
• <b>Mr. Álvaro Granados del Río</b>	General Manager
• <b>Dr. Raúl Luque Huertas</b>	Principal Investigator GC27
• <b>Dr. Antonio Pablo Arenas de Larriva</b>	Predoctoral Researcher GC09
• <b>Dr. Elisa Roldán Romero</b>	Director of Studies, RSUH
• <b>Dr. Joaquín Toro Santiago</b>	Head of Integrated Training Unit, RSUH
• <b>Dr. Nuria Barbarroja Puerto</b>	Emerging Researcher GC05
• <b>Dr. Juan Solivera Vela</b>	Head of Neurosurgery Service, RSUH
• <b>Dr. Sebastián Ventura Soto</b>	Principal Investigator GC25
• <b>Ms. Alejandra Méndez Natera</b>	Predoctoral Researcher GC03
• <b>Dr. Alejandro Ibáñez Costa</b>	Postdoctoral Researcher GC08
• <b>Ms. Gema García Jurado</b>	Technical Specialist in Cytometry and Microscopy
• <b>Dr. Antonio García Ríos</b>	Emerging Researcher
• <b>Dr. Rafael Pineda Reyes</b>	Postdoctoral Researcher GC10
• <b>Ms. Isabel de Castro Burón</b>	Communications Officer
• <b>Mr. Rafael Blanco Moreno</b>	Teacher of Biology, Ategua Secondary School, Castro del Río
• <b>Mr. José Carlos Prieto Baena</b>	International Project Manager
• <b>Mr. Juan Luis Parras Pezard</b>	Hospital Pharmacy Data Manager
• <b>Mr. Julio Manuel Martínez Moreno</b>	Postdoctoral Researcher GC13
• <b>Dr. Esperanza Mª Romero Rodríguez</b>	IP GE10 Investigación Clínico-Epidemiológica en Atención primaria

## » EQUALITY NEGOTIATING COMMITTEE

This committee is responsible for the Equality Plan and promotes equal opportunities and equality of treatment between women and men in accordance with the principles of corporate social responsibility and in compliance with current legislation.

• <b>Dr. M<sup>a</sup> del Mar Malagón Poyato</b>	Deputy Scientific Director
• <b>Mr. David Luna Gómez</b>	Quality Technician and Secretary of Equality Negotiating Committee
• <b>Ms. Miriam Cruzado Caballero</b>	Head of the Research Management Unit
• <b>Mr. Francisco Javier López Ruiz</b>	Head of Economic and Resource Management
• <b>Mr. Florencio Muñoz Encinas</b>	Technician: Economic and Resource Management
• <b>Mss. Silvia Miranda Castellano</b>	Technician: Economic and Resource Management
• <b>Ms. Marisa Escabias Parejo</b>	Quality Specialist and Staff Representative
• <b>Ms. Estefanía Azcona Corrales</b>	Management Control Technician and Staff Representative
• <b>Dr. Julio Manuel Martínez Moreno</b>	Post-doctoral Researcher GC13 and Staff Representative
• <b>Mr. Daniel José Campón Montilla</b>	Laboratory Technician and Staff Representative
• <b>Dr. Antonio Romero Ruiz</b>	Emerging Researcher GE09 and External Advisor to MIBIC
• <b>Dr. Alejandra Pera Rojas</b>	Emerging Researcher GC01 and External Advisor to MIBIC
• <b>Ms. Higinia Romero Crespo</b>	External Advisor.

## » INFRASTRUCTURES AND RESEARCH SUPPORT SERVICES COMMITTEE

This Committee is responsible for supervising existing IMIBIC infrastructures and implementing the Infrastructure Plan.

• <b>Dr. M<sup>a</sup> del Mar Malagón Poyato</b>	Deputy Scientific Director
• <b>Mr. Francisco Javier López Ruiz</b>	Head of Financial and Human Resources Management
• <b>Mr. Álvaro Granados del Río</b>	General Manager
• <b>Dr. Eduardo Chicano Gálvez</b>	Senior Technical Specialist, Research Support Service: Mass Spectrometry and Molecular Imaging Unit
• <b>Dr. Esther Peralbo Santaella</b>	Senior Technical Specialist, Research Support Services: Cytometry and Microscopy
• <b>Ms. Anabel Pozo Salas</b>	Technician, Research Support Services: Animal Experimentation
• <b>Dr. Antonio Rodríguez Ariza</b>	Co-Principal Investigator GC06
• <b>Dr. Rosario López Pedrera</b>	Principal Investigator GC05
• <b>Dr. Victoria Guiote Moreno</b>	Predoctoral Researcher GA10
• <b>Dr. Sara Cantisán Bohórquez</b>	Researcher GC03
• <b>Dr. Juan A. Moreno Gutiérrez</b>	Principal Investigator GE06
• <b>Dr. Juan Roa Rivas</b>	Researcher CG10
• <b>Dr. Feliciano Priego Capote</b>	Principal Investigator GC21
• <b>Dr. Esther Rivero Cortés</b>	Senior Technical Specialist for General Procedures

## » CLINICAL RESEARCH COMMITTEE

The Clinical Research Committee implements the IMIBIC Clinical Research Plan.

• <b>Dr. Juan de la Haba Rodríguez</b>	Coordinator of Clinical Research
• <b>Dr. José Carlos Garrido Gracia</b>	Head of Clinical Research Unit- Management Area, and Secretary of the Committee
• <b>Dr. Samuel Hidalgo Ríos</b>	Head of Clinical Research Unit- Assistance Area
• <b>Mr. Álvaro Granados del Río</b>	General Manager
• <b>Dr. Julián de la Torre Cisneros</b>	Principal Investigator GC03
• <b>Dr. Concepción Herrera Arroyo</b>	Principal Investigator GC14
• <b>Dr. Clementina López Medina</b>	Researcher GC05
• <b>Dr. Juan Ruano Ruiz</b>	Principal Investigator GC29
• <b>Dr. Álvaro Arjona Sánchez</b>	Principal Investigator GE09
• <b>Dr. Enrique Gómez Gómez</b>	Researcher GE05
• <b>Dr. Juan Carlos Castillo Domínguez</b>	Researcher GC15
• <b>Dr. Eduardo Agüera Morales</b>	Emerging Researcher GC28
• <b>Dr. M<sup>a</sup> José Méndez Vidal</b>	Clinical Researcher GC06
• <b>Dr. Daniel López Ruiz</b>	Researcher GA08
• <b>Dr. M<sup>a</sup> Dolores Mesa Rubio</b>	Researcher GC15
• <b>Dr. Esperanza Romero Rodriguez</b>	Researcher GC12
• <b>Dr. Javier Torres Borrego</b>	Coordinator of Pediatric Allergy & Pulmonology Unit
• <b>Mr. Ángel Cañadilla Moyano</b>	External Member

## » INNOVATION COMMITTEE

The Clinical Research Committee is responsible for carrying out the IMIBIC Innovation Plan.

• <b>Dr. Pablo Pérez Martínez</b>	Scientific Director
• <b>Dr. Luis Fernández Formoso</b>	Project Manager
• <b>Dr. Mª del Mar Malagón Poyato</b>	Deputy Scientific Director
• <b>Mr. Álvaro Granados del Río</b>	General Manager
• <b>Dr. Marina Álvarez Benito</b>	Principal Investigator GA08
• <b>Dr. Eduardo Muñoz Blanco</b>	Principal Investigator GC04
• <b>Dr. Francisco Javier Delgado Lista</b>	Co-Principal Investigator GC09
• <b>Dr. Rafaela Ortega Castro</b>	Postdoctoral Researcher GC05
• <b>Dr. Juan Rafael Muñoz Castañeda</b>	Emerging Researcher GC13
• <b>Dr. Juan Solivera Vela</b>	Head of Neurosurgery Service RSUH
• <b>Dr. Manuel David Gahete Ortíz</b>	Principal Investigator GC30
• <b>Dr. Miguel González Andrades</b>	Principal Investigator GE07
• <b>Dr. Antonio Rivero Juárez</b>	Emerging Researcher GC26
• <b>Dra. Beatriz Isla Tejera</b>	Facultative Specialist of Area-Hospital Pharmacy
• <b>Mr. David Requena Polonio</b>	Technical Specialist, Innovation
• <b>Mr. Francisco Jiménez San Martín</b>	External Member

## » SCIENTIFIC PROGRAMS

All IMIBIC research groups must be integrated into the scientific programs belonging to the main thematic areas of IMIBIC research being carried out at any given time:

- **ACTIVE AGEING AND FRAILTY** Dr. Fernando Sarramea Crespo

Dr. Rafael Solana Lara

- **NUTRITION, ENDOCRINE AND METABOLIC DISEASES**

Dr. Manuel Tena Sempere  
Dr. Elena Yubero Serrano

- **INFECTIOUS AND IMMUNOLOGICAL DISEASES AND ORGAN TRANSPLANTATION**

Dr. Antonio Rivero Román  
Dr. Sara Cantisán Bohórquez

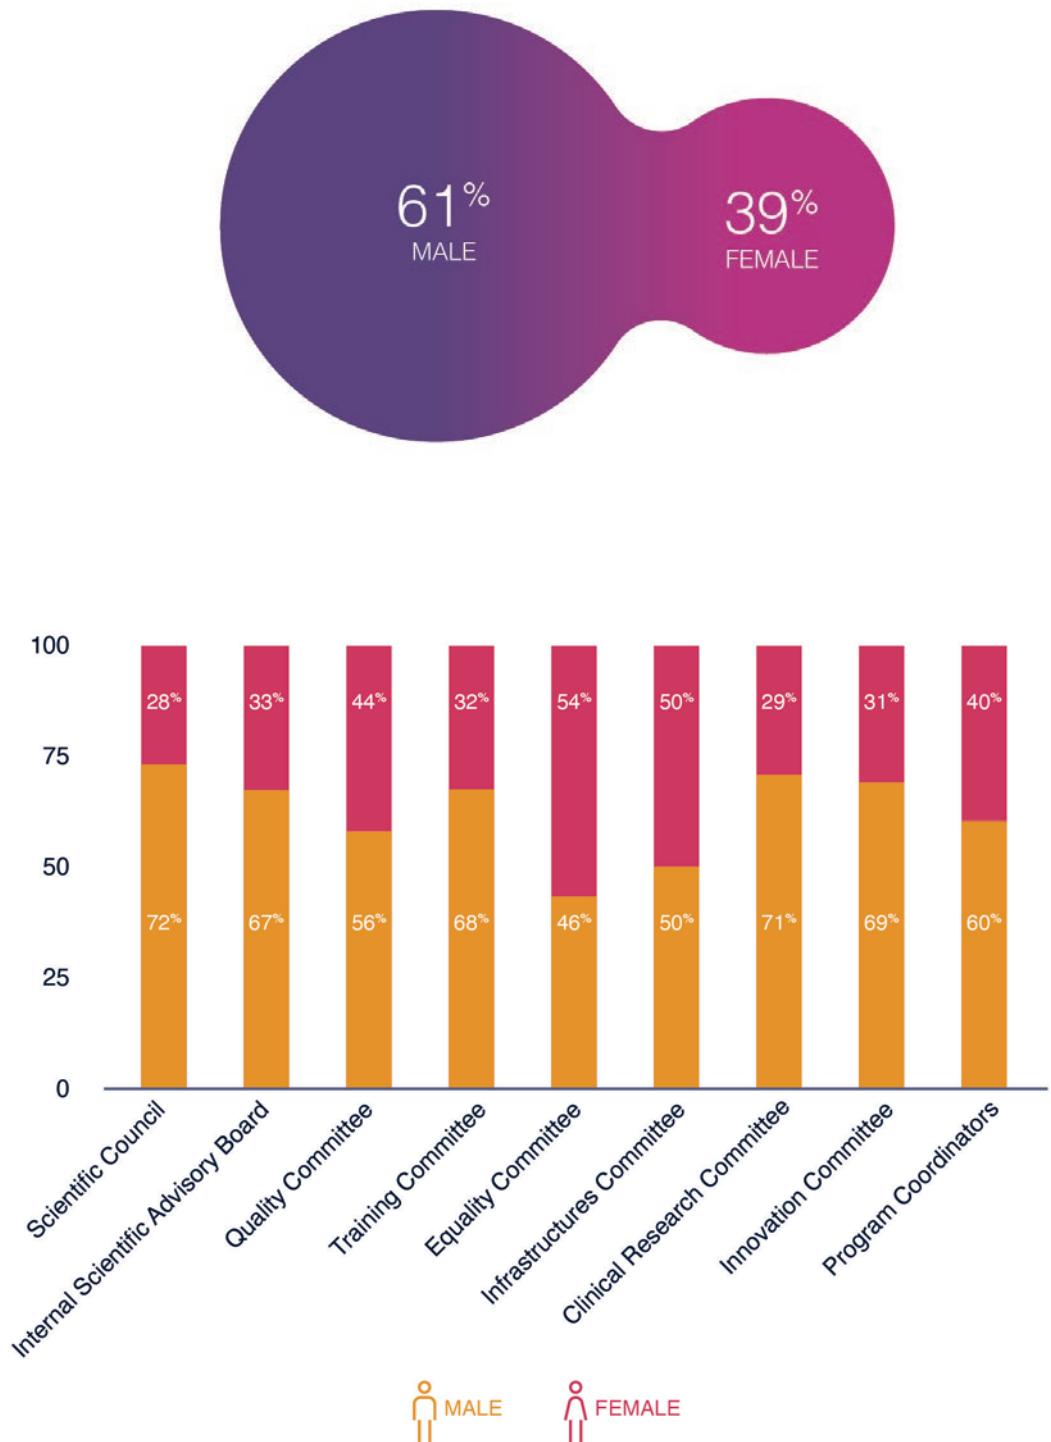

- **CANCER (ONCOLOGY AND ONCOHEMATOLOGY)**

Dr. Juan de la Haba Rodríguez  
Dr. Marco A. Calzado Canale

- **CHRONIC AND INFLAMMATORY DISEASES**

Dr. Rosario López Pedrera  
Dr. Marina Álvarez Benito

## » INTERNAL COMMITTEE MEMBERS BY GENDER

## 2.2 SCIENTIFIC STRUCTURE

IMIBIC research activities are organized into five scientific programs, each comprising different research groups. The scientific programs target health problems that are both important and widespread, identifying areas in which the Institute's researchers can combine their efforts in cross-cutting collaborative projects that address and respond to the most crucial health challenges facing European society today, in line with the priorities set out in the European Union's Horizon 2020 program.

Each program is structured to support translational and clinical research that will guide researchers towards the primary goal of improving patient and community health. The programs are designed to foster interaction and cooperation between different groups, to attract new talent and to continually improve the career development opportunities of young researchers. Each of our scientific programs reflects the strengths of our research teams and showcases the areas of expertise of IMIBIC.

The programs are as follows:

### » ACTIVE AGEING AND FRAILTY

This program is oriented towards understanding the molecular pathogenic basis of the ageing process in relation to quality of life and to pursuing new strategies in patient care. It includes the following lines of research:

- Immunology and senescence
- Care of the chronically ill
- Frailty and quality of life of the elderly

### » NUTRITION, ENDOCRINE AND METABOLIC DISEASES

This program is oriented towards studying metabolic disorders and the endocrine system, in particular the role of nutrition in the prevention and management of these processes at different stages of life. It also focuses on studies of reproductive health and neuroendocrine tumours. It includes the following lines of research:

- Metabolic syndrome
- Reproductive health
- Paediatric and perinatal diseases
- Neuroendocrine tumours

### » INFECTIOUS AND IMMUNOLOGICAL DISEASES AND ORGAN TRANSPLANTATION

This program focuses on the study of diseases caused by different infectious agents, with a special emphasis on infections in immunocompromised patients. It includes the following lines of research:

- HIV + Hepatitis C virus
- Transplants
- Multidrug resistance

### » CANCER (ONCOLOGY AND ONCOHEMATOLOGY)

This program focuses on the study of neoplastic diseases, including both solid tumours and haematological neoplasms. It includes the following lines of research:

- Lung cancer
- Breast cancer
- Hepatocellular carcinoma
- Leukaemia and lymphomas
- Digestive tumours
- Other tumours

### » CHRONIC AND INFLAMMATORY DISEASES

This program focuses on the study of a number of chronic diseases of modern society, emphasising those of an inflammatory nature. The program includes both basic research and clinical studies. Its ultimate aim is to promote a better understanding of the basis of chronic/inflammatory diseases and to improve therapies. It includes the following lines of research:

- Cardiovascular diseases
- Musculoskeletal and connective tissue diseases
- Neurological diseases and mental health
- Kidney and urological diseases
- Liver and digestive diseases
- Chronic inflammation and signalling

## » RESEARCH GROUPS

GC- CONSOLIDATED GROUP • GE - EMERGING GROUP • GA - ASSOCIATED GROUP

\*Note: The program to which each group is attached is highlighted in bold.

CODE	IMIBIC GROUPS and PROGRAMS	PROGRAMS	PRINCIPAL INVESTIGATOR(s)
GC01	Immunology and Allergy	1, 3, 4, 5	Rafael Solana Lara
GC02	Oxidative and Nitrosative Stress in Acute and Chronic Liver Disease	3, 4, 5	Manuel de la Mata García
GC03	Infectious Diseases	3	Julián de la Torre Cisneros
GC04	Inflammation and Cancer	2, 4, 5	Eduardo Muñoz Blanco Marco Antonio Calzado Canalé
GC05	Systemic and Chronic Inflammatory Autoimmune Diseases of the Musculoskeletal System and Connective Tissue	5	Rosario López Pedrera Eduardo Collantes Estévez Alejandro Escudero Contreras Enrique Aranda Aguilar
GC06	New Therapies in Cancer	4	Antonio Rodríguez Ariza Juan Rafael de la Haba Rodríguez
GC07	Nephrology. Cell Damage in Chronic Inflammation	1, 3, 5	Alejandro Martín Malo
GC08	Hormones and Cancer	2, 4, 5	Justo P. Castaño Fuentes José López Miranda Francisco Pérez Jiménez
GC09	Nutrigenomics. Metabolic Syndrome	1, 2, 5	Javier Delgado Lista Pablo Pérez Martínez Elena Yubero Serrano
GC10	Hormonal Regulation of Energy Balance, Puberty and Reproduction	2	Manuel Tena Sempere
GC11	Adipocyte Differentiation and Metabolism: Metabolic Syndrome	2	María del Mar Malagón Poyato
GC12	Clinical and Epidemiological Research in Primary Care (GICEAP)	1, 3, 4, 5	Esperanza Mª Romero Rodríguez
GE10			Mariano Rodríguez Portillo

**GOALS &  
HIGHLIGHTS IN  
2023**

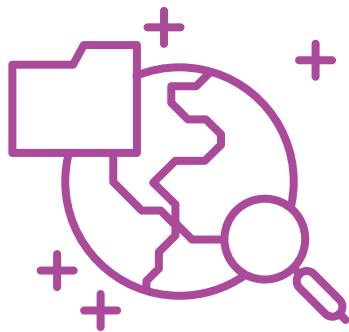

**3**

## 3.1 GOALS FOR 2023

The institutional objectives marked for the year 2023 and approved by the Institute's Governing Council are outlined below.

GENERAL GOALS	RESULTS IN 2023
Encourage and support research groups in applications for projects and calls for Human Resources, Networks and International Funding Projects, proposing different institutional support measures.	100 % COMPLETED
Encourage generational change and the search for young talent in the different areas of Primary Care.	100 % COMPLETED
To take advantage of the capabilities of the Technological Innovation Unit and the Bioincubator, as elements that favor the creation of an ecosystem for the generation of ideas, business development and industrialization of our environment.	100 % COMPLETED
To ensure compliance with the objectives related to the incorporation of people under the Investigo Program, with a view to promoting their training and the development of new research careers.	100 % COMPLETED

## 3.2 HIGHLIGHTS

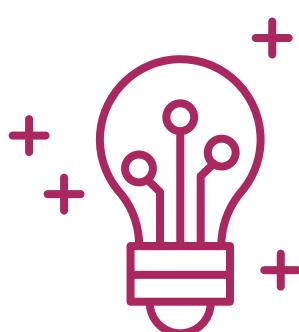

### INTERNATIONAL

IMIBIC's first European Research Council (ERC) and success in other calls for proposals (HE, ERA4Health, etc.)

### FUNDING

More than 20 million euros

### INNOVATION

First Hackathon and Reform of Technological Innovation Unit

### HUMAN RESOURCES

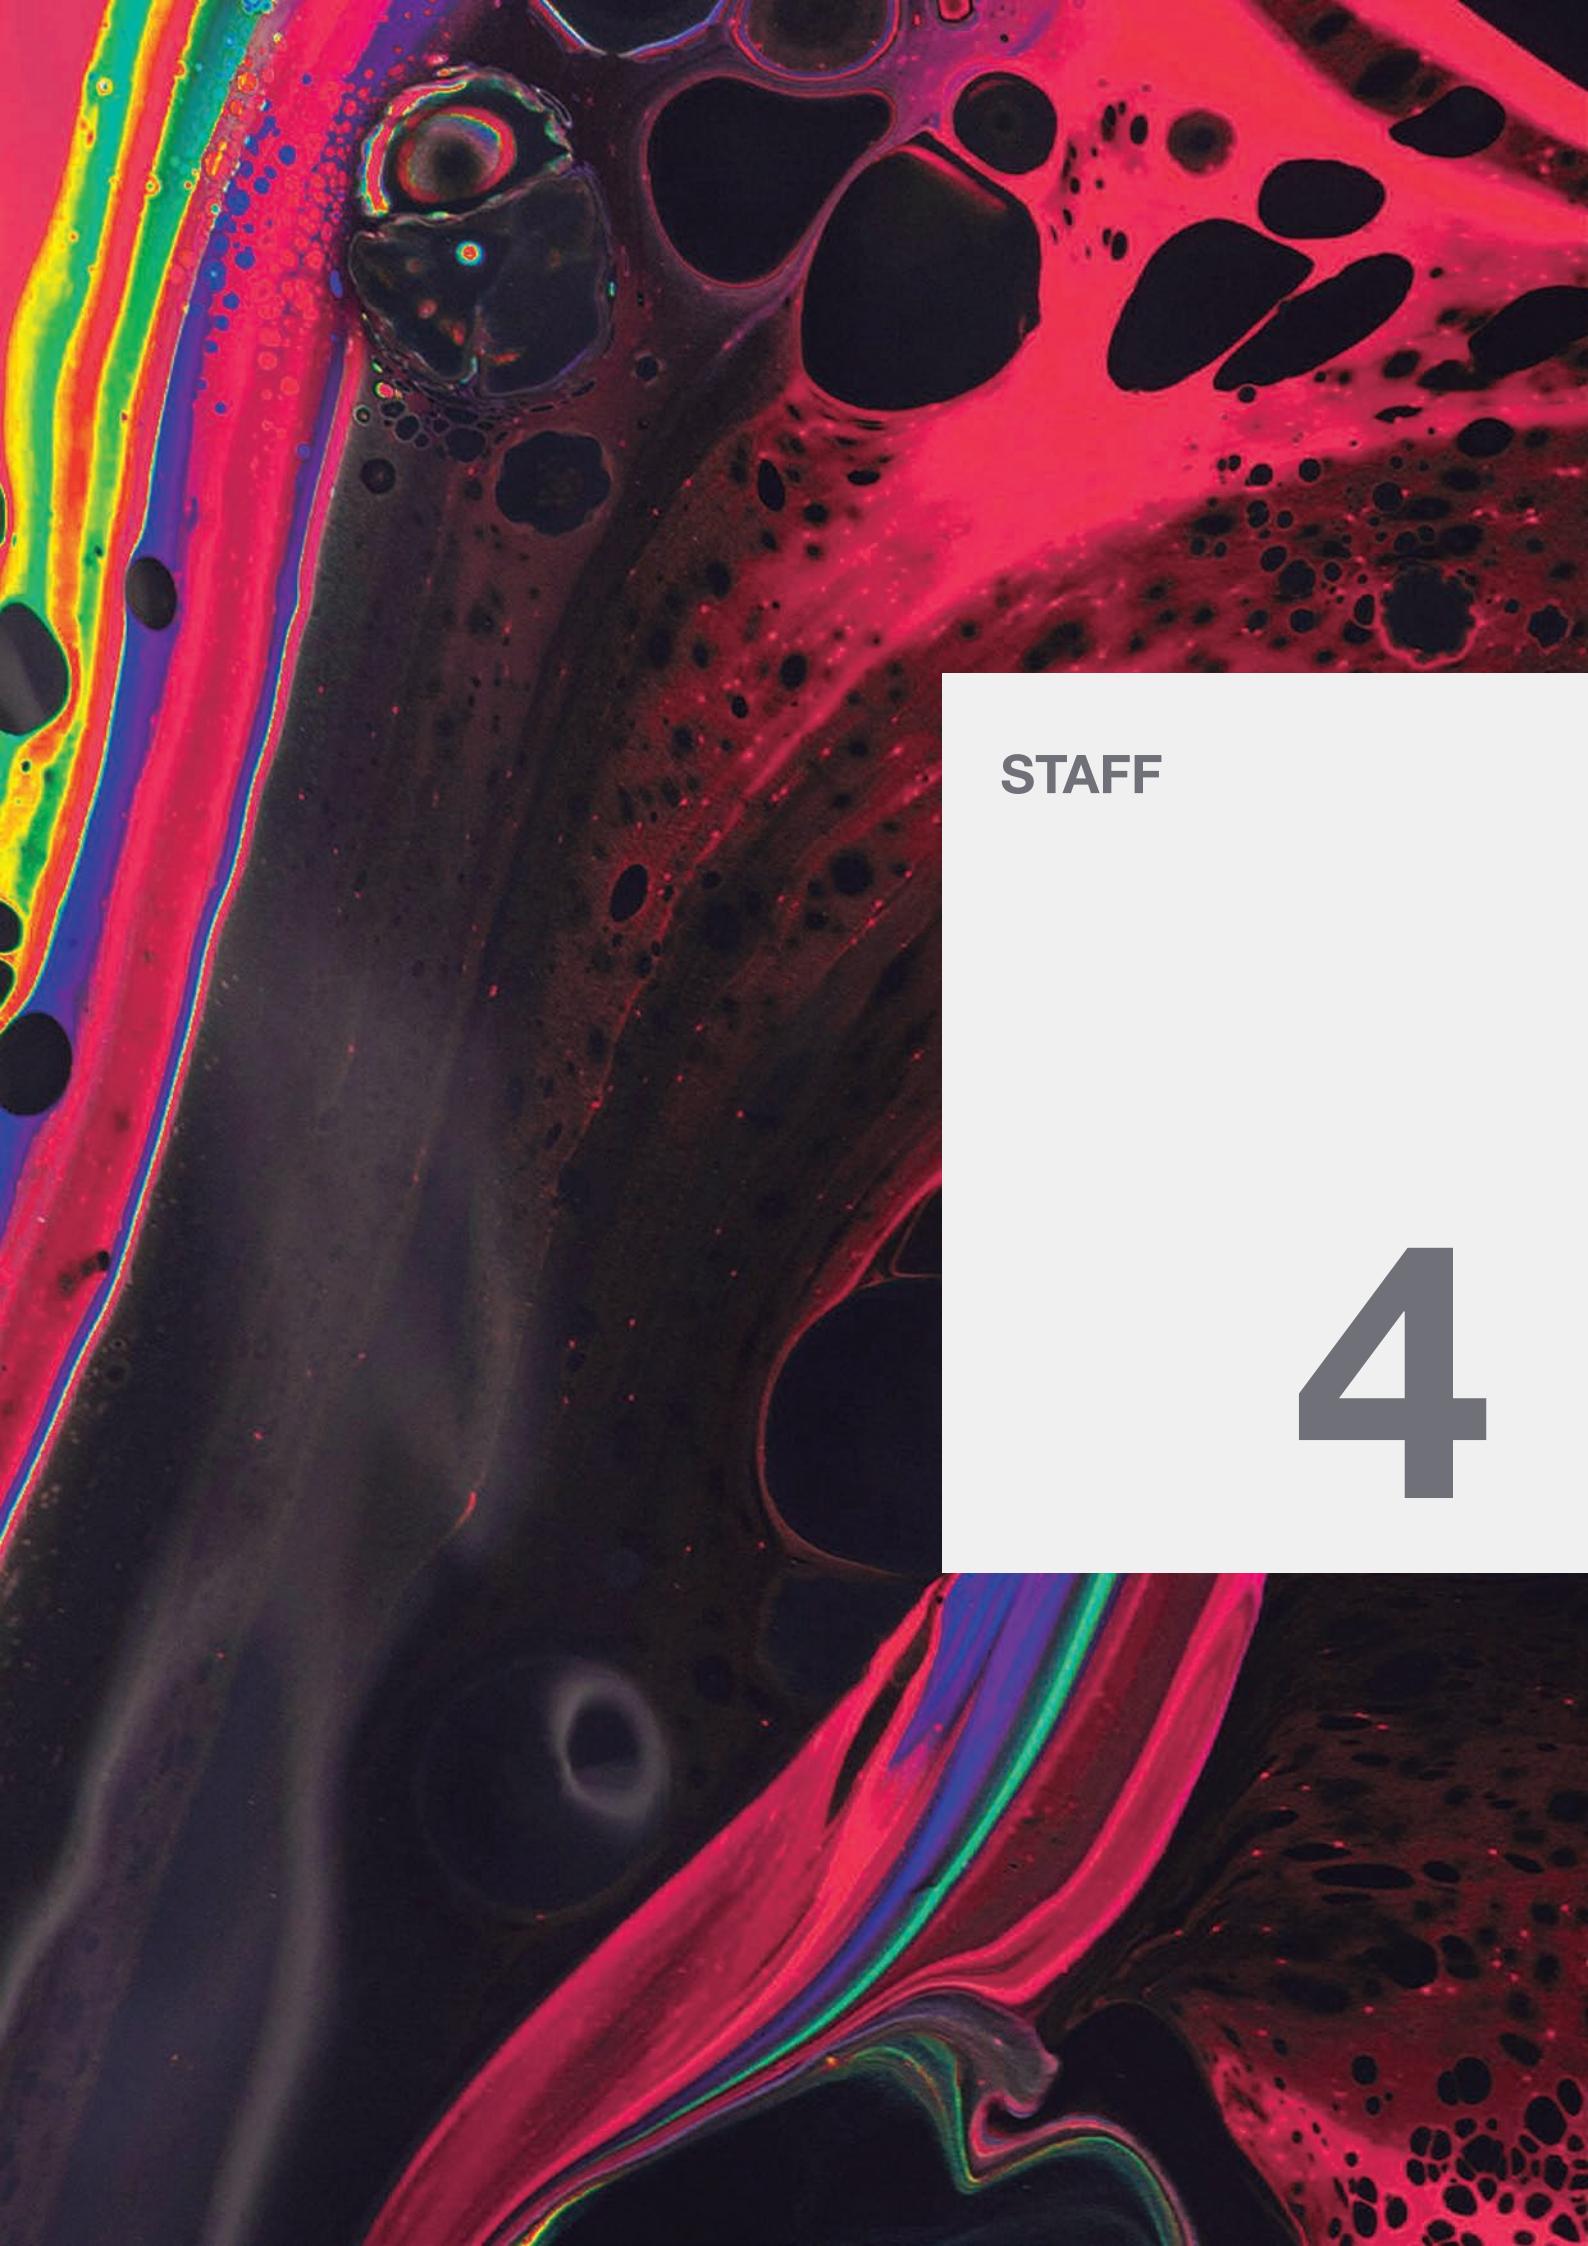

79 researchers (INVESTIGO program)

### RESPONSIBLE RESEARCH AND INNOVATION (RRI)

First IMIBIC Race for Research

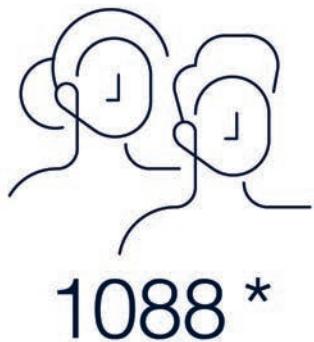

The background of the image is a vibrant, abstract pattern resembling liquid or plasma. It features swirling, organic shapes in shades of red, orange, yellow, green, blue, and purple against a black background. The colors are最浓 at the edges and fade into the dark center.

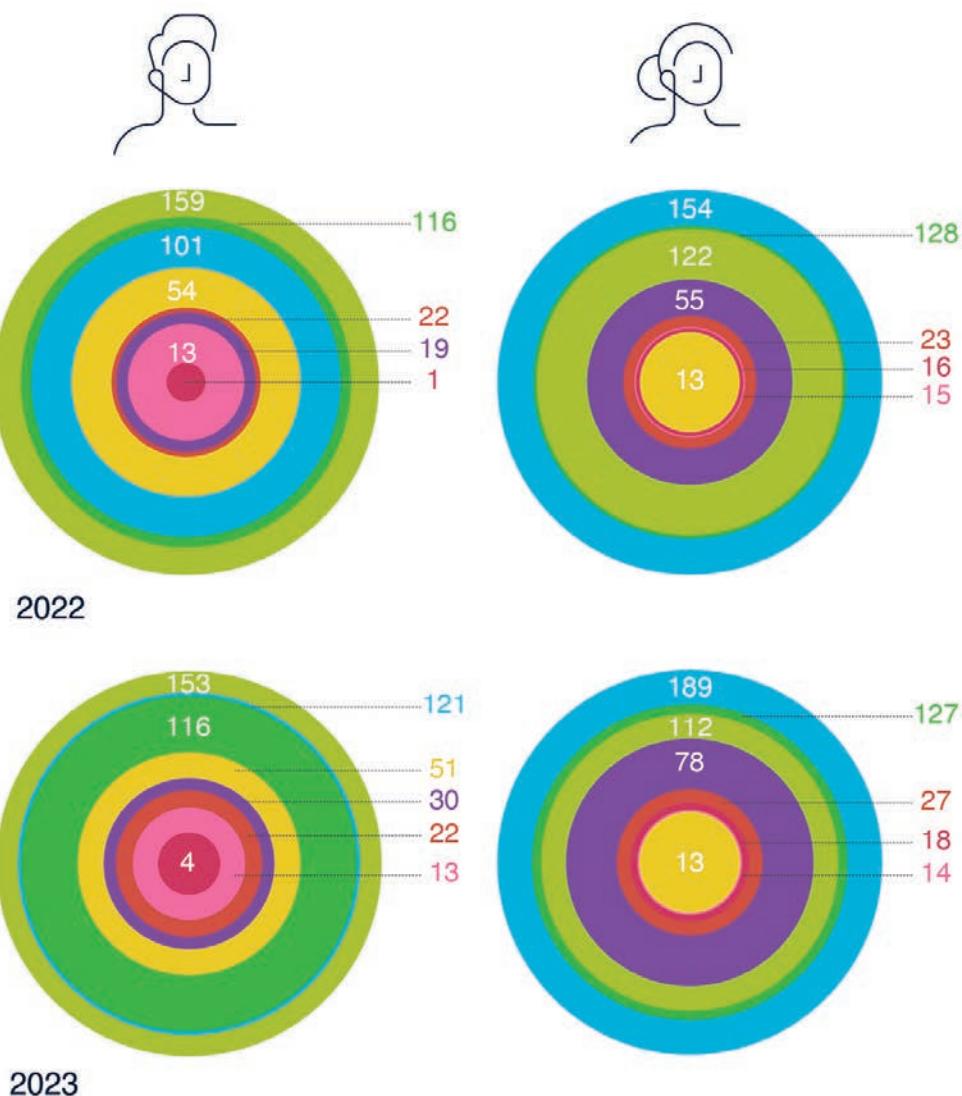

**STAFF**

**4**

(\*) The figures include all IMIBIC staff (researchers, support staff and administrative staff)

- NURSES
- MANAGEMENT STAFF
- IMIBIC RESEARCH SUPPORT SERVICES
- LEADING RESEARCHERS

- ESTABLISHED RESEARCHERS
- RECOGNISED RESEARCHERS
- FIRST STAGE RESEARCHERS
- TECHNICIANS

## » RESEARCH STAFF 2023

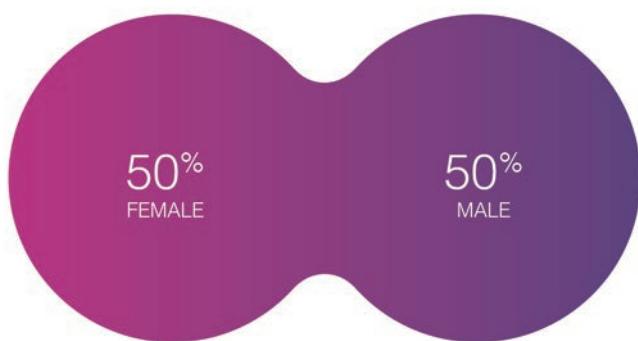

**Note:** R1-R4 correspond to the profile descriptors for research careers provided by EURAXESS (HRS4R).

## » GENDER PERSPECTIVE

IMIBIC, through its Equality Plan, is committed to implementing actions aimed at promoting gender parity in all personnel groups. The increase in female R3 researchers in last years ensures that there will be more female leading researchers in the coming years.

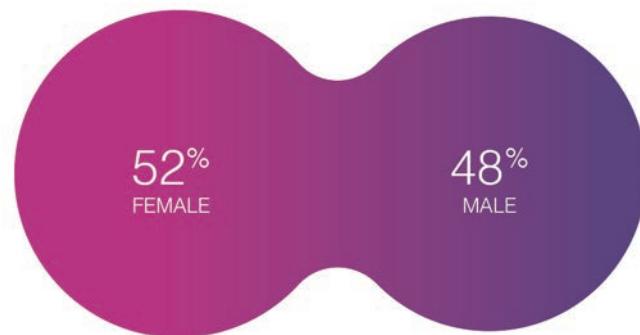

## » RESEARCH STAFF 2023

» ALL PERSONNEL IN 2023

» MANAGEMENT STAFF 2023

» IMIBIC RESEARCH SUPPORT SERVICES 2023

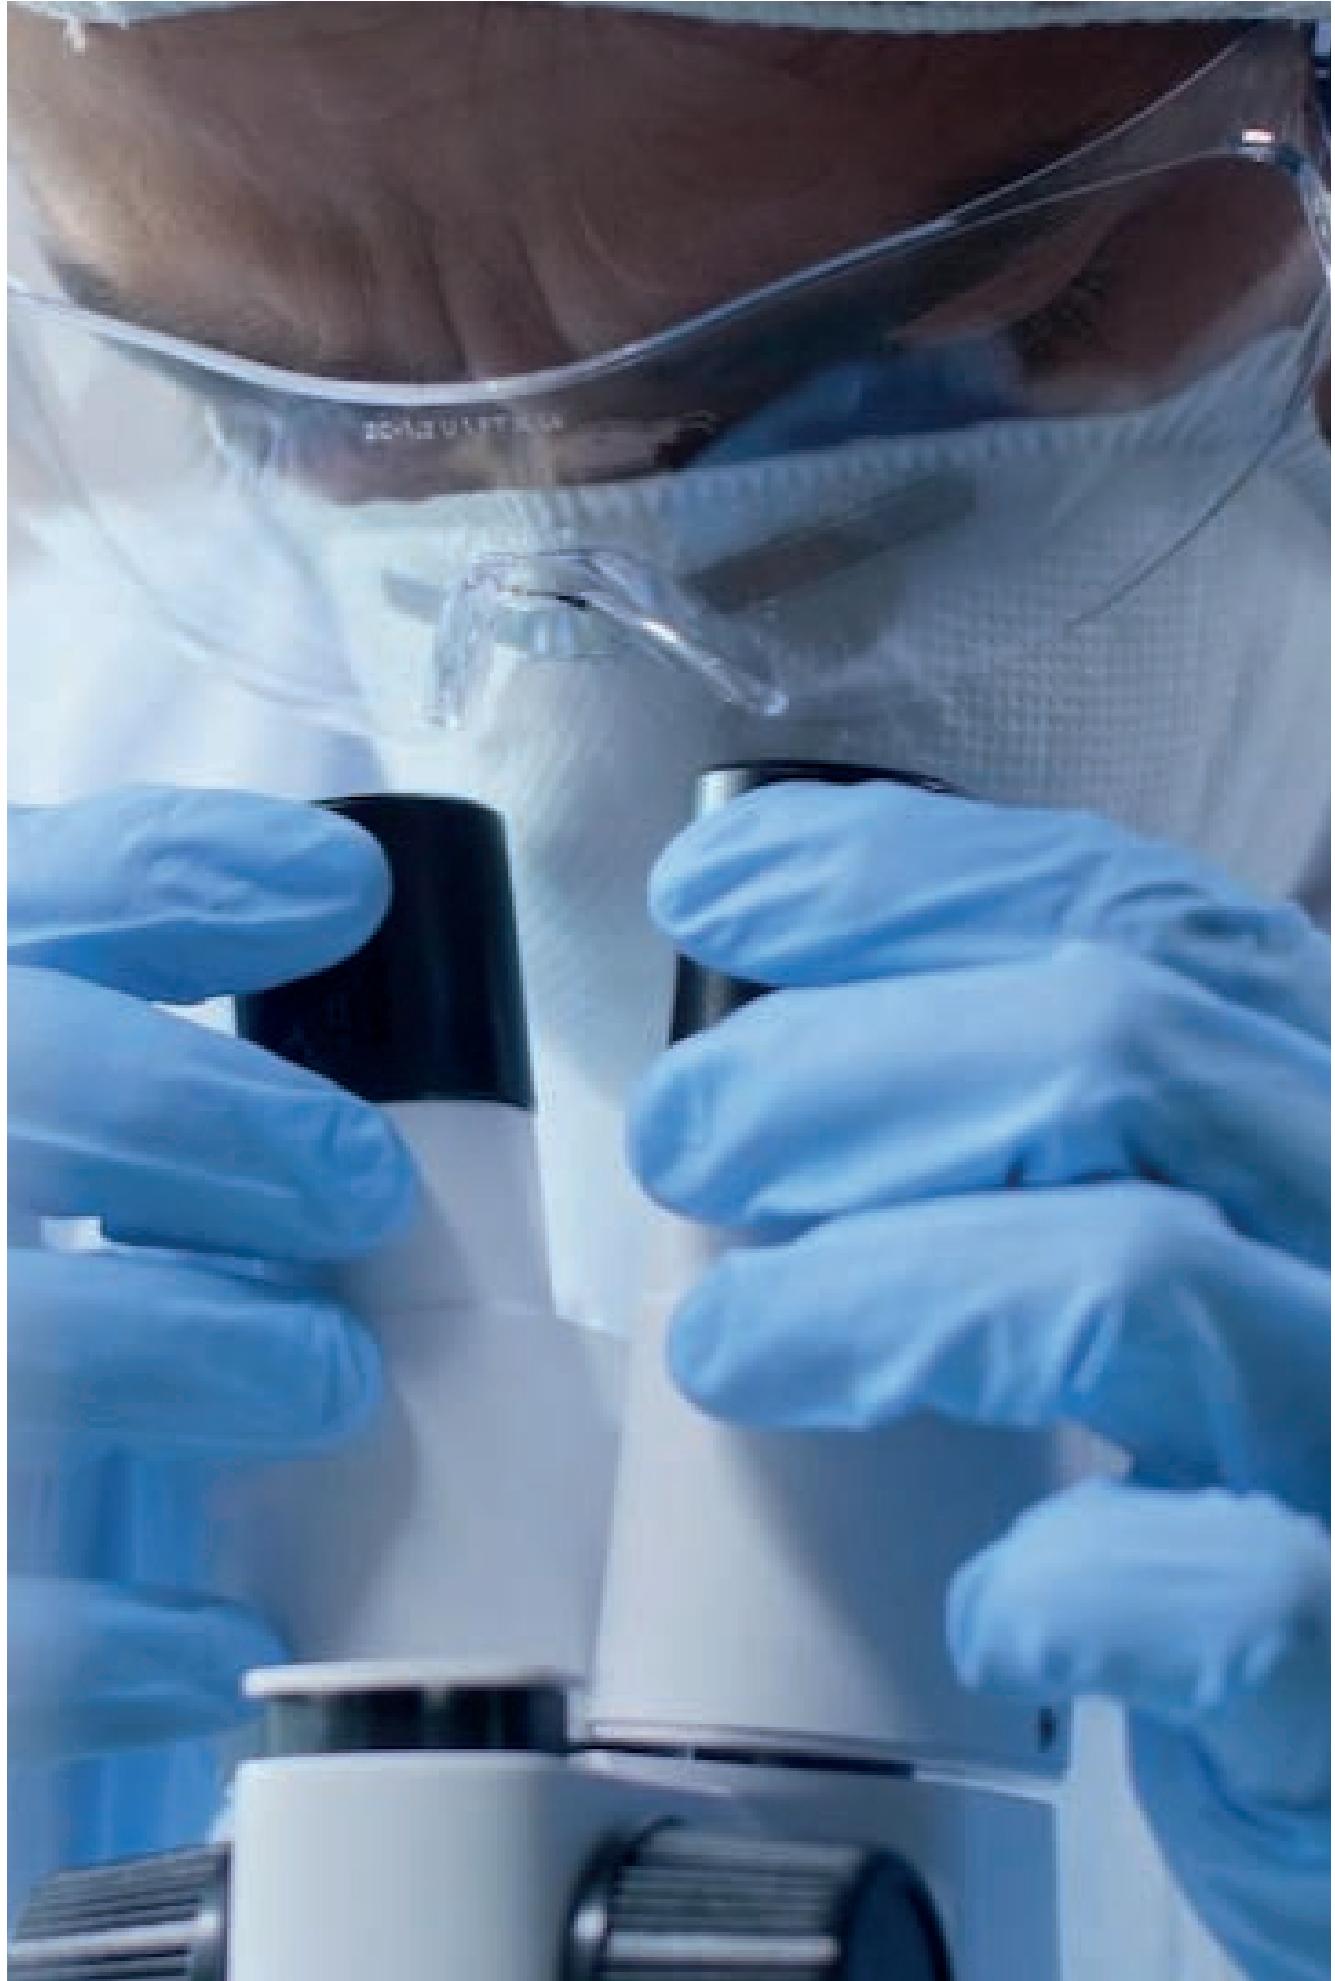

The background of the entire page is a vibrant, abstract painting featuring swirling patterns of red, blue, green, yellow, and black. It has a fluid, organic feel with visible brushstrokes and color mixing.

## MANAGEMENT STAFF

5

## 5.1 R&D MANAGEMENT UNIT

The mission of the IMIBIC R&D Management Area is to offer a comprehensive service to research staff, both in the research groups and Clinical Management and Primary Care Units, through a single point of contact: the Project Manager. Its main objective is to provide professionals with the necessary support for the proper management and development of their scientific projects, agreements, service contracts and grants, and provide funding bodies with the corresponding justification and closure.

### » TEAM MEMBERS:

- **Miriam Cruzado Caballero**  
Head of Unit
- **Manuel Aguilar Panadero**  
Project Manager
- **Carlos Lázaro Guevara**  
Project Manager
- **Mónica Carrasco Jiménez**  
Project Manager
- **José Carlos Prieto Baena**  
International Project Manager

## 5.2 INNOVATION & TRANSFER UNIT

The Innovation and Transfer Unit identifies intangible assets resulting from the research carried out within its competencies and provides comprehensive advice on the correct protection and transfer of research results. Ideas produced by researchers are also protected as intellectual or industrial property according to the UNE 166002: 2021 standard for innovation management.

The Innovation Unit provides advisory services to researchers on the transfer of their technologies, such as the drafting of licensing agreements, advice on the creation of start-ups or the establishment of public-private partnerships.

### » TEAM MEMBERS:

- **Luis M. Fernández Formoso**  
Head of Unit
- **Antonio Ortega Llamas**  
Innovation and Transfer Technician

## 5.3 FINANCIAL AND HUMAN RESOURCES UNIT

### » MANAGEMENT

The Financial Management and Human Resources Unit, which includes Accounting, Invoicing, Financial and HR services, provides the Research, Development and Innovation (R+D+i) Unit with general and administrative support, ensuring the optimal use of available resources.

The activity of the Unit is closely aligned with the Institute's mission and is therefore strongly committed to the management of Research and Innovation in the province of Cordoba.

### » SERVICES OFFERED BY THIS UNIT INCLUDE:

- Financial support for R+D+i projects
- Maximization of economic resources
- Management of agreements, contracts and private donations
- Human resources management
- Invoicing/billing and maintenance services associated with clinical trials and observational studies
- Budgetary control of activities
- Design and set up of information flows and activities.

### » TEAM MEMBERS:

- **Francisco Javier López Ruiz**

Head of Unit

- **Florencio Muñoz Encinas**

Accountant and Human Resources Specialist

- **Silvia Miranda Castellano**

Human Resources Specialist

- **Silvia De la Cruz Gallego**

Human Resources Assistant

- **Raquel Berdud Arias**

Grants & Projects Administrator

- **Marcos Notario Ríos**

Grants & Projects Administrator

- **Maria del Carmen García Serrano**

Clinical Research Assistant

- **Francisca Lobo Ávalos**

Invoicing Assistant

- **Enrique Muñoz Baena**

IT Systems Coordinator

- **Manuel Jesús Carmona Hidalgo**

IT Systems Assistant

- **Miguel Ángel Borreguero Aparicio**

IT Systems Assistant

## 5.4 STAFF UNIT

The Staff Unit comprises the Control & Reporting, Communication, Quality & Training and Legal services and provides support and assistance to research groups, as well as to the Executive Board of the Institute.

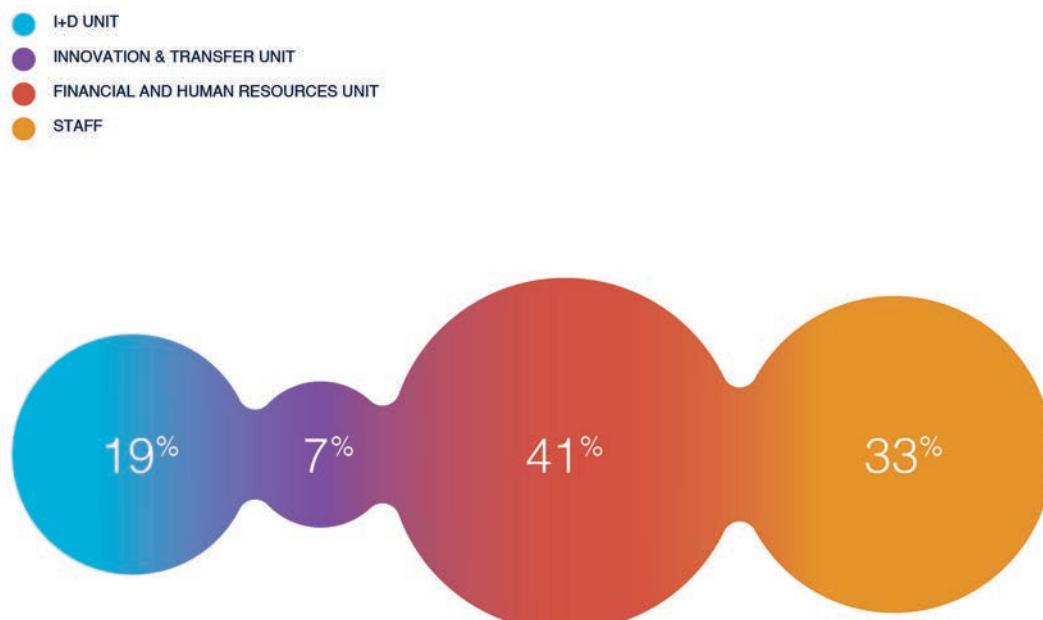

### » THE MAIN SERVICES OFFERED BY THIS UNIT INCLUDE:

- Increasing the visibility of the Institute in the province and elsewhere
- Management of fundraising through sponsorship and patronage
- Promotion and dissemination of research results
- Supporting researchers in the preparation and coordination of events
- Management of the Institute's website and social media accounts
- Production of promotional material
- Collecting and validating information relevant to the Institute for further analysis

### » TEAM MEMBERS:

- **Estefanía Azcona Corrales**  
Management Controller
- **Marta Granados Aguirre**  
Administrative Assistant
- **Isabel De Castro Burón**  
Communications Officer
- **Inmaculada Varo Urbano**  
Communication Technology
- **José M<sup>a</sup> Rubio García-Sotoca**  
Communications (volunteer staff)
- **Marisa Escabias Parejo**  
Quality Specialist
- **David Luna Gómez**  
Quality and Training Technician
- **Marta Manganaro**  
Legal and Contract Specialist
- **Daylin Valdés Hernández**  
Legal and Contract Assistant

### » MANAGEMENT STAFF 2023

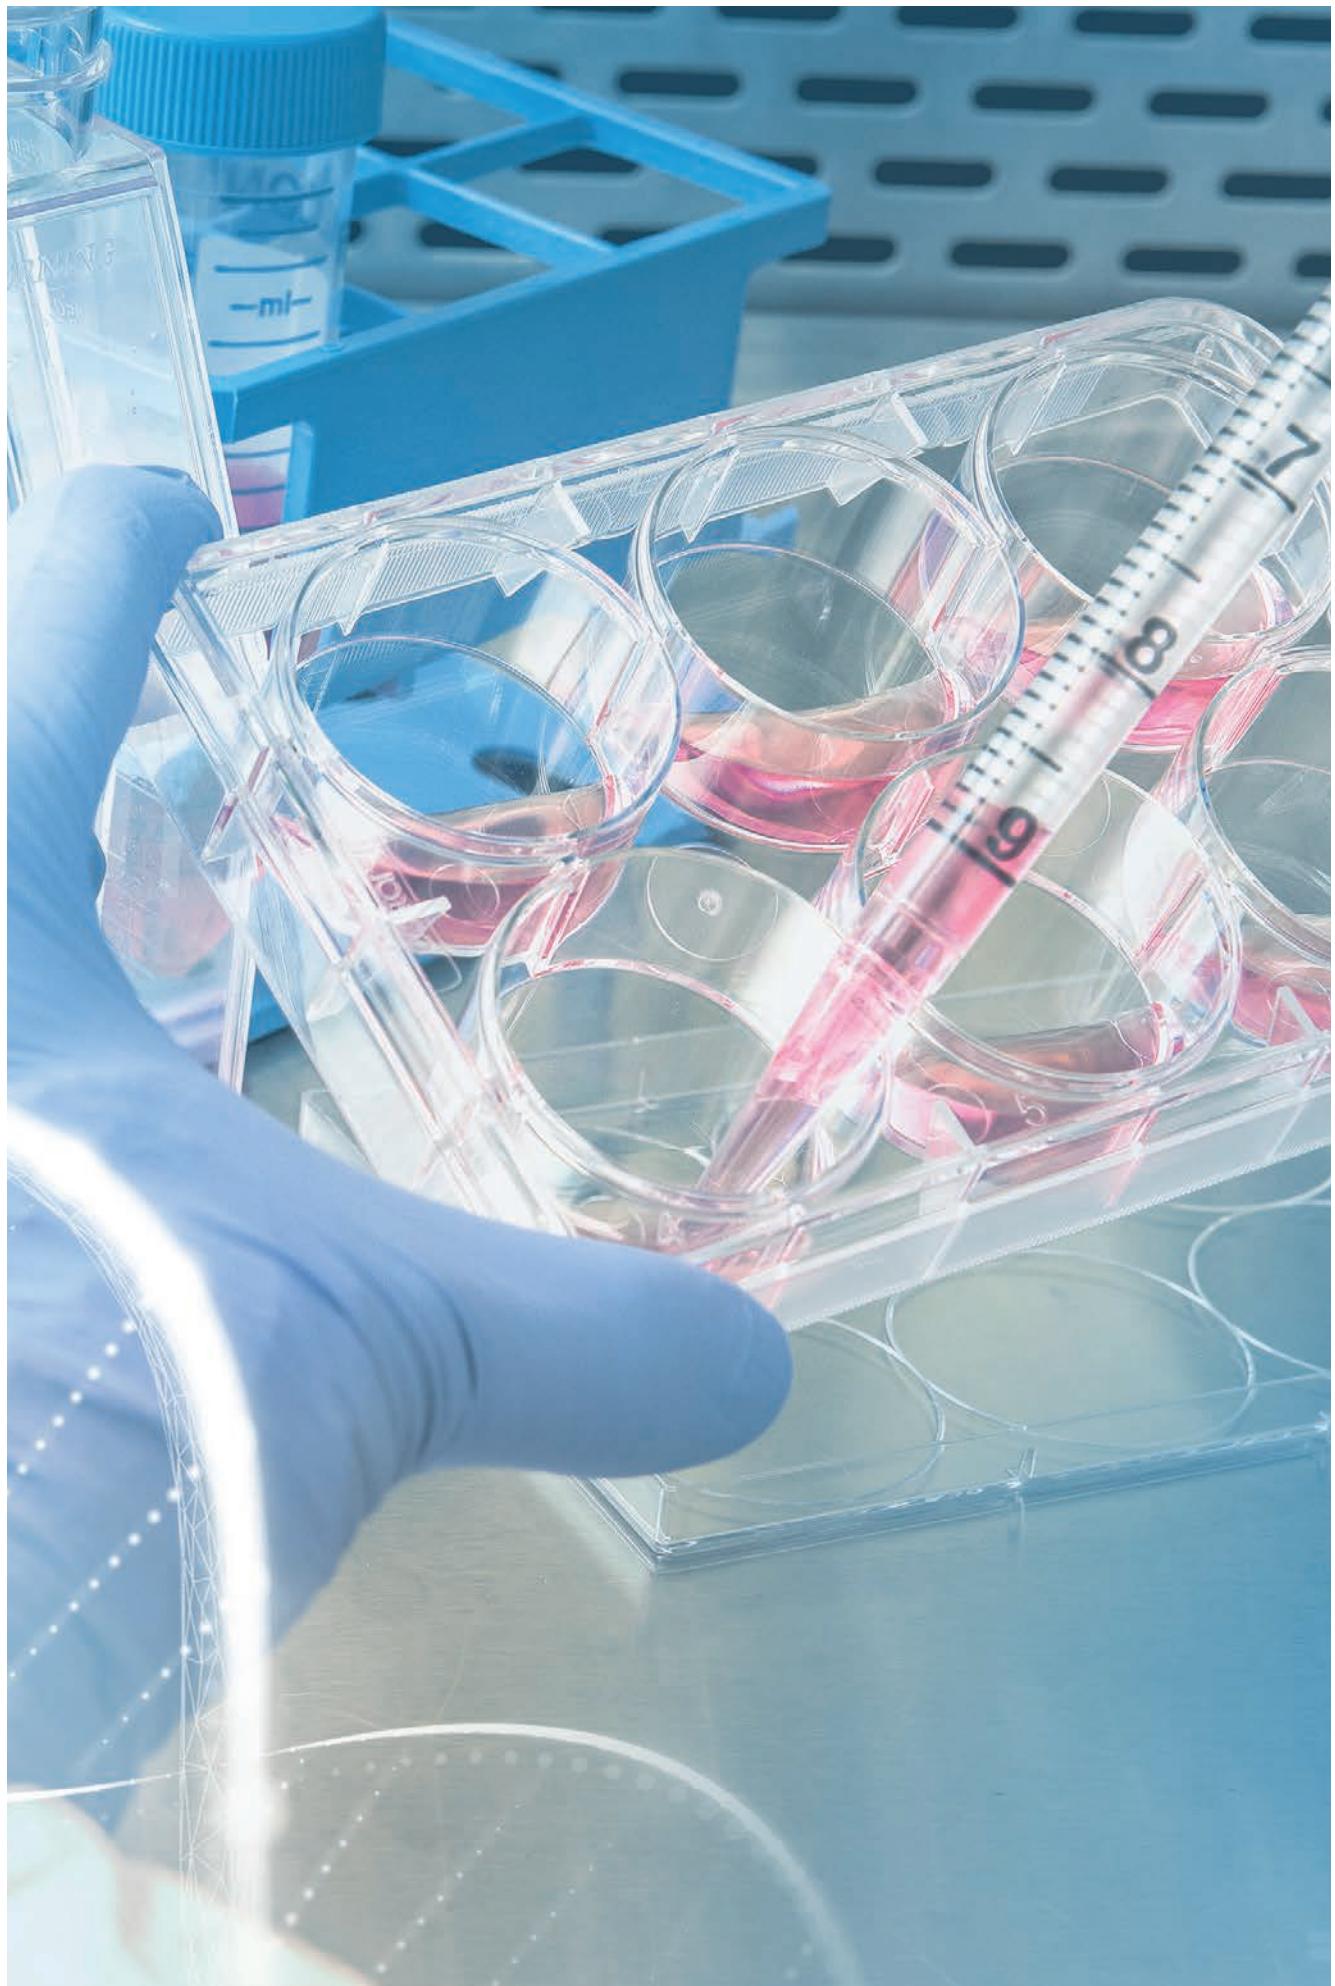

**FUNDING**

6

FIBICO is the financial and legal entity responsible for the management of IMIBIC. The following tables present the approved financial statements of FIBICO for 2023 compared to 2022.

#### » PROFIT & LOSS ACCOUNT (THOUSANDS OF EUROS)

	2023	2022
REVENUES	15,883.06 €	12,987.54 €
COST OF GOODS	-1,577.59 €	-1,409.87 €
PERSONNEL	-9,343.69 €	-7,265.55 €
OTHER EXPENSES	-4,055.60 €	-3,392.70 €
DEPRECIATION	-901.76 €	-895.68 €
 NET INCOME	 4.41 €	 20.45 €

#### » BALANCE SHEET (THOUSANDS OF EUROS)

Assets	2023	2022
Non-current assets	10,355.81 €	9,718.66 €
Current assets	29,903.21 €	31,206.64 €
Accounts receivable	15,746.16 €	13,129.89 €
Cash & cash equivalents	15,459.68 €	18,076.75 €
<b>Total Assets</b>	<b>40,259.02 €</b>	<b>40,925.30 €</b>
 Liabilities		
Non-current liabilities	4,329.44 €	3,794.29 €
Current liabilities	31,022.80 €	31,931.88 €
Equity	4,906.78 €	5,199.13 €
<b>Total liabilities</b>	<b>40,259.02 €</b>	<b>40,925.30 €</b>

#### » OVERHEADS

The breakdown of project overhead revenues is as follows (thousands of euros):

OH from research projects	465.4
Private projects	149.30
Other	1.4
<b>Total</b>	<b>616.10</b>
 Compensation to IMIBIC from Clinical Research	 876,78

The accreditation guide for research institutes states that “at least 20% of the indirect costs received annually should be allocated to actions aimed at supporting IIS researchers, such as capacity building, training, co-financing of contracts, IIS own projects for emerging groups, etc.” In accordance with this, at least 123.2k € should be allocated to these purposes.

Taking into account only co-financing of personnel expenses for competitive calls (Miguel Servet, Sara Borrell, private entities, etc), IMIBIC committed 426.9k € euros to this item.

Each year, IMIBIC launches certain prizes and sponsorships for its groups and researchers, in accordance with the policy framework of its Research Promotion Plan (RPP), aimed at stimulating collaboration with external groups, increasing publications in open access journals, among others. Last year, the amount allocated to this item was 37.5k € euros.

As part of its own program for the promotion of clinical research, the Institute also finances the contracting of staff required in the Institute's clinical research areas. The amount for staff associated with clinical research (nurses, coordinators, administrative staff, etc.) amounted to 420.80 euros.

# FUNDING

In terms of Funding, the positive trend that began in 2018 continued, with a sustained increase in fundraising. However, it is important to consider the exceptional nature of 2022, when Investigo program grant exceeded five million euros.

As highlights, Clinical Trial invoicing exceeded 4.7 million euros, and funds obtained from ISCIII raised 5 million euros.

## » THE BREAKDOWN OF FUNDS IS AS FOLLOWS (THOUSANDS OF EUROS):

	2018	2019	2020	2021	2022	2023
IMIBIC Partners	900	900	900	900	900	900
Public Funding	4,430	5,078	7,752	6,679	11,505	6,737
Private Funding	4,544	5,061	5,397	6,317	8,173	8,458
	<b>9,874</b>	<b>11,039</b>	<b>14,049</b>	<b>13,896</b>	<b>20,579</b>	<b>16,095</b>
	2018	2019	2020	2021	2022	2023
<b>Total funds raised</b>	<b>9,874</b>	<b>11,039</b>	<b>15,396</b>	<b>13,956</b>	<b>20,579</b>	<b>16,095</b>
	2018	2019	2020	2021	2022	2023
National	3,927	3,320	4,510	5,264	7,671	5,509
Regional	453	746	3,241	1,416	3,534	773
International	50	1,012	0	57	300	300
IMIBIC Partners	900	900	900	900	900	900
Clinical Trials	2,472	3,248	3,384	4,097	4,652	4,785
Other Private Funding	2,072	1,813	2,014	2,222	3,522	3,673
<b>TOTAL</b>	<b>9,874</b>	<b>11,039</b>	<b>14,049</b>	<b>13,956</b>	<b>20,579</b>	<b>16,095</b>

As in previous years, the balance of private and public funding has been higher for public funding, although the percentage of private funds has increased in recent years.

## » CLINICAL TRIALS

Clinical Research is one of IMIBIC'S main strategic pillars. The tables below show the total amount and trend for clinical trial invoicing signed by the Institute since 2017.

(thousands of euros)

	2017	2018	2019	2020	2021	2022	2023
Clinical trials invoiced	1,922	2,472	3,248	3,384	4,097	4,651	4,785

The table below shows the most active medical services in terms of invoicing. At the same time, the management of IMIBIC and the HURS have also implemented a plan to add new medical services to this activity in order to provide the latest available treatments to the patients of Cordoba, as well as take further steps forward along the path of economic sustainability of the Institute.

Clinical Management Units	2017	2018	2019	2020	2021	2022	2023
Oncology	623,740.64	1,051,109.07	1,740,243.38	1,557,507.14	1,874,701.37	2,201,761.51	2.105.051,83

The background of the entire page features a vibrant, abstract pattern of swirling, organic shapes in shades of pink, blue, yellow, and black. It has a fluid, marbled appearance.

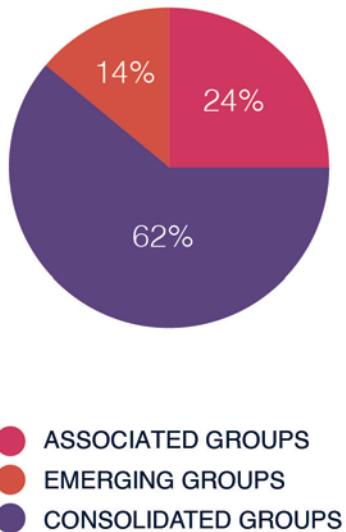

## FACTS & FIGURES

7

## 7.1 STAFF

### RESEARCHERS IN IMIBIC GROUPS

IMIBIC comprises 48 research groups, made up of 30 consolidated, 6 emerging and 12 associated groups, respectively, in 2023.

In 2020, IMIBIC implemented the 2020-2022 Action Plan as part of its Human Resources Strategy for Researchers (HRS4R), which was originally launched in 2017 after receiving the “HR Excellence in Research” award from the European Commission.

The IMIBIC HRS4R Action Plan is based on the recommendations and principles set out in the Charter & Code designed to ensure transparency, accessibility, equity and the pursuit of excellence in the recruitment of researchers.

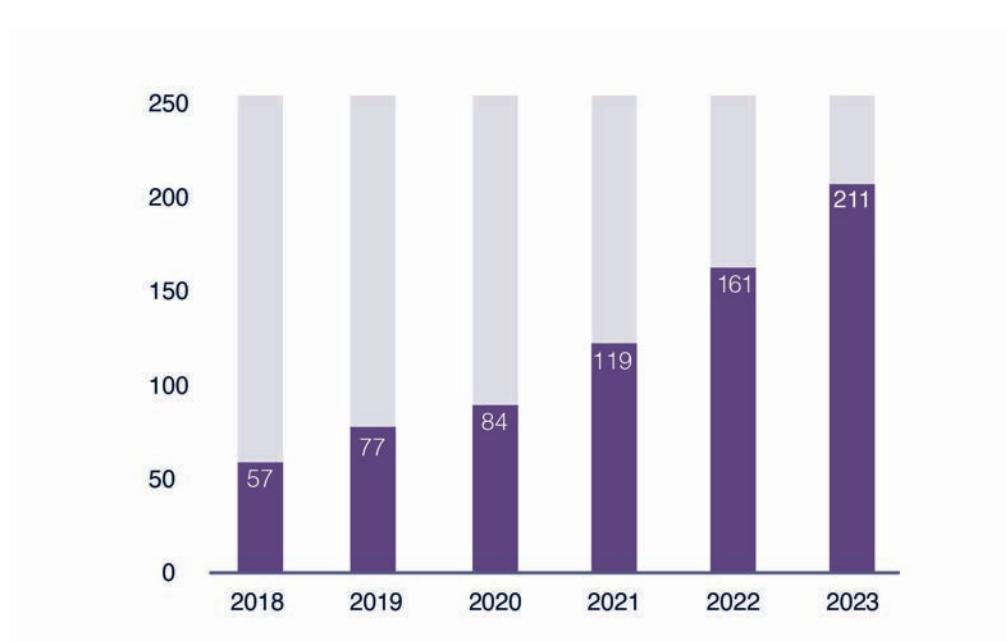

During 2023, has been evaluated the first year included in the 2023-2025 Action Plan in order to be prepared for the external evaluation by the European Commission. It's expected this evaluation will be made by the last term in 2024 and the Institute will expect to renew the recognition of “HR Excellence in Research” award.

## RESEARCHERS R1-R4

## COMPETITIVE HUMAN RESOURCES GRANTS

During 2023, IMIBIC held the following ongoing human resources grants:

## 7.5 CLINICAL TRIALS

The graphs below summarise the number of active clinical trials in 2023.

In 2023, 154 new clinical trials were started and 733 were ongoing. These include 489 clinical studies with drugs, 200 observational studies and 44 trials of new medical devices.

### ONGOING CLINICAL TRIALS IN 2023

OS: Observational Studies / ME: Medical Equipment

Most of the clinical trials were sponsored by Spanish industry and were in the areas of oncology, dermatology, neurology, digestive system, internal medicine, rheumatology and hematology.

# 8.1. SCIENTIFIC PROGRAMS

## SCIENTIFIC PROGRAM 1: ACTIVE AGEING AND FRAILTY

### » GENERAL GOALS

The main goal of the Aging and Frailty program is to elucidate the molecular and cellular mechanisms sustaining healthy aging in order to establish psychosocial and nutritional interventions to prevent frailty and age-associated diseases.

Aging represents a major risk factor for cancer and chronic inflammatory diseases. Increasing evidence has helped unveil some of the underlying mechanisms explaining this association, among which immunosenescence and inflammaging play pivotal roles. Notwithstanding this, there is still a gap of knowledge that needs to be filled, specially in those aspects related to the prevention and/or reversal of age-associated diseases. In this scenario, there is an active search for novel therapies and psychosocial or nutritional interventions to tackle these diseases in order to increase both the quality and expectancy of life.

The Aging and Frailty program of the IMIBIC is composed by several groups with different backgrounds. Far from being a drawback, this represents a major driving force of the program, as the multidisciplinarity of the groups enable to address aging from multiple angles and design collaborative projects. Thus, the groups tackle aging research from analyses of the molecular and cellular aspects of cellular and system senescence to clinical and interventional approaches. In this line, one major challenge is to integrate the clinical data with the molecular information to establish the features of both healthy aging and frailty that may pave the way to identify novel targets for therapeutic and/or nutritional interventions.

Accordingly, the research groups in Program 1 carry out a variety of studies, from translational to clinical, that have yielded this year over one hundred publications, including original articles and reviews, associated with the competitive projects that have been awarded by regional and national funding agencies.

### » 5 HIGHLIGHTED PUBLICATIONS

1. Recommendations for the use of anti-dsDNA autoantibodies in the diagnosis and follow-up of systemic lupus erythematosus - A proposal from an expert panel
2. Influence of genetic and interannual factors on the fatty acids profile of virgin olive oil
3. The Impact of Metabolic Syndrome Risk Factors on Lung Function Impairment: Cross-Sectional Study
4. Impact of the pre-drying process on the volatile profile of on-farm processed Ecuadorian bulk and fine-flavour cocoa varieties
5. Assessing polygonal approximations: A new measurement and a comparative study

### » SUB-PROGRAMS

- Aging of the immune system: Immunosenescence and inflammaging
- Frailty and well-being in the elderly
- Care of chronically ill patients

Following the research lines defined in Scientific Program 1, the various groups have focused their efforts on objectives aimed, among other aspects, at:

- i) Development of novel strategies in immunotherapy.
- ii) Use of oral nutritional supplements and the identification of new prognostic and therapeutic markers in heart failure.
- iii) Analyzing psychosocial and nutritional factors in elderly individuals, the chronically ill and cancer patients to better stratify their state of health, and to assess the relevance of implementing care-based strategies to improve their well-being.
- iv) Development of metabolomic approaches for the identification and characterization of bioactive compounds with biomedical interest.
- v) Identification of risk biomarkers associated with the immune response to SARS-CoV-2 infection.
- vi) Novel strategies to treat depression.

## SCIENTIFIC PROGRAM 2: NUTRITION, ENDOCRINE AND METABOLIC DISEASES

### » GENERAL GOALS

This program aims at improving the health of people with metabolic and endocrine diseases by generating novel knowledge that helps prevent their development as well as to design useful tools for diagnosis and treatment. In this scenario, lifestyle modifications, in particular, nutrition, play pivotal roles.

Metabolic diseases, including obesity, diabetes, and metabolic dysfunction-associated steatotic liver disease (MASLD) are extremely common. Importantly, metabolic diseases are major risk factors for cardiovascular disease, neurological disease, kidney disease and even for infectious disease, as has been shown during the COVID19 pandemic. An inverse link between obesity and reproductive health has been also clearly established. In all, these diseases decrease not only the quality of life of patients but they may also reduce their life expectancy, with an impact in both the well-being of society and public health sustainability. Unfortunately, there is still a gap in our knowledge on the causes and consequences of these diseases, the mechanisms involved in their development, the nature of all their comorbidities and how to effectively prevent and treat them. In this scenario, the groups working in Scientific Program 2 develop research on different aspects of metabolic and endocrine diseases, providing advanced data on studies in humans, animal and cellular models. Accordingly, our work is based on the integration of basic scientists with clinicians in fields addressing from genetic and epigenetic studies to molecular mechanisms in biology, such as oxidative stress, inflammation, fibrosis or hypoxia. All this work is oriented towards providing efficient translational tools to tackle metabolic and endocrine diseases from a personalized perspective.

The different backgrounds of the research teams composing Program 2 enable both singular research in the different fields corresponding to the different subprograms included in Program 2, and fostering interdisciplinary research based on collaborative projects. This has enabled researchers to publish a considerable number of original articles and reviews in relation to the national and international competitive grants that have been awarded to our researchers, including both senior scientists and young researchers at different stages of their career that were already or have joined our groups through highly competitive programs. Noteworthy, one of the PIs in Program 2, Dr. Tena-Sempere, received an ERC Advanced grant this year and was also awarded an additional EU grant in collaboration with other groups in the program (eprObes). These and other achievements and awards gained in this year highlight our ambition to reach excellence in research, which underlies the spirit of a highly competitive research program on highly prevalent diseases, ranging from diabetes and obesity to various reproductive disorders, on the basis of personalized and precision medicine.

## SCIENTIFIC PROGRAM 3: INFECTIOUS AND IMMUNOLOGICAL DISEASES AND ORGAN TRANSPLANTATION

### » GENERAL GOALS

The objective is to pursue a unified line of high-quality research focused on health issues related to host-pathogen interactions, particularly in the fields of infectious, zoonotic, immunological, and organ transplantation diseases. The goal of this research is to generate outcomes that can be directly applied in clinical practice, influencing healthcare professionals and ultimately improving patient quality of life and overall social well-being.

A key strategy involves strengthening collaborations between research groups at regional, national, and international levels and, where possible, with public or private companies. Setting clear, achievable goals for research projects is also essential, as it enhances the likelihood of success, encourages the creation of new spin-offs by team members, and establishes a strong foundation for research training while ensuring stable employment for researchers.

The actions implemented to reach these goals must be both specific and effective, adopting a translational approach that improves patient care. This may be achieved through the transfer of research outcomes to industry or by integrating them into clinical practice guidelines.

In 2023, a total of 8 research groups participated in IMIBIC Program 3, including 3 consolidated groups, 1 emerging group, and 4 associated groups. Together, they produced 84 publications, managed 18 active projects, and conducted 29 clinical trials throughout the year.

### » SUB-PROGRAMS

- HIV + Hepatitis C
- Transplantation
- Multiresistance

#### HIV AND/OR HCV + HEV INFECTION

In 2023, a total of 27 publications were produced on these topics, with 19 appearing in Q1 journals, including 3 in the prestigious D1 category.

In the field of HIV research and treatment, the internationally funded project remained active throughout 2023, with its primary goal being to evaluate the real-world effectiveness of a new antiretroviral treatment combination. This study specifically focuses on patients experiencing severe immunosuppression due to HIV. One of the notable publications includes a study that led to an improvement of the method developed by the research group for the detection, characterization, and sequencing of the Hepatitis E virus (HEV). The proposal offers an innovative methodology by combining two broad-spectrum PCR assays targeting different regions of the HEV viral genome. The results demonstrated that this strategy is effective, showing an increase in the accuracy and sensitivity of Hepatitis E diagnosis, significantly enhancing the molecular diagnostic efficacy for HEV. This approach has real potential to improve diagnostic capacity, with a significant impact on clinical management, reducing the number of false-negative patients by up to 20%. Additionally, the improvement of this method allows for the detection of emerging viruses, such as the rat Hepatitis E virus (RHEV). These results were officially published in Microbial Biotechnology, a journal ranked in the Q1 category. The work has been recognized as one of the most outstanding publications from Program 3.

Additionally, in the same research area, there are other notable studies, including the ISCIII-funded investigation “Magnitud e impacto clínico de la infección por Orthohepevirus C,” and the internationally funded clinical trial titled “Ensayo clínico fase IV, aleatorizado, multicéntrico y doble ciego diseñado para evaluar la seguridad y la conveniencia del cambio de DTG/3TC por BIC/FTC/TAF en personas con VIH, buen control virológico y vulnerabilidades neuropsiquiátricas: Estudio MIND”.

## » TRANSPLANTATION/MULTIRESISTANCE

In 2023, a total of 36 publications were produced on these topics, with 20 appearing in Q1 journals, including 13 in the prestigious D1 category.

Among these publications is an observational study investigating cases of healthcare-associated infections (HAIs) caused by multidrug-resistant (MDR) bacteria reported to the epidemiological surveillance system of Andalusia, Spain, between 2014 and 2021. The study describes the reported cases and their spatiotemporal distribution, with a particular emphasis on social determinants of health (SDoH). These findings have been officially published in Eurosurveillance, a prestigious D1-ranked journal with an impact factor of 19, making it the most notable manuscript in this area. This work has been recognized as one of the most outstanding publications from Program 3.

In the same field, there are other significant studies, such as the ISCIII-funded research “Papel de los microRNAs en la respuesta inmune discordante frente a CMV e impacto en la reconstitución inmune y la replicación de CMV en trasplante de progenitores hematopoyéticos”, as well as the internationally funded clinical trial “Efficacy of CMV Prophylaxis with Letermovir in Lung Transplant Recipients (LETERCOR).” Regarding the specific objectives of the Multiresistance subprogram, which involves close collaboration between the GC03 and GC24 research groups, there was a substantial scientific output in 2023. Notably, researchers from Program 3 coordinate the European project “Combatting Bacterial Resistance in Europe” (COMBACTE) as part of the New Drugs 4 Bad Bugs (ND4BB) initiative. Additionally, the ISCIII-funded study “Emergence of OXA-48 Carbapenemase-Producing *Proteus mirabilis*: Clinical Significance and Microbiological Characterization (PROTECOR Study)” also stands out in this area.

### PROJECTS IN COLLABORATION PROGRAM 3

## SCIENTIFIC PROGRAM 4: CANCER (ONCOLOGY AND ONCOHEMATOLOGY)

### » GENERAL GOALS

Cancer remains a leading cause of morbidity and mortality worldwide, with its prevalence and mortality rates continuing to rise. This trend is largely attributable to the aging population, which has contributed to a growing annual incidence of the disease. Despite recent advancements in research that have improved treatment outcomes for certain types of tumors, there remains a critical need for enhanced molecular understanding, as well as more effective prevention and diagnostic strategies for others. In response to these challenges, the overarching aim of Scientific Program 4 is to advance the prevention, diagnosis, and treatment of cancer in a comprehensive manner. The program is particularly focused on pivotal objectives such as the early detection of malignancies, identification of novel therapeutic targets and biomarkers, development of innovative therapies, and optimization of immunotherapy protocols. The integration of artificial intelligence (AI) plays a crucial role in these endeavors, enabling the identification of new patterns in complex datasets, refining diagnostic tools, and personalizing treatment strategies. This strategic focus on leveraging AI and other cutting-edge technologies has enabled the program to secure funding for high-caliber projects through competitive grant processes and has resulted in a significant number of publications in prestigious, high-impact journals.

In 2023, the program successfully achieved its primary objectives, as evidenced by substantial outcomes. These accomplishments were highlighted by the publication of 141 scientific articles, authored either solely by the program or in collaboration with other national and international research groups. Additionally, the program managed 55 active research projects, all of which were secured through competitive calls. Furthermore, the year saw the execution of 171 clinical trials across various phases, each focusing on different types of tumors and therapeutic strategies.

## PROJECTS IN COLLABORATION PROGRAM 4

## SCIENTIFIC PROGRAM 5: CHRONIC AND INFLAMMATORY DISEASES

### » GENERAL GOALS

The increase in life expectancy among the general population has led to a rise in the incidence of chronic and inflammatory diseases. This trend significantly affects the quality of life for those impacted and has important implications for their ability to contribute to society. Additionally, the chronic nature of these conditions results in a considerable portion of healthcare budgets being devoted to their management.

In light of these challenges, our program aims to tackle chronic diseases through three main approaches:

1. Enhancing our understanding of these illnesses by exploring their molecular foundations.
2. Leveraging this knowledge to develop innovative therapeutic strategies aimed at improving patient prognosis and disease management.
3. Creating preventive measures to delay or prevent the onset and progression of these disorders.

Our program aims to create comprehensive clinical and molecular profiles that clarify the development of chronic diseases and their comorbidities. We are deeply committed to developing innovative therapeutic solutions that can be administered safely and effectively for continuous disease management and follow-up care. In 2023, 12 research groups (8 consolidated, 1 emerging, and 3 associated) participated in IMIBIC Program 5.

The program's teams produced a substantial number of basic, clinical, and translational research articles across various subprogram areas. Notably, there was a significant increase in publications included in the top quartile of their fields, reaching 47% of total publications this year. Additionally, the proportion of journals in the top decile within their areas rose to 15% of total publications.

Achieving the program's 2023 objectives was largely due to the launch of numerous research projects at international, national, and regional levels, made possible by competitive funding secured by the participating research groups. Approximately 20% of the published articles resulted from close collaboration across multiple research groups in different subprograms, with crucial contributions from emerging and associated groups.

The high quality of publications largely stemmed from well-established national and international multicenter projects. These initiatives, involving large patient cohorts, enabled the development of new clinical trials, which increased by approximately 13% compared to 2022.

Finally, the application of new technologies and multiomic analyses, supported by bioinformatic tools such as machine learning and artificial intelligence, alongside the use of animal models to explore disease mechanisms and therapeutic responses, significantly advanced research in the field. These efforts support the ultimate objective of implementing a personalized medicine approach.

## » SUB-PROGRAMS

- Cardiovascular diseases
- Diseases of the musculoskeletal system and connective tissue
- Neurological diseases and mental health
- Kidney and urological diseases
- Liver and digestive diseases
- Chronic inflammation and signalling

## » CARDIOVASCULAR DISEASES SUB-PROGRAM IN 2023

**Groups involved:** GC05, GC15, GA09

Highlights of the action plans implemented include:

- **Autoimmune Cardiovascular Mechanisms:** Exploring cardiovascular disease processes and treatments in autoimmune disorders like RA and SLE.
- **Metabolic and Therapeutic Studies in Arthritis:** Investigating metabolic syndrome, insulin resistance, and therapy impacts in RA and PsA.
- **Heart Disease Interventions:** Researching coronary and structural heart treatments, including innovative imaging and procedural techniques.
- **Congenital Heart and Heart Failure Solutions:** Advancing percutaneous treatments for congenital defects and new heart failure therapies.
- **Aortic Stenosis and Inflammation:** Studying immune roles in aortic stenosis and systemic inflammation management.
- **Innovative Therapies and Technologies:** Developing cell and gene therapies, circulatory devices, and remote monitoring technologies.

## » DISEASES OF THE MUSCULOSKELETAL SYSTEM AND CONNECTIVE TISSUE

**Groups involved:** GC05

Action plans implemented:

1. **Autoimmune Disease Mechanisms and Treatments:** Genetic and molecular characterization of systemic autoimmune diseases (Rheumatoid Arthritis, Systemic Lupus Erythematosus and Antiphospholipid syndrome): Analysis of mechanisms underlying the development of organ damage and cardiovascular disease, and identification of biomarkers for response to new therapeutic modalities
2. **Biomarker Identification in Arthritis:** Identifying biomarkers by multimodal approaches (clinic and molecular) to predict responses to biological therapies in RA and Psoriatic Arthritis (PsA).
3. **Spondylarthritis Evaluation:** Analyzing clinical characteristics and biomarkers in spondylarthritis and, utilizing transcriptomic profiling and bioinformatics, to classify these patients and evaluate new therapies.

## » NEUROLOGICAL DISEASES AND MENTAL HEALTH

**Groups involved:** GC28

Among the action plans implemented, the highlights were:

- **Oxidative Stress and Neurodegeneration:** Studying the role of oxidative damage and antioxidant systems in neurodegenerative diseases to develop new therapies and biomarkers for monitoring treatment effectiveness.
- **Transcranial Magnetic Stimulation:** Investigating the therapeutic effects of low-frequency transcranial magnetic stimulation on neuroplasticity, focusing on remyelination and neurogenesis in conditions like Huntington's disease and multiple sclerosis.
- **Nutrition and Health Technology:** Analyzing the impact of diet on neurodegenerative disease progression and evaluating laboratory techniques, including point-of-care testing, for quality control and effective diagnosis.

## » KIDNEY AND UROLOGICAL DISEASES

- **Groups involved:** GC07, GC13, GE06
- The highlights of the action plans implemented included:
- **Cellular Damage and Repair Mechanisms:** Investigating the mechanisms of cellular damage and repair in response to chronic inflammation related to uremia.
- **Chronic Kidney Disease Treatment:** Enhancing treatments for chronic kidney disease and optimizing dialysis as a replacement therapy, with a focus on inflammation and endothelial dysfunction.
- **Vascular Calcification in CKD:** Studying dietary, cellular, and microbiota influences on vascular calcification in chronic kidney disease.
- **Renal Biomarkers and Vascular Health:** Evaluating biomarkers like FGF23 for kidney disease progression and vascular calcification.
- **Bone Disorders in CKD:** Investigating mineral metabolism's impact on bone disease and regeneration in chronic kidney disease.
- **Mineral Metabolism and Vascular Dysfunction:** Exploring the links between mineral metabolism, vascular issues, and the role of nutrition in CKD.

In recent years, an emerging group, **GE06: Physiopathology of Renal and Vascular Damage**, has joined this sub-program, significantly enhancing its scientific and strategic goals while also elevating its quality.

More specifically, this new research group has developed the following action plans:

- **Pharmacological Effects:** Investigating the impact of drug treatments on the development of cardiovascular and renal diseases.
- **Cellular and Molecular Mechanisms:** Studying the cellular and molecular mechanisms involved in the pathogenesis of specific cardiovascular and renal diseases.
- **Imaging and Therapeutic Development:** Utilizing imaging platforms to identify new diagnostic/prognostic molecules for cardiovascular risk and renal damage assessment and developing new therapeutic approaches for clinical application.

## » LIVER AND DIGESTIVE DISEASES

### Groups involved: GC02

Highlighted action plans include

- **Advanced Hepatocarcinoma Treatment:** Research on systemic treatments for advanced-stage hepatocellular carcinoma.
- **Liquid Biopsy for Hepatocarcinoma:** Exploration of liquid biopsy as a technique for surveillance and control of hepatocellular carcinoma.
- **Inflammatory Bowel Disease Biomarkers:** Identification of genetic and molecular biomarkers for inflammatory bowel disease (IBD).
- **Drug De-escalation in Crohn's Disease:** Development of strategies for de-escalating and withdrawing biologic drugs in Crohn's disease patients, along with evaluating the efficacy and safety of new therapies for IBD.
- **Liver Transplantation Strategies:** Research on immunosuppression strategies using mTOR inhibitors and minimizing calcineurin inhibitors, investigation of immune system activation in hepatocarcinoma recurrence post-liver transplantation, and strategies for prioritization of the liver transplant waiting list.

## » CHRONIC INFLAMMATION AND SIGNALLING

### Groups involved: GC29, GA03

Highlights of the action plans implemented were mainly centred on skin and lung diseases:

- **Pathogenesis and Molecular Analysis:** Investigating immunological mechanisms in chronic inflammatory skin diseases using advanced molecular techniques and international collaborations.
- **Clinical Trials and Drug Assessment:** Conducting trials to evaluate new treatments' effectiveness and safety, providing patients with access to emerging therapies.
- **Personalized Medicine and Biomarkers:** Identifying genetic and environmental factors to tailor treatments based on individual patient profiles.
- **Evidence Review and Methodology:** Synthesizing research through systematic reviews and meta-analyses to improve treatment guidelines and address methodological biases.
- **Systemic and Analytical Research:** Exploring nocturnal hypoxemia effects on health and utilizing big data for respiratory disease analysis.
- **Environmental and Lifestyle Approaches:** Investigating air quality impacts and promoting exercise and nutrition for respiratory health management.

Enhancing the work across various subprograms, a transversal group played a crucial role by actively collaborating in the development of multiple subprograms.

### Group GA08: Radiodiagnosis

Research conducted in 2023 focused mainly on:

- **Cardiovascular risk in autoimmune and chronic inflammatory diseases:** Use of carotid echo-doppler (ultrasound) for detection of early atherosclerosis in RA, SLE, APS, PsA and other spondyloarthritis, and its association with therapeutic efficacy.
- **Breast Cancer Screening:** Implementing artificial intelligence to assist in breast cancer diagnosis.
- **Prostate Cancer and Urological Tumors:** Investigating prostate and other urological cancers.
- **Cerebrovascular Pathology:** Studying disorders affecting blood vessels in the brain.
- **Coronary Arteriosclerosis:** Researching coronary artery disease related to arteriosclerosis.

This research activity resulted in numerous articles, stemming from the group's own research projects and collaborations with other IMIBIC groups in the fields of cancer, cardiovascular disease, autoimmune disorders, neurological and kidney disease, supported by funding from the Andalusian Regional Department of Health and the National Health Research Fund.

The background of the entire page is a vibrant, abstract image of a biological specimen, possibly a cross-section of plant tissue. It features a complex arrangement of overlapping, semi-transparent colored layers in shades of red, orange, yellow, green, blue, and purple. These colors represent different cellular components or chemical gradients. The overall texture is organic and cellular.

**PLATFORMS AND  
NETWORKS**

9

IMIBIC researchers are involved in a wide range of strategic initiatives coordinated by the National Institute of Health Carlos III (ISCIII). These include the Thematic Networks for Cooperative Research in Health (*Redes Temáticas de Investigación Cooperativa en Salud*: RETICs) and the Networked Biomedical Research Centers (*Centros de Investigación Biomédica en Red*: CIBERs), among others. IMIBIC is also part of two European research infrastructures (EATRIS & ECRIN) and several other national and international networks.

Of the 48 groups integrated within the IMIBIC, sixteen are involved in 16 different RETICs, fifteen are involved in 8 CIBERs (including the newly created CIBERinfec) and there are 34 groups involved in the Andalusian Plan for Research, Development & Innovation (PAIDI Programme).

## OTHER

IMIBIC is a member of the following national and international networks, platforms and infrastructures:

- ITEMAS ISCIII: Medical Technology Innovation Platform
- SCReN: Clinical Research and Clinical Trials Unit Platform
- EATRIS: European Infrastructure for Translational Medicine Platform
- ECRIN: European Clinical Research Infrastructure Network
- EUROPMP: European network on Pseudomyxoma Peritonei
- VascAgeNet: Network For Research In Vascular Ageing
- TRANSBIONET: Spanish Bioinformatics Network for Clinical Research
- RISA: Animal Health Research Network
- SEPAR: Spanish Society of Pneumology and Thoracic Surgery
- NEUMOSUR: Southern Association for Pulmonology and Thoracic Surgery
- SECT: Spanish Society of Thoracic Surgery
- GETBA: Group for the Study of Bipolar Disorder in Andalusia
- SAMPSP: Andalusian Society of Preventive Medicine and Public Health
- SEMPSPH: Spanish Society of Preventive Medicine and Public Health and Hygiene
- ERA-EDTA: Immunonephrology Working Group. European Renal Association – European Dialysis and Transplant Association
- PSOGI: The Peritoneal Surface Oncology Group International (Lap-CRS+HIPEC registry)
- SEProt: Spanish Society of Proteomics
- GETECCU: Spanish Working Group On Crohn's Disease And Ulcerative Colitis
- COMBACTE-NET: Combatting Bacterial Resistance in Europe – networks
- COMBACTE-CARE: Combatting Bacterial Resistance in Europe – carbapenem-resistance
- APS ACTION. Anti-Phospholipid Syndrome Alliance For Clinical Trials and International Networking
- GEICAM: Spanish Breast Cancer Research Group
- TTD: Digestive Tumour Treatment Group
- GEICO: Spanish Research Group on Ovarian Cancer
- GECP: Spanish Lung Cancer Group
- GEIS: Spanish Sarcoma Research Group
- SOGUG: Spanish Oncology Genito-Urinary Group
- GETNE: Spanish Group of Neuroendocrine and Endocrine Tumours
- ENETS: European Neuroendocrine Tumor Society
- ESE: European Society of Endocrinology: Pituitary and Neuroendocrinology Focus Area
- IARC, WHO: Rare Cancer Genomics
- SEEN: Spanish Society of Endocrinology and Nutrition: Knowledge of Neuroendocrinology Area
- SAEDYN: Andalusian Society of Endocrinology, Diabetes and Nutrition: Knowledge of Neuroendocrinology Area
- NutriEpiGen: Precision Nutrition and Physical Exercise as Modulators of the Epigenome in Diet-related Pathologies
- COST Action: European Cooperation in Science and Technology
- EUTOX: European Uremic Toxin
- GESMD: Spanish Group of Myelodysplastic Syndromes
- COCHRANE Skin group

The background of the entire image is a vibrant, abstract organic pattern. It features flowing, irregular shapes in shades of red, orange, yellow, and blue against a dark, almost black, background. The colors are bright and saturated, creating a sense of depth and movement.

**TRAINING**

**10**

Training is considered a fundamental institutional tool for achieving and improving the scientific objectives of the Institute. Each year, it draws up an extensive programme of events and training activities to promote and deliver quality scientific training to researchers at the Institute, tailored to the different stages of their scientific careers. The programme includes the organisation of an annual program of seminars given by well-known national and international authorities on the latest cutting-edge scientific topics, courses covering concepts related to our current lines of research, as well as practical applications of the latest technologies. Along with these activities, the Institute holds two key training activities: the annual Young Investigators Meeting, aimed at fostering interaction and knowledge exchange among our youngest researchers, and the Maimonides Commemorative Lecture, which includes a lecture given by a leading expert in Biomedicine, and the presentation of awards recognising the work of IMIBIC researchers with leading national and international scientists.

IMIBIC is similarly committed to the generation of talent and runs two postgraduate programmes in collaboration with the University of Córdoba: the Master's degree in Translational Biomedical Research and the PhD programme in Biomedicine. These programmes not only contribute to the professional qualification of students in the field of Biomedical Sciences and to the promotion of teaching, but also attract new scientific talent to the Institute.

**» TRAINING PROGRAM DIRECTOR:**

- Juan Manuel Castellano Rodríguez, PhD.

**» TRAINING OFFICER:**

- David Luna Gómez

## 10.1 TRAINING PROGRAMS

### PHD IN BIOMEDICINE

IMIBIC leads the PhD Programme in Biomedicine at the University of Córdoba. This programme, interdepartmental and multidisciplinary in scope, offers high-quality, advanced training and the development of human resources for teaching and research. In addition to promoting professional qualifications in the field of Biomedical Sciences, it also attracts new scientific talent to the Institute

In 2023, this PhD program was coordinated by Marco A. Calzado Canale

Website: <https://www.uco.es/estudios/idep/doctorado-programas-biomedicina>

### MASTER'S DEGREES

IMIBIC leads the Master's degree in Translational Biomedical Research at the University of Córdoba. This programme has a dual focus: to train students specialising in this area, as well as personnel specialised in the techniques and methodologies of translational biomedical research, enabling them to carry out technical work in support of research in the field of biomedicine and health.

- Academic Director: Prof. Raúl M. Luque Huertas, PhD.
- Academic Co-Director: Prof. Antonio Jesús Martínez Fuentes. PhD.

Website: <https://www.uco.es/estudios/idep/investigacion-biomedica-traslacional>

### COURSES AND WORKSHOPS

Numerous courses, seminars and other training activities in different research areas were held at the IMIBIC during 2023. These can be found in the annexes at the end of this report.

## 10.2 TRAINING ACTIVITIES

### IMIBIC RESEARCH SEMINARS

Regular seminars and research events provide an opportunity to meet renowned national and international speakers covering a wide range of topics in biomedicine. IMIBIC research seminars promote networking and strengthen the knowledge of the Institute's research community. The Institute organises annual seminar series aimed at promoting interaction, sharing ideas, and strengthening links between IMIBIC scientists and recognised scientists from other research institutions. In 2023, a total of 17 external seminars were held.

Furthermore, a fortnightly cycle of intramural seminars, first launched in 2015, also gives young (preferentially postdoctoral) researchers from our Institute an opportunity to present work in progress. In 2023, a total of 5 intramural seminars were held.

## 10.3 INSTITUTIONAL EVENTS

### 14TH IMIBIC YOUNG INVESTIGATOR MEETINGS

IMIBIC Young Investigator Meetings provide an ideal environment for young scientists to enhance their skills and knowledge as well as an interface to foster translational research from basic experimental science to clinical medicine that will improve health and quality of life. The aim of these meetings is to promote inter-disciplinary research and, above all, high-quality training by sharing the results obtained by young researchers at IMIBIC and related institutions, as well as other groups at the University of Cordoba.

More specifically, the aims of IMIBIC Young Investigator Meetings are:

- To provide a platform to discuss the latest knowledge and methods in translational medical research.
- To promote interaction and the exchange of ideas between pre- and postdoctoral scientists and to strengthen links between research groups.
- To facilitate interdisciplinary actions and communication that bring together basic and clinical researchers.
- To encourage and provide high-quality scientific training for young researchers.
- To establish annual IMIBIC Meetings as a young, vibrant forum of reference for the research community and our young researchers in particular.

The 14th Meeting was held in the IMIBIC building on 16-17 October 2023. The programme included sessions representative of IMIBIC Scientific Programmes, as follows:

# 14th IMIBIC YOUNG INVESTIGATORS MEETING

## PROGRAMME

### Day 1 (16th OCT)

**08:30 – 09:00**

**Registration and Poster display**

**09:00 – 09:30**

**Opening ceremony  
(IMIBIC Assembly Hall)**

**09:30 – 10:45**

**Session I. Cancer I  
(IMIBIC Assembly Hall)**

**Chairs:** Dr. Henning Kirst & Dr. Yolanda Jiménez

➔ Ia. 09:30 – 09:45

Metabolic shift underlies tumor progression and immune evasion in S-nitrosoglutathione reductase-deficient cancer. **Ana Mantrana Soldado**

➔ Ib. 09:45 – 10:00

Targeting glycogen synthase kinase 3 as an effective therapeutic strategy against tumor budding and immune evasion in human colorectal cancer. **Carmen Navarrete Sirvent**

➔ Ic. 10:00 – 10:15

B-RAF oncogene regulation by dual-specificity tyrosine-regulated kinase 2. **Miguel Torres Ramos**

➔ Id. 10:15 – 10:30

The splicing machinery represents a targetable vulnerability in bladder cancer. **Antonio Jesús Montero Hidalgo**

➔ Ie. 10:30 – 10:45

Memory Universal CAR T cells: A new strategy against B-cell malignancies.  
**Kristina Pavlovic Pavlovic**

**10:45 – 11:45**

**Coffee Break (IMIBIC Cafeteria)**

**11:45 – 12:45**

**Session II. Multidisciplinary I  
(IMIBIC Assembly Hall)**

**Chairs:** Dr. M<sup>a</sup> Carmen Vázquez & Dr. Fernando Leiva

➔ IIa. 11:45 – 12:00

Circadian rhythm disruption in cardiovascular and trauma severe patients admitted to ICU: Influence of environmental conditions. **Luna López Coletto**

➔ IIb. 12:00 – 12:15

VCE-004.8, a novel PP2A/B55 $\alpha$  activator, promoted angiogenesis and arteriogenesis in critical limb ischemia. **María Eugenia Prados González**

➔ IIc. 12:15 – 12:30

Worsening of Heart Failure with Reduced Ejection Fraction: Impact of the number of previous hospital admissions. **Jorge Perea Armijo**

➔ IID. 12:30 – 12:45

VCE-009.1, a novel formulation of natural products with positive allosteric modulators for CB1R. **Francisco José Ponce Díaz**

**12:45 – 13:45**

**Poster session I (IMIBIC Meeting & Multipurpose Room)**

**Chairs:** Dr. Mario Frías, Dr. Marisol Avendaño & Dr. Iván Arias

**13:45 – 15:45**

**Lunch (IMIBIC Cafeteria)**

**15:45 – 17:00****Session III. Nutrition, Endocrine and metabolic diseases  
(IMIBIC Assembly Hall)****Chairs:** Dr. Lourdes Ladehesa & Dr. María Isabel Martínez+ **IIIa. 15:45 – 16:00**

Analysis of metabolites from the intestinal microbiota and their role as modulators of coronary heart disease as a function of the sex of the patient. **Helena García Fernández**

+ **IIIb. 16:00 – 16:15**

Characterization of a novel molecular mechanism inhibiting the secretory capacity of arcuate Kiss1 neurons in conditions of metabolic stress. **Miguel Ruiz Cruz**

+ **IIIc. 16:15 – 16:30**

Mediterranean diet preserves kidney function in coronary heart disease patients with type 2 diabetes and obesity: An Analysis of the CORDIOPREV Randomized Controlled Trial. **Alicia Podadera Herreros**

+ **IIId. 16:30 – 16:45**

PCSK9 levels and their correlation with the genetic variants present in heterozygous familial hypercholesterolemia. **Alberto Díaz Cáceres**

+ **IIIe. 16:45 – 17:00**

Characterisation of the somatostatin system in chronic liver disease: potential therapeutic role of neuronostatin receptor GPR107. **Antonio García Estrada**

**17:00 – 18:15****Session IV. Multidisciplinary II  
(IMIBIC Assembly Hall)****Chairs:** Dr. Belén Pastor & Dr. André Sarmento+ **IVa. 17:00 – 17:15**

Supervised versus home-based programs in kidney transplant recipients: a non-randomized single-

center prospective trial. **Anna Crepaldi**

+ **IVb. 17:15 – 17:30**

Beneficial effect of recombinant Klotho administration in acute kidney injury associated with intravascular hemolysis. **Mercedes Vallejo Mudarra**

+ **IVc. 17:30 – 17:45**

Magnesium supplementation reduces the development of renal and cardiac fibrosis present in chronic kidney disease: In vivo and in vitro studies. **Teresa Obrero Sojo**

+ **IVd. 17:45 – 18:00**

Characteristics and outcomes of transcatheter mitral valve edge to edge repair according to mitral etiology. **Luis Carlos Maestre Luque**

+ **IVe. 18:00 – 18:15**

High levels of FGF23 induce experimental hypertension and vascular remodeling. **Raquel María García Sáez**

**Day 2 (17th OCT)****08:00 – 08:30****Registration and Poster display****08:30 – 09:45****Session V. Cancer II  
(IMIBIC Assembly Hall)****Chairs:** Dr. Cristian Rodelo Haad & Dr. Silvia León+ **Va. 08:30 – 08:45**

High-Throughput Sequencing reveals recurrent mutations in RNUs in pancreatic tumors. **Clara González Pérez**

+ **Vb. 08:45 – 09:00**

Prospective feasibility study of localization of lung nodules for sublobar VATS resections by using a novel Computed Tomography (CT) -

guided radiopharmaceutical labelling system. **Alba María Fernández González**

- ➔ **Vc.** 09:00 – 09:15  
Liquid biopsy-based epigenetic biomarkers for prognosis and monitoring of metastatic pancreatic cancer. **Pablo Francisco Cano Ramírez**
- ➔ **Vd.** 09:15 – 09:30  
Clinical, transcriptomic, and functional characterization of telomerase/shelterin system in endocrine intracranial tumors. **Ana S. de la Rosa Herencia**
- ➔ **Ve.** 09:30 – 09:45  
Deciphering the mechanisms of somatostatin analogue resistance in pheochromocytomas and paragangliomas. **Víctor García Vioque**

#### 09:45 – 10:30

**Coffee Break (IMIBIC Cafeteria)**

#### 10:30 – 11:30

**Poster sesión II (IMIBIC Meeting & Multipurpose Room)**

Chairs: Dr. Mario Frías, Dr. Marisol Avendaño & Dr. Iván Arias

#### 11:30 – 12:45

**Session VI. Infectious and immunological diseases (IMIBIC Assembly Hall)**

Chairs: Dr. Ignacio Gómez & Dr. Antonio Romero

- ➔ **VIa.** 11:30 – 11:45  
SARS-CoV-2 accessory proteins induce mitochondrial dysfunction and impair cellular metabolism. **Raúl Fernández Rodríguez.**
- ➔ **VIb.** 11:45 – 12:00  
Clinical factors and the role of bacterial load in long-term eradication of intestinal colonization by KPC-producing Klebsiella pneumoniae in an endemic nosocomial setting:

results from a prospective observational study (KLEBCOM). **Alejandra Méndez Natera**

- ➔ **VIc.** 12:00 – 12:15  
Prevalence and Factors Associated with Multimorbidity in Patients with Rheumatoid Arthritis. Data from the Cordobesian Rheumatoid Arthritis Registry. **Santiago Dans Caballero.**
- ➔ **VID.** 12:15 – 12:30  
Early postoperative complications of lung transplantation. **Patricia Victoria Childers Canduela.**
- ➔ **VIe.** 12:30 – 12:45  
Genomic epidemiology study of hospital-acquired, community-acquired and healthcare-related KPC-producing Klebsiella pneumoniae infections at Reina Sofía University Hospital reveals clonal dissemination of ST512/KPC-3 high-risk clone over a 10-year period (KLEBMAN study). **Víctor Gálvez Soto.**

#### 12:45 – 14:00

**Plenary Lecture: "Towards tailored antitumor T-cell therapies". Dr. Alena Gros Vidal (Vall d'Hebron Research Institute).**

#### 14:00 – 14:30

**Awards and Closing ceremony.**

This edition consisted of 8 sessions (2 on cancer, 2 on Multidisciplinary, 1 on Nutrition, Endocrine and metabolic diseases, 1 on Infectious and immunological diseases and 2 poster sessions) and two presentation formats: lectures and poster talks. A total of 107 papers were received and the number of registered attendees was 177.

## 12TH MAIMONIDES COMMEMORATIVE LECTURE AND IMIBIC AWARDS

The aim of this initiative is to recognise the biomedical research carried out by IMIBIC staff and to highlight the importance of the results obtained at the Institute.

The 2023 “Enrique Aguilar Benítez de Lugo” award for the most relevant experimental publication led by IMIBIC was granted to the consolidated research group “GC10 Hormonal Regulation of Energy Balance, Puberty and Reproduction” (doi: 10.1038/s41467-022-32347-4), while the 2023 “Enrique Aguilar Benítez de Lugo” award for the best scientific publication of the year led by IMIBIC was granted to the consolidated research group “GC09 Nutrigenomics. Metabolic Syndrome” (doi: 10.1016/S0140-6736(22)00122-2).

The award for the best clinical research work went to Consolidated Group GC03 “Infectious Diseases” (doi: 10.1093/cid/ciab574).

Each year, an outstanding biomedical scientist is invited to present the “Maimónides Lecture”, which focusses on the latest knowledge in basic, applied, and/or translational biomedical science of excellence. In 2023, the guest speaker was Dr. Eduard Vieta, head of psychiatry and psychology at the Hospital Clinic (Barcelona) and professor of psychiatry at the University of Barcelona.

## 10.4 RESULTS OF TRAINING ACTIVITIES

### DOCTORAL THESES

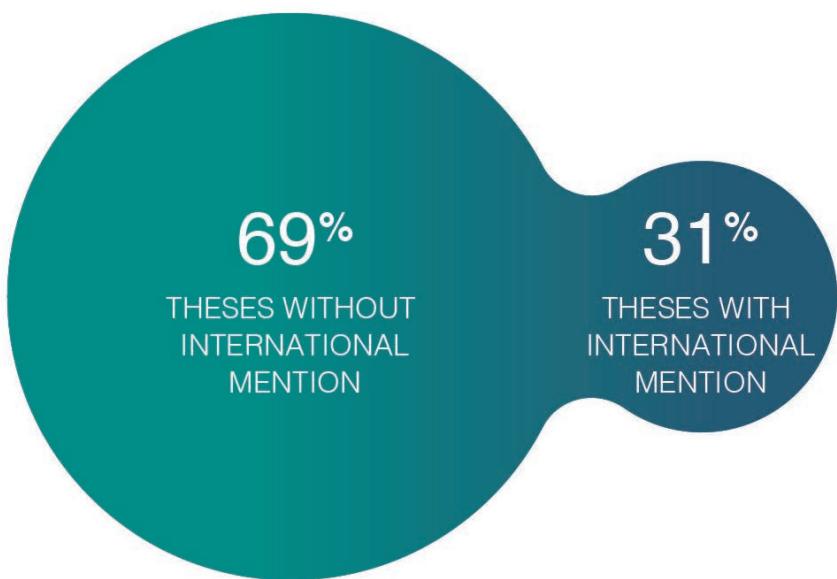

THESES PRESENTED - ACADEMIC YEAR 2022/2023

IMIBIC Group	PhD student	Thesis Title
GE10 Clinical and Epidemiological Research in Primary Care (GICEAP)	Muñoz Alcaraz, María de las Nieves	Efficacy and efficiency of a new therapeutic approach based on activityorientated proprioceptive antiedema therapy (TAPA) for edema reduction and improved occupational performance in the rehabilitation of breast cancerrelated arm lymphedema in women: a controlled, randomized clinical trial.
GC28 Neuroplasticity and Oxidative Stress	Gómez Melero, Sara	Development of therapeutic antibodies against the human CCR6 receptor
GC06 New Therapies in Cancer	Ortiz Morales, María José	Antiangiogenic therapy in metastatic colorectal cancer: identification of biomarkers
GC09 Nutrigenomics. Metabolic Syndrome	Santos Marcos, José Antonio	Differences between the gut microbiota of men and women and their relationship to the prevalence of developing metabolic diseases
GC03 Infectious Diseases; GC24 Clinical and Molecular Microbiology	Cano Yuste, Ángela María	Risks of infection and mortality among patients colonized with KPC-producing <i>Klebsiella pneumoniae</i> : Validation of scores and proposal for management
GE08 Comprenhesive Nursing Care. Multidisciplinary Perspective	López Cerdá, Elena	ENRED@TE. Social support in south of spain. intervention study
GC03 Infectious Diseases; GC24 Clinical and Molecular Microbiology	Páez Vega , Aurora María	Clinical trial to stop valganciclovir prophylaxis in CMV-seropositive renal transplant patients who maintain CD8+ CMV-specific cellular immunity after receiving thymoglobulin
GC15 Cardiovascular Diseases	González Manzanares, Rafael	Late anthracycline induced cardiotoxicity in survivors of childhood acute lymphoblastic leukemia
GE08 Comprenhesive Nursing Care. Multidisciplinary Perspective	Cubero Luna, Ana María	Obstetric and neonatal outcomes of trial of labor after prior cesarean section
GC28 Neuroplasticity and Oxidative Stress	Alfonso Pérez, Gerardo	Bioinformatic approaches for identification of epigenetic profiles in neuropathology processes
GC11 Metabolism and Adipocyte Differentiation-Metabolic Syndrome	Navarro Ruiz, María del Carmen	Identification of biomarkers of adipose tissue dysfunction in insulin resistance conditions
GC12 Clinical and Epidemiological Research in Primary Care (GICEAP)	Jiménez Mérida, María del Rocío	Effectiveness of workplace health promotion on workers' health: systematic review and meta-analysis

IMIBIC Group	PhD student	Thesis Title
GC04 Inflammation and Cancer	Correa Sáez, Alejandro	Regulation of post-translational modifications with pharmacological intervention: autoimmune diseases and cancer
GC09 Nutrigenomics. Metabolic Syndrome	Martín Piedra, Laura	Medium-term evolution of metabolic risk phenotypes in cardiovascular patients after dietary intervention: mediterranean diet or low-fat diet (cordioprev study)
GA05 Study of Growth. Endocrinology and Child Nutrition	Valle Martos, Rosario	Uric acid and liver function markers relevance in metabolic syndrome, endothelial dysfunction and inflammation, in response to the treatment of childhood obesity
GC15 Cardiovascular Diseases	Martín Dorado, Ernesto	Benefit of canagliflozin in patients with type 2 diabetes after hospitalization for acute heart failure
GC02 Liver and digestive diseases	Guerrero Misas, Marta	Impact of mTOR pathway inhibition in liver transplant candidates with hepatocellular carcinoma
GC09 Nutrigenomics. Metabolic Syndrome	Romero Cabrera, Juan Luis	Assessment of cardiovascular risk in patients with disruption of circadian rhythm on secondary prevention and following a dietary intervention (mediterranean diet or low-fat diet)
GC09 Nutrigenomics. Metabolic Syndrome	Millán Orge, Marta	Prediction of cardiovascular disease in coronary patients by a clinical event recurrence score and the influence of diet. Cordioprev study
GC09 Nutrigenomics. Metabolic Syndrome	Pérez Cardelo, María Magdalena	Dietary strategies in the management of type 2 diabetes in patients with coronary heart disease: from the cordioprev study
GC07 Nephrology. Cell Damage in Chronic Inflammation	Sánchez-Agesta Martínez, Marina	New diagnostic and therapeutic approaches in extracapilar glomerulonephritis
GC05 Systemic and chronic inflammatory autoimmune diseases of the locomotor system and connective tissue	Pérez Sánchez, Laura	Characterisation of the atherothrombotic risk in patients with antiphospholipid syndrome by transcriptomic analyses
GC15 Cardiovascular Diseases	Rodríguez Diego, Sara	The role of two-dimensional speckle-tracking echocardiography in non-invasive diagnosis of asymptomatic acute cellular rejection in heart transplant recipients

## THESES PRESENTED: 2022/2023 ACADEMIC YEAR

## RESEARCH STAYS

IMIBIC is committed to promoting stays for the training of its PhD students at national and international reference centres in biomedical research, providing opportunities to experience research in foreign settings, facilitating the integration of graduates into the scientific community, and creating networks. In fact, the Institute's "Plan Propio" includes actions to promote these stays.

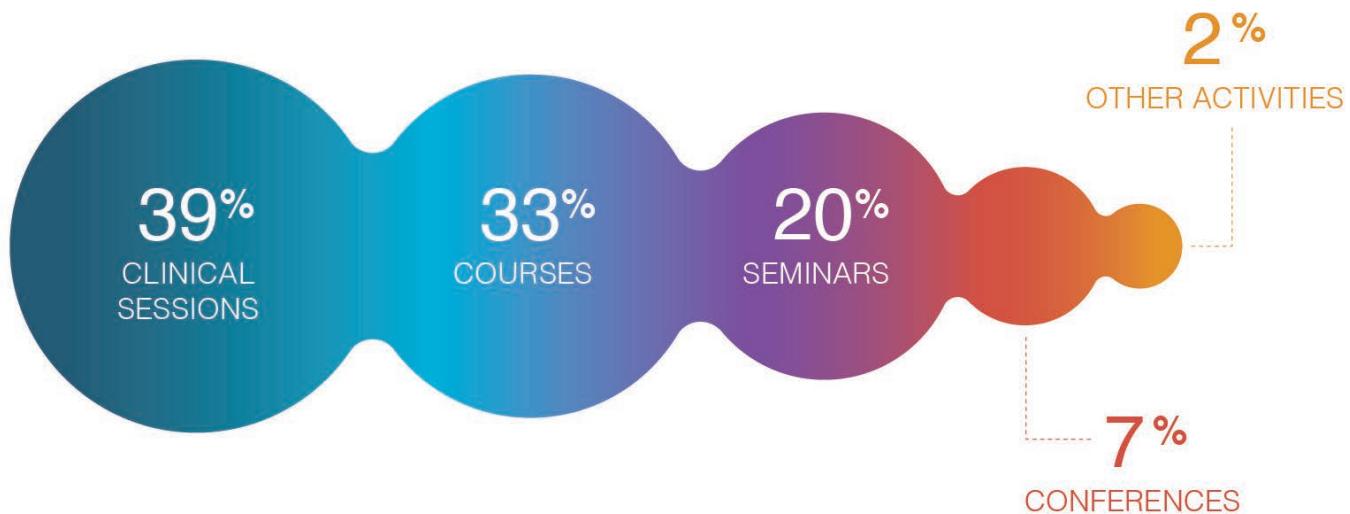

Twenty-four researchers from the IMIBIC completed a research stay at a national or international centre in 2023. Eight of these were students of the PhD programme in Biomedicine, who will therefore be able to opt for the "International Doctorate" mention.

External visitors are also invited to carry out their research at our Institute. A total of seven visiting scientists stayed at IMIBIC during 2023.

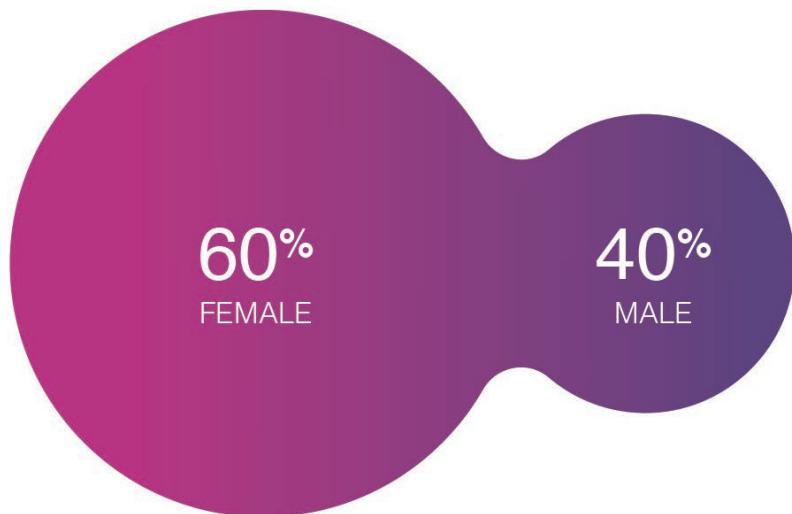

## TRAINING ATTENDANCE IN 2023

The total number of participants in all training activities held at IMIBIC in 2023, including courses, conferences, seminars and other activities, was 852. Participants were predominantly women.

## TRAINING ACTIVITIES BY TYPE:

## PARTICIPATION IN TRAINING ACTIVITIES:

INNOVATION AND  
TECHNOLOGY  
TRANSFER

11

The main objective of the Innovation and Technology Transfer Plan is to strengthen IMIBIC's existing capabilities in order to create a favourable ecosystem to support innovation and translation to the Spanish National Health System. The more specific aims are to promote and increase effective transfer with an impact on the National Health System and society, to encourage transfers to the productive sector, to promote public-private collaboration, and to guarantee the sustainability and quality of the Innovation and Transfer unit and Technological Innovation unit. Both units work in close collaboration to transform the ideas of the IMIBIC inventors into minimum viable products, scaling these ideas in the innovation TRLs.

The indicators implemented by the IMIBIC Innovation and Transfer Unit are as follows:

- Knowledge transfer towards the productive sector.
- Development of new healthcare products.
- Patent registration and licensing.
- Implementation of new clinical processes.
- Creation of spin-offs and start-ups.
- Clinical Practice Guidelines.

These indicators were integrated into the Innovation and Technology Transfer Plan (2021-2025) as an example of full alignment with European, national and regional policies.

As a result of the actions carried out in 2023, 12 patents or intellectual property registrations were requested. 6 prototypes/developments have been carried out with the support of the Technological Innovation Unit. In addition, we have collaborated with the Technological Innovation Unit to promote the services offered by both units and to establish synergies with the research groups and the different Clinical Management Units of the Hospital. These services include the development of CRDs, design and development of devices, development of software applications, etc...

In accordance with the Innovation and Technology Transfer Plan, contacts continue to be made with companies to establish collaborations or service agreements with companies for the development of innovations or validation of their technologies, having contacted more than 28 companies. In this sense, it is worth mentioning the application for 3 projects in collaboration with companies, 2 of which have been awarded in the call of the State Research Agency (public-private modality). Although the total funding raised by the consortia was 3.5 million euros, around 500 thousand euros will be managed by the Institute. Likewise, in the Carlos III Health Institute (ISCIII)-CDTI call for proposals, IMIBIC is participating in a consortium of almost 680,000 €, of which approximately 145,000 € will be managed by IMIBIC.

With respect to the creation of companies, the Innovation and Technology Transfer Unit has provided regulatory, business and market advice to researchers interested in the possible creation of a spin-off company. It is expected that in the future it will be possible to set up companies.

The funding obtained through the ISCIII in its call for Strategic Action in Health in 2023 for the implementation of innovation projects has been €203,700. The funds will be used, on the one hand, to develop a personalized diagnostic and prognostic tool with potential therapeutic impact in malignant brain tumors and, on the other hand, for the validation of a decision model in alopecia areata that will integrate biomarkers and health outcomes in real life.

During the year 2023, the first Biotechnological Hackathon of Andalusia was held in coordination with the Escuela Politécnica Superior de Córdoba (EPSC), which was possible thanks to the co-funding obtained by the IMDEEC call. Given the success obtained with the initiative, we applied again in the ESAL 2023 call, which was granted, allowing, therefore, the organization of the second edition of the Biotechnological Hackathon of Andalusia in the year 2024.

In December 2023, the second internal call for "IMIBIC Innovation Awards 2023" was launched for an amount of €30,000, which is expected to be well received by the research staff.

In 2023, the *Córdoba BIOTECH* Incubator was officially launched. Within the scope of the Incubator, the researchers and entrepreneurs incubated in BIOTECH acquired new skills to transform their business ideas into successful projects. At the same time, these conferences have allowed our researcher/entrepreneur staff to acquire knowledge about team management, economic and regulatory management, sales, the importance of industrial and intellectual property protection, communication and leadership... Finally, an aid program was also developed to offer services to incubatees to advance business development strategies.

In November 2023, the Entrepreneurship, Business Development and Attraction Fair took place where around 50 start-ups from the health and biotechnology fields and our research and innovation groups were able to present their lines of business, services and innovations in order to explore possible avenues of collaboration. In addition, the companies located in the *Córdoba BIOTECH* Incubator, funding agencies and pharmaceutical industries attended the event.

The Innovation Unit once again obtained funding from the call for Innovation Platforms in Medical and Health Technologies of the ISCIII, thanks to which it has been able to continue with the resources previously obtained, allowing it to maintain the level of quality of the services offered by the Unit.

The IMIBIC Innovation Unit also successfully passed the audit that evaluates the Quality Management System, in accordance with the UNE 166.002:2021 standard, implemented for years at IMBIC, obtaining the renewal of its certification.

## EVOLUTION OF RESULTS

	2016	2017	2018	2019	2020	2021	2022	2023
PATENTS	9	16	13	11	5	17	5	9
Utility Model				2	6	1	1	
Intellectual property registry				1	3	1	4	2
PCTs	6	6	3	9	2	5	3	1
LICENCES		2	2		1	3	5	
COMPANIES							1	

Finally, 22 confidentiality agreements and 14 collaboration/service agreements were signed with companies in 2023.

## 12.1 ISOTOPE AND PRECLINICAL IMAGING UNIT

### STAFF

**Eduardo Muñoz Blanco, PhD**

Supervisor

**Miguel Ángel Rodríguez Martín**

Technician

### BRIEF DESCRIPTION

The Preclinical Imaging Service (SIP) is a highly advanced facility which provides non-invasive, *in vivo* imaging of the structure and function of body organs and tissues in preclinical animal models.

The equipment is located in the IMIBIC animal facility, which has modern premises of approximately 800 m<sup>2</sup> and capacity for housing and experimental management of >3,500 rodents. It is ideally situated to provide interdisciplinary support in cardiovascular biology, oncology, neuroscience and physiology, among others.

The main purpose of this department is to supply high-quality imaging support to the rest of the research groups in IMIBIC.

## EQUIPMENT AND FACILITIES

### » ISOTOPE UNIT

The unit has two laboratories dedicated to working with both  $\gamma$  and  $\beta$  radioactive isotopes. One is located on floor -2 and the other on the third floor.

The unit has been authorized by the Nuclear Safety Council since December 2014 to work with the following isotopes:

ISOTOPES	MAXIMUM ACTIVITY (MBq)
Carbon (C-14)	370
Tritium (H-3)	370
Phosphorus (P-32)	370
Phosphorus (P-33)	370
Sulfur (S-35)	370
Chrome (Cr-51)	370
Iodine (I-125)	370

### » EQUIPMENT

- Gamma Counters. 3 units:
  - Make: Wizard
  - Model: 2470-0100 Beta counter
- UN Beta Counter.1 unit:
  - Make: Tricard
  - Model: 2810 TR
- Microbeta Counter.1 unit:
  - Make: Microbeta2
  - Model: 2450-0020
- Harvester cell
- A sample preparer
  - Make: Janus
- Two refrigerated ultracentrifuges with capacity for 200 samples.
- Three gas cabinets exclusively for working with radioactive isotopes, two with a lead and one with a methacrylate guillotine.
- Two radiation detectors:
  - Make: Lamse
  - Model: RM10013-RDM

### » PRECLINICAL IMAGING UNIT

• **PET / MR 3T** is the only combined magnetic resonance and PET equipment available nationwide. The PET equipment is based on highly sensitive, continuous LYSO crystal technology with 2 rings with 8 detectors that can provide 80 mm (transaxial) X 148 mm (axial) fields of view, up to 285 mm (axial) by moving the bed, with MRI-compatible silicon photomultipliers, sensitivity of 5%, up to 9% (NEMA standard) and sub-millimetre resolution ( $\leq 0.7$  mm); The MRI equipment is 3 Tesla and 18 cm magnet with cryogen free technology, without the need for a cooling line, with magnet homogeneity of  $\pm 0.1$  ppm (DSV 5 cm) and  $\pm 0.05$  ppm (DSV 3.5 cm), necessary to work with diffusion sequences and localized spectroscopy with a gradient system capable of providing 450 mT / m.

The PET / MR displays an automatic positioning system for the animal in both the PET and MRI modalities, and a touch screen with integrated camera to facilitate positioning and monitoring.

This equipment was installed in June 2018 and will be available for use after an appropriate set-up procedure which will be done in the near future.

•  **$\mu$ CT (SkyScan 1176 model)** is an X-ray tomography system (90 kV source) allowing 3D spatial resolution of less than 10  $\mu$ m, and a respiratory gating system for prospective or retrospective extraction of respiratory movements during emission of the image. The system features a 12-bit, distortion-corrected 11-megapixel refrigerated X-ray chamber (4000x2670) with fibre-optic coupled scintillator.

Full-body scanning capability of rats and mice: scan diameter of 68mm or 35mm, scanning length up to 200mm by multiple automatic connected scanners. This  $\mu$ CT equipment can carry out longitudinal tests with less than 10mG radiation exposure, as well as coregistration of PET or MRI images.

## MAIN SERVICES

- Training in the handling of  $\beta$  and  $\gamma$  counters.
- Labelling of proteins with I-125.
- Identification of protein levels in serum, plasma and other biofluids using the RIA technique.
- In situ hybridization (ISH) with P-33 labelled probes.
- Radioactive techniques for analysis of cell death and proliferation.
- Consultation regarding the different isotopic techniques that are employed in the laboratory.
- Optimization of protocols.
- To advise on experimental design, selection of equipment and supervision of procedures.
- To advise during data acquisition and imaging procedures using MRI, microCT and PET.

## » SPECIFIC APPLICATIONS:

### • MRI Applications:

- Structural analysis of soft tissues and body composition (compartmentalization).
- Analysis of structures by diffusion (diffusion-weighted imaging).
- Analysis of metabolic composition by spectroscopy.
- Analysis of brain activity using fMRI.

### • MicroCT Applications:

- Structural analysis.

### • PET Applications:

- Analysis of metabolic activity (normal and tumour tissue).

The infrastructure necessary to house PET-MR and MicroCT preclinical imaging systems within the Animal Experimentation Unit was designed in collaboration with the Radiological Protection Service of the University of Córdoba and the Diagnostic Radiology and Nuclear Medicine Unit of the hospital. This work was carried out in order to define the optimal equipment and workflows prior to bidding for the equipment.

### BRIEF DESCRIPTION

The IMIBIC Animal Experimentation facilities are part of the SAEX of the University of Cordoba. The aim of this service is to provide the biomedical community, other public research centres and private companies with the animals, facilities, equipment, materials and specialized personnel necessary to carry out research projects and/or teaching tasks that require the use of animal models. The fundamental objective of the animalarium service is to guarantee the maintenance and well-being of the animals, as well as to offer different techniques for their study, given the range of equipment available in our unit. This IMIBIC service is intended for the breeding, housing and use of laboratory animals (rats and mice), as well as for pig experimentation. Its facilities and personnel comply with current Spanish and European legislation (Directive 2010/63/EU, European Commission Recommendation 2007/526/EC, Spanish Royal Decree 53/2013 and Order ECC/566/2015 of the Spanish Ministry of Economy and Competitiveness).

The IMIBIC animal experimentation unit facilities, coordinated by the Animal Experimentation Service of the University of Córdoba, were opened in 2017.

## EQUIPMENT AND FACILITIES

The unit comprises:

- 7 rooms for housing rodents, one of them with a replacement cabinet.
- 1 healing / metabolism room: This room has a respirometry system (with capacity for 10 animals), two racks for metabolic cages and optogenetic and quantitative analysis equipment.
- 4 multi-purpose rooms for experimental procedures with animals: two rooms for use on rats (the preclinical imaging computers are located in one of them) and two for use on mice. The rooms are equipped with 2 gas extraction cabinets, analytical scales and other basic laboratory material.
- Operating Room: Suitable for surgery on rodents and larger animals (rodents and pigs), equipped with 1 3D laparoscopy tower, 7 TV video monitors, 1 large animal anaesthesia machines, 6 surgery tables, 2 rodent anaesthesia systems with 4 seats, 6 gas towers, 1 surgical microscope for large animals, 1 high-end ultrasound, 2 magnifying glasses, 1 microscope, equipment for body composition MRI and a 1 C-arm.
- Quarantine Zone: 5 ventilated racks for rats / mice, 2 replacement cabinets and 1 triple gate SAS system.
- 1 large animal (pig) room: 6 transport cages and 1 isolation cage.
- Laboratory 1: has micro-CT/PET/MR for rodents, as well as a gamma library, a ventilated cabinet for 6 animals and an anaesthesia machine.

## 12.3 FLOW CYTOMETRY AND ADVANCED OPTICAL MICROSCOPY UNIT

### 12.3.1 FLOW CYTOMETRY

### STAFF

#### **Esther Peralbo Santaella, PhD**

Head of Unit and Flow Cytometry Technical Specialist- Competitive contract from Programme for Linking Technicians to Common Research Support Structures; Funding Agency: Andalusian Health Service, Junta de Andalucía; Reference: S.A. 0008/22.

#### **María García Cruz**

Laboratory technician. Contract from INVESTIGO Programme; Funding Agency: Regional Ministry of Employment, Business and Self-Employment, Junta de Andalucía. 2022.

### BRIEF DESCRIPTION

The mission of the Unit is to offer access to high performance equipment that covers a broad spectrum of applications in the field of Flow Cytometry to IMIBIC and hospital setting researchers, and to other public institutions and private sector, as well as to provide technical expertise and training. The Unit also provides scientific-technical advice on experimental design, sample preparation, Cytometry data analysis and interpretation of results.

## EQUIPMENT AND FACILITIES

### Analysers:

- » **BD LSRLFortessa SORP**: 5 lasers (355, 405, 488, 561 and 640 nm) and capable of analysing up to 18 fluorescence parameters + FSC/SSC. Filter for violet SSC.
- » **BD FACSCanto II**: 3 lasers (405 nm, 488 nm and 633 nm) and capable of analysing 8 fluorescence parameters + FSC/SSC. Multi-tube Carousel Loader (up to 40 tubes). Filter for violet SSC.
- » **BD FACSCalibur**: 1 laser (488 nm). Capable of analysing 3 fluorescence parameters + FSC/SSC.

### Cell sorter:

- » **BD FACSaria III**: 3 lasers (407, 488 and 633 nm) and capable of analysing 13 parameters simultaneously (11 fluorescence parameters + FSC/SSC). Four-way and single-cell sorting capabilities. Collection of sorted cells: into tubes, onto plates or slides. Temperature control. Aerosol Management Option (AMO).

### Others:

- » PC workstation with **BD FlowJo v.10** flow cytometry analysis software (dongle license).

## MAIN SERVICES

- Self-use (Operator-unassisted) of flow cytometry analysers (only for IMIBIC users properly trained by us to use the equipment).
- Operator-assisted use of the analysers on demand.
- Cell sorting: only provided as an operator-assisted service.
- Flow Cytometry data analysis on demand. The unit also offers registered users access to PC workstation with BD FlowJo data analysis software.
- Advice on experimental and multicolor panel design, sample preparation methods, interpretation and presentation of data, and writing of the “material and methods” section of Flow Cytometry.
- Developing/implementing Flow Cytometry assays/applications responding to the user needs.

## KEY FACTS

In 2023, the number of Unit staff was increased with the addition of a new laboratory technician.

NUMBER OF IMIBIC USERS: **28 (11 RESEARCH GROUPS)**

NUMBER OF EXTERNAL USERS: **3 (2 EXTERNAL CENTRES)**

NUMBER OF SUPPORTED INTERNAL PROJECTS: **23**

COURSES AND TRAINING SESSIONS: **3**

QUALITY CERTIFICATES: **ISO 9001:2015 standard for the Quality Management System**

## COURSES AND WORKSHOPS

1. Course: “Fundamentos y Aplicaciones Biomédicas de la Citometría de flujo. 3<sup>a</sup> Ed.”. Training activity accredited by the Andalusian Agency for Healthcare Quality-ACSA (1,32 credits), and linked to Biomedicine PhD Program Training Plan at the University of Cordoba. 6<sup>th</sup>, 7<sup>th</sup> and 8<sup>th</sup> November.
2. Workshop: “Diseño de Paneles Multicolor en Citometria de Flujo”; Becton Dickinson (BD). 7<sup>th</sup> March.
3. Seminar: “Seminario avanzado en el manejo del software de análisis para Citometría de Flujo BD FlowJo™ - High Dimensional”; Becton Dickinson (BD). 17<sup>th</sup> April.

## 12.3.2 ADVANCED OPTICAL MICROSCOPY UNIT

### STAFF

#### Gema García Jurado, PhD

Head of Unit. Microscopy Technical Specialist– Contract, ISCIII Biobanks and Biomodels Platform. PT20/00079.

#### Alvaro Carrasco Carmona, PhD

Senior Microscopy Technical Specialist – Contract, Investigo Programe (2021-C23.I01.P03.S0020-0000004).

### BRIEF DESCRIPTION

The Advanced Optical Microscopy Unit of IMIBIC offers IMIBIC researchers and to both public and used in biomedical research.

The aim of the service is to provide comprehensive support to researchers as well as to provide scientific and technical advice and support on experimental design, sample preparation, image processing-analysis and data interpretation.

### EQUIPMENT AND FACILITIES

#### » EQUIPPED WITH:

- » **Zeiss LSM 710 Spectral Confocal Laser Scanning Microscope:** inverted motorized stand. 7 laser lines: 405, 458, 488, 514, 543, 594 and 633 nm. Scanning module with 3 spectral R/FL detection channels (PMTs) and 1 transmitted-light channel (PMT). Integrated large incubation chamber.
- » **Leica THUNDER Imager 3D assay:** Motorized inverted microscope and software with THUNDER Computational Clearing. 4 Filter cubes for DAPI, FITC, Rhod and Cy5. Illumination: epifluorescence, brightfield and phase contrast.
- » **Zeiss PALM MicroBean. Laser Microdissection:** one excitation laser line (355nm) fully motorized, with high precision cutting and catapulting, and “cap check” system. Transmitted light techniques (bright field, phase contrast), 4 filter cubes for DAPI, FITC, Red and Cy5.
- » **Zeiss Axio Vert.A1** inverted **fluorescence** microscope. Illumination: brightfield and epifluorescence. Filter cubes for DAPI, FITC and Cy3. Digital monochrome CCD camera.
- » **Leica DM2000 LED** Upright microscope with LED **transmitted light** illumination. Digital camera color HD.
- » **NikonEclipse Ti-S** inverted microscope with Illumination: brightfield and contrast phase. Digital camera color.
- » **Image Analysis Workstation:** AIVIA CellBio, FIJI, LAS X, Zen Blue, QuPath, CellPose.

## » APPLICATIONS

The main applications carried out at the Area include:

- Laser Scanning Confocal Microscopy
- Automated Wide-Field Microscopy
- High content screening
- Live 3D imaging
- On-line computational clearing
- Laser cutting
- Spectral imaging and linear unmixing
- Image processing and analysis

## MAIN SERVICES

- Self-use (Operator-unassisted) of microscopy equipment.
- Operator-assisted use of the instruments.
- Processing and analysis of Image.
- Advice and support on experimental design, sample preparation methods, image interpretation and results presentation.
- Developing/implementing microscopy assays/applications, and image analysis tools responding to the user needs.

## KEY FACTS

NUMBER OF IMIBIC USERS: **80 (19 RESEARCH GROUPS)**

NUMBER OF EXTERNAL USERS: **2 (UNIVERSITY OF CORDOBA)**

NUMBER OF INTERNAL PROJECTS SUPPORTED: **42**

COURSES AND TRAINING SESSIONS: **30**

NEW INTERNAL SERVICES: **6**

## FEATURED ARTICLES

A total of 15 scientific articles using data generated from the Unit were published during 2023. Articles with co-authorship and those for which the Unit support has been acknowledged are detailed below:

1. Mena-Osuna R, Mantrana A, Guil-Luna S, Sánchez-Montero MT, Navarrete-Sirvent C, Morales-Ruiz T, Rivas-Crespo A, Toledano-Fonseca M, García-Ortíz MV, **García-Jurado G**, Gómez-España MA, González-Fernández R, Villar C, Medina-Fernández FJ, Villalba JM, Aranda E, Rodríguez-Ariza A. **Metabolic shift underlies tumor progression and immune evasion in S-nitrosoglutathione reductase-deficient cancer**. ## COURSES AND WORKSHOPS

30 specific training for research groups in the use of microscopy equipment, technical applications and image analysis related to Unit equipment.

## 12.4 IMIBIC MASS SPECTROMETRY AND MOLECULAR IMAGING UNIT (IMSMI)

## STAFF

### Eduardo Chicano Gálvez, PhD

Core Facility Coordinator.

Mass Spectrometry Specialist: LC-MS, MS Imaging. Bioinformatics and data analysis.

- Recipient of a competitive contract under the “Programme for Linking Technicians to Common Research Support Structures” call for proposals; Funding Agency: ANDALUSIAN HEALTH SERVICE; Reference: RF2-0003-2020.

### Ángela Peralbo Molina, PhD

Mass Spectrometry Specialist (Lipidomics and metabolomics)

- Recipient of a competitive contract under the “Programme for Linking Technicians to Common Research Support Structures” call for proposals; Funding Agency: ANDALUSIAN HEALTH SERVICE; Reference: RF2-0013-2022

### Cristina María López Vázquez, PhD

Mass Spectrometry Junior Specialist

- Recipient of a contract under the “Investigo Programme call”; Funding Agency: Ministry of Work and Social Economy; Reference: 2021-C23.I01.P03.S0020-0000004.

## BRIEF DESCRIPTION

IMIBIC's Mass Spectrometry and Molecular Imaging Unit (IMSMI) provides highly specialised support in the latest mass spectrometry techniques available to researchers and users who require it. This Unit specialises in offering services in three of the major omics, such as Proteomics, Lipidomics and Metabolomics. It is also highly specialised in Molecular Imaging (MS Imaging).

The IMSMI Unit provides researchers with state-of-the-art technologies in the field and offers its services to IMIBIC research groups, as well as to the University of Cordoba, Reina Sofia University Hospital, other universities, hospitals, and private sector companies.

This Unit has four main lines of work:

- i) Clinical Proteomics line consisting of high-performance liquid chromatography (Evosep-One) coupled with mass spectrometry (LC-MS/MS). It provides researchers and users with access to label-free quantitative clinical proteomic analysis in liquids (DDA, DIA-PASEF and PRM-PASEF). Studies that can be developed range from small pilot experiments and small populations to large experiments with hundreds of samples requiring superior speed and quality.
- ii) Lipidomics line consisting of ultra-high performance liquid chromatography coupled with mass spectrometry (LC-MS/MS). It provides a service for the identification and quantification of lipid species in samples in a targeted or untargeted manner at high resolution.
- iii) Metabolomics line consisting of ultra-high performance liquid chromatography coupled with mass spectrometry (LC-MS/MS). It offers a service for the identification and quantification of metabolites in samples in a targeted or untargeted manner at high resolution.
- iv) Molecular Imaging (MS Imaging), which provides researchers and users with spatial information about metabolites, lipids, proteins/peptides directly from tissues and biopsy specimens.

The IMSMI Unit provides individualised support tailored to user needs, including project planning/experimental design, sample preparation, mass spectrometry analysis and basic and advanced data analysis, with the latest developments available in its area of expertise.

## EQUIPMENT AND FACILITIES

- Q-TOF mass spectrometer, MALDI-TOF, TIMSTOF-Flex (Bruker) (Last update:2022)
- Q-TOF mass spectrometer, TIMSTOF-Pro (Bruker) (Last update: 2021)
- EVOSEP-ONE (Evosep) (Last update: 2021)
- ELUTE UHPLC (Bruker) (Last update: 2021)
- Sprayer: HTX M5 (HTX Technologies) (Last update: 2021)
- Main programs (and programming languages) used for data analysis: Spectronaut TransProteomicsPipeline, MS-Fragger for protein identification; Skyline, DIANN, MS-Fragger for protein quantification and spectral library generation; Tissue View, MSiReader, Spectralanalysis, Cardinal, SCILS for Maldi Imaging MS. R, Python programming languages for general analysis purposes. MetaboScape and TASQ for metabolomics (lipidomics workflow) (Last update: 2018 - 2023)
- BPS: ProteoScape™ Parallel Search Engine in Real-time (Bruker) (Last update: 2023)
- Spectronaut: DIA analysis for protein identification and quantification (SN18, Last update: 2023)
- Basic laboratory equipment for sample preparation (Last update: 2014)

## MAIN SERVICES

- Identification and characterization of proteins by LC-MS/MS: DDA-PASEF
- Quantitative Proteomics:
  - DIA-PASEF
  - DDA-PASEF
  - PRM-PASEF
  - Clinical Proteomics analysis using Evosep-One
- Lipidomics and Metabolomics: Identification, characterization and/or quantification of small molecules in a wide range of samples.
- MALDI Imaging mass spectrometry (Proteomics/Lipidomics/Metabolomics)
- Project supervision and collaboration
- Training in the software used for data analysis

## KEY FACTS

NUMBER OF IMIBIC USERS: **8**

NUMBER OF EXTERNAL USERS: **17**

NUMBER OF PUBLICATIONS: **5**

NUMBER OF MEETINGS WITH USERS GROUPS: **134**

NUMBER OF TECHNICAL INTERVENTIONS IN THE UNIT: **2072**

PARTICIPATION IN INTERLABORATORY COMPARISON STUDIES: **1**

QUALITY CERTIFICATES: **1**

## FEATURED ARTICLES

1. Development of a Prediction Model for Short-Term Remission of Patients with Crohn's Disease Treated with Anti-TNF Drugs. Rosario Medina-Medina et al. Int. J. Mol. Sci. 2023, 24(10), 8695; <https://doi.org/10.3390/ijms24108695>
2. Development of a Prediction Model for Short-Term Remission of Patients with Crohn's Disease Treated with Anti-TNF Drugs. Rosario Medina-Medina, Eva Iglesias-Flores, Jose M. Benítez, Sandra Marín-Pedrosa, Isabel Salguerio-Rodríguez, Clara I. Linares, Sandra González-Rubio, Pilar Soto-Escribano, Beatriz Gros, Manuel L. Rodríguez-Perálvarez, José L. Cabriada, María Chaparro, Javier P. Gisbert, Eduardo Chicano-Gálvez, Ignacio Ortea, Gustavo Ferrín, Valle García-Sánchez and Patricia Aguilar-Melero. Int. J. Mol. Sci. 2023, 24(20), 8695. May 12, 2023. <https://doi.org/10.3390/ijms24108695>
3. The thrombus proteome in stroke reveals a key role of the innate immune system and new insights associated with its aetiology, severity and prognosis. Chary Lopez-Pedrera, Rafael Oteros, Alejandro Ibáñez-Costa, María Luque-Tévar, Laura Muñoz-Barrera, Nuria Barroja, Eduardo Chicano-Gálvez, Juan Marta-Enguita, Josune-Orbe, Francisco Velasco, Carlos Pérez-Sánchez. Journal of thrombosis and haemostasis. April 24, 2023 DOI:<https://doi.org/10.1016/j.jtha.2023.04.015>
4. Spatial and Temporal Protein Modules Signatures Associated with Alzheimer Disease in 3xTg-AD Mice Are Restored by Early Ubiquinol Supplementation. Emilio Llanos-González, Francisco J. Sancho-Bielsa, Javier Frontiñán-Rubio, Yoana Rabanal-Ruiz, Sonia García-Carpintero, Eduardo Chicano, Isabel Úbeda-Banon, Alicia Flores-Cuadrado, Lydia Giménez-Llort, Francisco Javier Alcaín, Juan Ramón Peinado and Mario Durán-Prado. Antioxidants 2023, 12(3), 747; <https://doi.org/10.3390/antiox12030747>
5. Data Processing and Analysis in Mass Spectrometry-Based Metabolomics. Ángela Peralbo-Molina, Pol Solà-Santos, Alexandre Perera-Lluna, Eduardo Chicano-Gálvez. Methods Mol Biol. 2023;2571:207-239. doi: 10.1007/978-1-0716-2699-3\_20

## PROJECTS

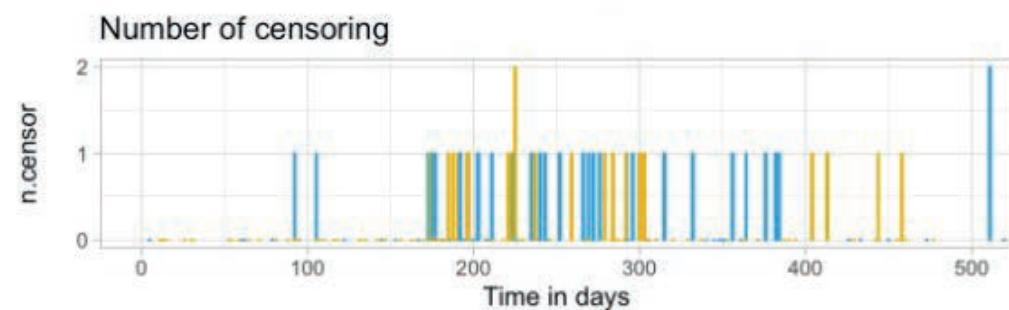

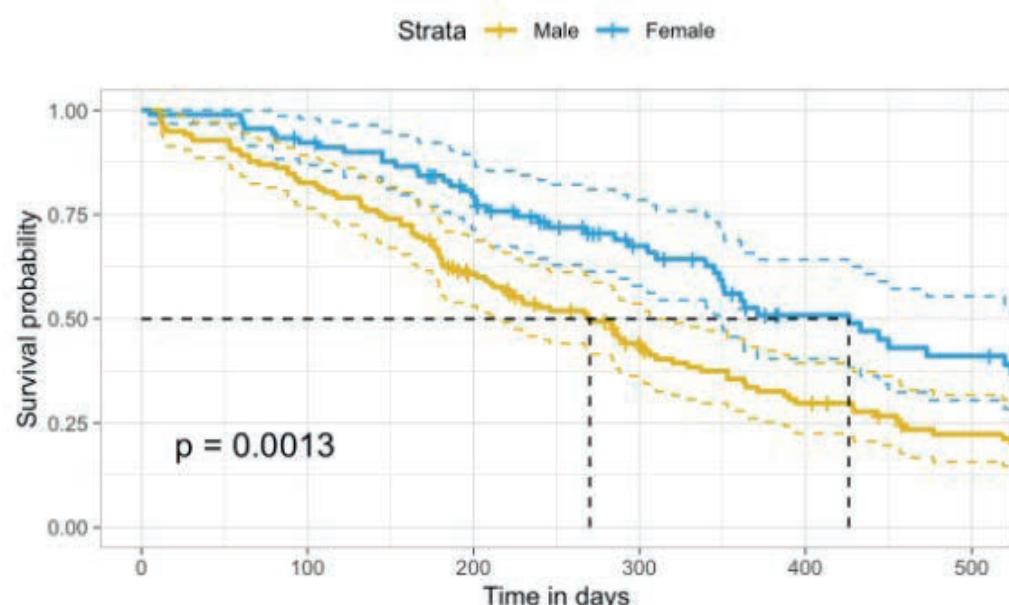

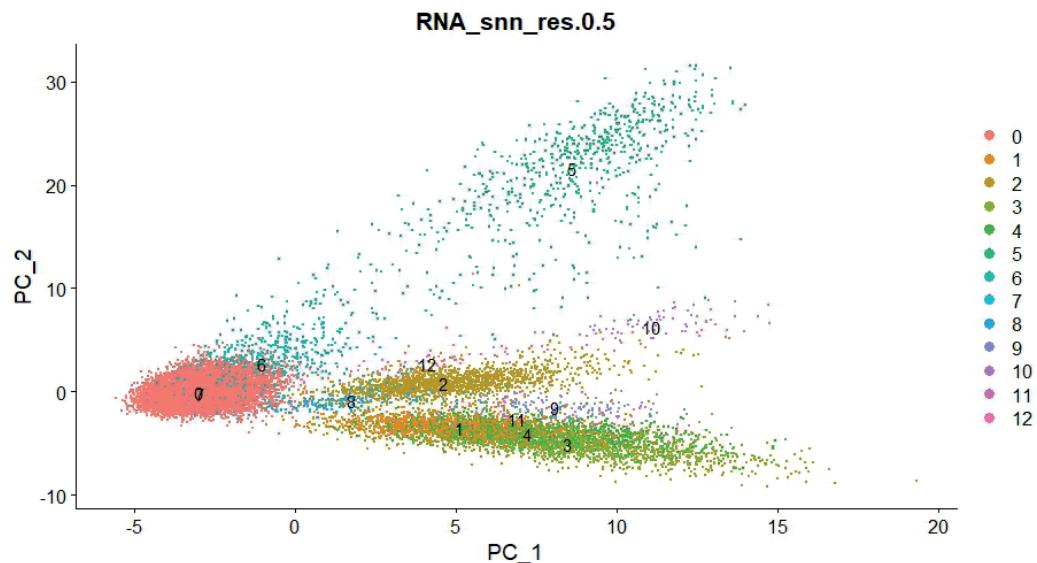

1. Characterization of the expression of proteins involved in the detoxification of water contaminated with heavy metals. Biochemistry and Molecular Biology Dept. University of Cordoba
2. Proteomic analysis of saliva exosomes for the detection of early biomarkers of Alzheimer's, Parkinson's, and other associated diseases. Nursery Dept. University of Cordoba
3. Development of a new high-resolution lateral MS-Imaging methodology for characterizing the arcuate tract in mice. Single-cell resolution MS-Imaging. GC10. Hormonal Regulation of Energy Balance, Puberty and Reproduction. IMIBIC
4. Development of protein panel analyses for designing a new medical product for sepsis cases in intensive care units. Advanced diagnosis of sepsis progression in patients under intensive care. Epidisease S.L.
5. Proteomic analysis of cell culture exosomes to elucidate molecular mechanisms associated with hypoxia. GC17. Physiopathology of Endocrine Vitamin D System Biotechnology and Aging. IMIBIC
6. Redox proteomic analysis in patients with mucinous cancer, *Pseudomyxoma peritoneii*. GE09. Research in peritoneal and retroperitoneal oncological surgery.
7. Proteomic characterization of adipocytes and its adip/o/lipogenesis. IDIBGI.
8. Proteomic analysis of lymphocytes reprogrammed using CAR-T technique. INIBICA
9. Lipid profiling analysis of 60 patients from two different types of samples (blood and fibroblasts) using LC-MS/MS, focusing mainly on sphingolipids (monohexosylceramide, lactosylceramide, ceramides), glucocerebroside, cholesterol, and oxysterols. IBIS
10. MS-Imaging analysis of bioindicator organisms for environmental contamination. Biochemistry and Molecular Biology Dept. University of Cordoba
11. Proteomic analysis for the detection of early diagnostic biomarkers in keratoconus disease. Project in collaboration with the private company CorneaProject S.L. (CPP22-009889).
12. Structural elucidation of nucleotide isomers. Genetics Dept. University of Córdoba
13. Proteomic study of membrane samples derived from tumor cells to compare protein expression differences in various cancer subtypes. UGR
14. Proteomic analysis of cell cultures infected with the Ebola virus. Elucidation of viral action mechanisms. UGR
15. Development of a new high-throughput proteomic analysis methodology from tissue sections prepared by laser microdissection (LCM) in collaboration with the Advanced Microscopy Unit IMIBIC. GC04. Inflammation and Cancer IMIBIC
16. Proteomic analysis of extracellular vesicles in commercially important plants for their potential use as pharmaceutical transport vehicles. UCM
17. Multi-omic analysis of plasma from patients with Multiple Sclerosis, Chronic Kidney Disease, and potential associated effects in both diseases. HNP-Toledo
18. MS-Imaging analysis of the effect of acoustic stress on marine organisms. Laboratory of Applied Bioacoustics (LAB), Barcelona
19. MS-Imaging analysis of microbial populations and their interactions in environments contaminated with heavy metals. UCA

20. MS-Imaging analysis of lung tumors and their behavior under different antiangiogenic treatments. USAL
21. Characterization of Pseudomyxoma peritoneii using MS-Imaging techniques. GE09. Research in peritoneal and retroperitoneal oncological surgery.
22. Proteomic analysis of the cardiac tissue matrisome with various tissue damage caused by infarction and cellular regeneration. UMA-IBIMA
23. Advanced proteomic analysis of blood-derived subproducts, microvesicles, exosomes, platelets, and megakaryocytes differentiated into platelets. UGR

## COURSES AND WORKSHOPS

1. Master's degree in Translational Biomedical Research. Subject Proteomics. University of Cordoba
2. Master's degree in Biomedicine. University of Cádiz
3. Open seminars via social networks (twitterchats)
4. Individualised advanced training for research staff: Proteomics/Metabolomics/MS Imaging.
5. Mentoring of pre-doctoral students and students in professional training.
6. Post-doctoral short-term internships for advanced mass spectrometry analysis
7. International and National congress assistances and scientific publications.

## 12.5 BIOINFORMATICS UNIT

## STAFF

### Sebastián Ventura Soto, PhD

Head of Unit, Team Leader of the “Knowledge Discovery and Intelligent Systems” (KDIS) research group - Professor of Computer Sciences and Artificial Intelligence at the University of Córdoba.

### Adrián Santiago Ortiz

Bioinformatician – FIBICO contract, through the IMPaCT programme (IMP/00019). Contract from the Carlos III Institute of Health in the 2019 Strategic Action in Health (AES-2019) call.

### Alberto Vela Castro

Biostatistician - FIBICO contract, through the Programme I Investigate.

## BRIEF DESCRIPTION

The mission of the Bioinformatics and Biostatistics Unit is to provide engineering and computing resources to satisfy both the bioinformatics analysis requirements and the different technological needs that result from research and clinical practice, with an emphasis on the promotion and implementation of state-of-the-art technologies.

The aim of the bioinformatics and biostatistics area is to support researchers with scientific advice for the experimental design, ad-hoc genomic data analysis, and data visualisation. The unit is currently setting up robust workflows for the various and most common types of genomic data analysis, highlighting the quality control on the several steps to achieve the best results. Also, the Unit plans to be continuously updating to improve the current services and to broaden them in the future based on demand.

Statistical inference is a key aspect of the unit’s support services, involving predictions and generalizations about populations based on sample data. This includes designing experiments, hypothesis testing, confidence intervals, and regression analysis to ensure statistically valid findings. Additionally, the unit leverages machine learning techniques to analyze complex data, predict outcomes, and identify hidden patterns. Survival analysis, another critical expertise, involves modeling time-to-event data using techniques like Kaplan-Meier estimators and Cox proportional hazards models, aiding in developing prognostic models and making informed clinical decisions. By focusing on these methodologies, the unit ensures researchers access cutting-edge technologies for comprehensive data analysis.

## EQUIPMENT AND FACILITIES

The equipment of the unit has greatly improved since the Institute acquired a powerful HPC system, which will have an impact on future services and uses of the unit. The unit is currently equipped with the following computing resources:

- BullX R428-E3 node:
  - 4x Intel Xeon E5-4610v2 8c,
  - 32-core,
  - 256 GB RAM
- HPC system:
  - 8 x Intel Xeon Platinum 8260 (24-core – 48 threads each),
  - 3072 GB RAM DDR4-2933 per server,
  - 4x GPUs NVIDIA V100S (32 GB each),
  - 8x SSD SATA (1,92 TB each)
  - 48 TB HDD | 12 TB HDD Raid System

## MAIN SERVICES

### » BIOINFORMATICS

- Raw data pre-processing and cleaning to subsequent analysis.
- Analysis and integration of omic data. Bioinformatic assistant to studies focus on genomic, transcriptomic (RNA-seq and single cell), proteomic, methylation...
- Differential expression analysis between experimental groups or conditions.
- Metagenomic studies and microbiome analysis using 16s rRNA amplicon sequencing.
- Develop algorithms and in-house scripts to solve user requirements such as filtering and integration of large databases, databases transformation...
- Consultancy to apply projects.
- Analysis of biological significant using methods such as Over-Representation Analysis (ORA), Gene Ontology analysis (GO-terms), pathways (Kegg database) and Gene-Set Enrichment Analysis (GSEA).
- Filogenetic analysis.
- Bacterial genome annotation.

## » BIOSTATISTICS

- Review of methodology and research protocols: define hypothesis and objectives, variable selection, define statistical analysis...
- Consultancy about techniques and statistical methodologies.
- Sample size calculation.
- Exploratory data analysis and descriptive statistics.
- Inferential statistical analysis (univariate and multivariate).
- Evaluation of diagnostic tests: sensitivity, specificity, predicted values, ROC curves...
- Analysis of surveillance data.
- Longitudinal data analysis.
- Omic data and high-dimensional data analysis
- Other statistical tecnicas (bayesian analysis, meta-analysis...).

## KEY FACTS

The Bioinformatics and Biostatistics Unit was reactivated by the addition of two members. Since June, Adrián Santiago has been responsible for the bioinformatics area. On the other hand, Alberto Vela has been responsible for the biostatistical area since September.

It has continued to promote the use of computational biology, OMIC data analysis and statistical analysis among the different research groups, which has resulted in an increase in the number of services offered during 2023.

Some indicators for the year:

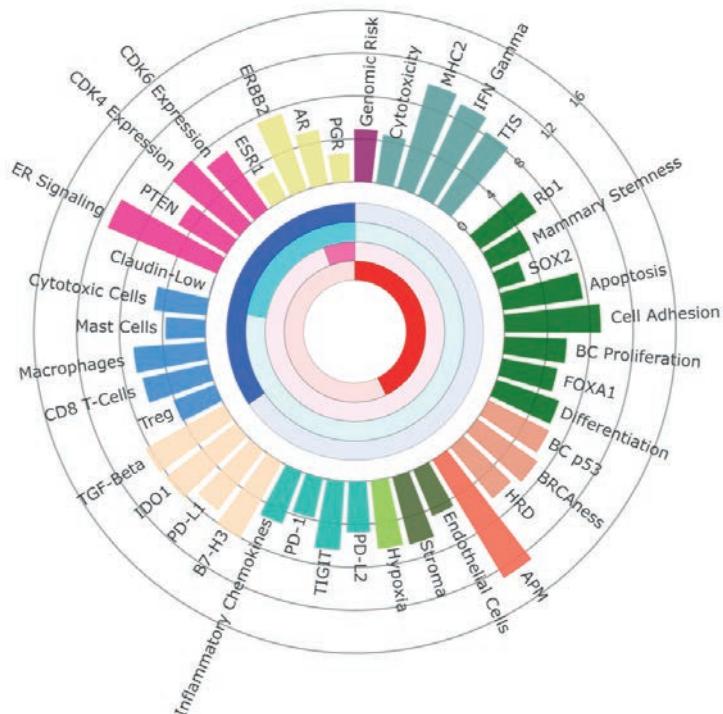

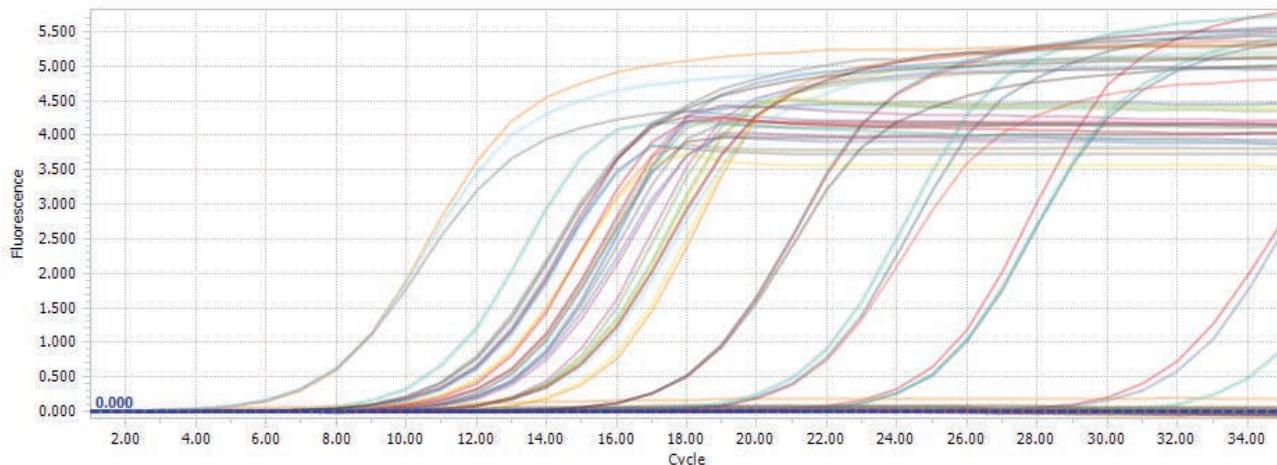

- NUMBER OF IMIBIC USERS (groups): 10
- NUMBER OF EXTERNAL USERS: 2
- NUMBER OF SUPPORTED INTERNAL PROJECTS: 11
- NUMBER OF MEETINGS WITH IMIBIC GROUPS: 42
- NUMBER OF MEETINGS WITH EXTERNAL GROUPS: 1

## PROJECTS

During 2023, the unit was involved in the following project;

- Precision Medicine Infrastructure associated with Science and Technology (IMPaCT) of the Strategic Action in Health (2017-2020)
  - PI: Alfonso Valencia Herrera
  - File: IMP/00019
- ÚNICAS. Implementation of a Pediatric Network for Personalised Medicine in rare pediatric diseases. A Pilot Project.
  - PI: Eduardo López Laso
  - File: PMP22/00008
- Characterization and validation of new therapeutic, diagnostic and prognostic targets in Pseudomyxoma Peritonei
  - PI: Álvaro Arjona Sánchez
  - File: PI22/01213
- Aortic stenosis immunopathology (ASim)
  - PI: Alejandra Pera Rojas
  - File: PI19/00075
- Ensayo clínico de eficacia y seguridad de la combinación de profilaxis de duración reducida seguida de profilaxis inmunoguiada en receptores de trasplante pulmonar (estudio Cytocor)
  - PI: Julian Carlos de la Torre Cisneros
  - File: PI18/00099
- Estrategias de control y estudio fármaco-genético para el tratamiento personalizado del hígado graso asociado a disfunción metabólica en pacientes con prediabetes: Estudio PROMETEO-HG
  - PI: Jose López Miranda
  - File: ICI20/00069

## 12.6 GENOMICS UNIT

### STAFF

#### Álvaro Jiménez Arranz

Head of Genomics Unit. Senior Genomics & Clinical Genomics Specialist - Recipient of a competitive contract from the 2015 Call for "Ayudas para la Vinculación de Técnicos de Apoyo a ECAs" (SSPA).

#### Beatriz Domingo Escudero

Senior Genomics Technical Specialist - Contract financed with FIBICO-IMIBIC's own funds.

#### Pilar Rubín González de Canales

Genomics Laboratory Technician - Recipient of a competitive contract from the 2020 Call for "Ayudas para Personal Técnico de Apoyo" (MICINN).

#### María Sedano Gámiz

Genomics Technical Specialist - Recipient of a contract from 2021 Call for "Programa Investigador" (MITES).

### BRIEF DESCRIPTION

The aim of the Genomics Unit is to provide researchers with cutting-edge equipment as well as with scientific and technical advice for the development of various analytical techniques used in the comprehensive study of DNA and RNA. This allows researchers to obtain high-quality results for the development of outstanding translational biomedical research.

The Unit has a Quality Management System in accordance with the ISO 9001:2015 Quality Standard and offers its services to researchers both at IMIBIC and other public and private institutions. The Genomics Unit collaborates closely with other Research Support Services, such as Bioinformatics, Cytometry, Microscopy and Mass Spectrometry (IMSMI).

## EQUIPMENT AND FACILITIES

The resources currently available in the Genomics Unit are:

### • Illumina MiSeq

MiSeq is an Illumina platform sequencing technology based on SBS (sequencing by synthesis), which is the most widely adopted NGS (next-generation sequencing) technology in the world on account of its speed, accuracy, and quality. This sequencer can generate up to 15 Gb/run and can perform 2x300bp paired-end reads, leading to greater accuracy, especially in problematic areas such as the ones involving homopolymers. The MiSeq system allows researchers to perform DNA-Seq, RNA-Seq, Methyl-Seq and ChIP-Seq analysis, which have a wide range of applications.

### • nCounter DX / NanoString technology

The NanoString nCounter system uses molecular barcodes linked to specific probes that can detect and count hundreds of targets in a single reaction without amplification, so that users can study a large number of mRNAs, miRNAs, and DNA molecules simultaneously with sensitivity and ‘gold standard’ reproducibility. Its applications include gene expression analysis, gene fusion, copy-number variation (CNV) and simultaneous analysis of mRNAs and miRNAs.

These applications, together with its Dx/CE-IVD certification for healthcare-quality analysis, make NCounter a tool with high potential for clinical use. One example is the CE-marked test for in vitro diagnostics (CE-IVD) and approved by the FDA for breast cancer, Prosigna-PAM50, based on the molecular analysis of gene expression of 50 genes. This test allows the tumor to be classified into one of 4 intrinsic subtypes, related to the prognosis of the disease and the choice of treatment.

### • Single-cell technology

This year, the Unit has incorporated 2 new platforms aimed at single-cell studies that will allow, among other possibilities, to analyze and compare gene expression and epigenetic profiles between different cell populations:

- » Dolomite Bio Nadia
- » Fluidigm C1

### • Digital PCR (dPCR): QX200 Digital Droplet PCR System

The digital PCR offers a more precise and sensitive alternative to conventional qPCR for absolute quantification and detection of rare alleles without the need for standards or endogenous controls due to droplet partitioning.

### • Quantitative PCR (qPCR)

The Unit has 4 qPCR platforms aimed at genotyping and gene expression studies, including the two new instruments that have been incorporated this year (QuantStudio 5 and QuantStudio 7 Flex):

- » LightCycler 96 (96-well platform)
- » QuantStudio 5 (96-well platform)
- » QuantStudio 7 Flex (96-well, 384-well and Taqman Array Cards platform)
- » Biomark HD-Juno (High-throughput nanofluidics platform)

With regard to IMIBIC research staff, the Unit offers the possibility of using the qPCR platforms under a “self-service” system (without a technical operator).

### • Other

The Unit has additional equipment designed for quantification, quality analysis and size determination of nucleic acid fragments:

- » DeNovix DS-11 (Spectrophotometer)
- » Quantus (Fluorometer)
- » 2200 TapeStation (Microelectrophoresis)

A grant for the funding of a new NGS sequencer (NextSeq 2000) has been awarded to the Unit. This system will make it possible to tackle current and future projects requiring greater sequencing capacity than is currently available in the Unit.

## MAIN SERVICES

- Technical support and scientific and methodological advice on the choice and optimization of genomic techniques
- Design support for NGS or NCounter targeted panels
- Technical and scientific support in the use of qPCR platforms and probe design
- Nucleic acid quality controls (spectrophotometry, fluorometry and microelectrophoresis)
- Analysis of targeted gene expression panels (up to 800 genes) using NCounter System
- PAM50-signature Analysis (Prosigna™) for breast cancer prognosis
- Analysis of custom panels for detection of targeted fusion genes by NCounter System
- Screening of up to 800 miRNAs in tissue, peripheral blood cells and serum/plasma by NCounter System
- Screening of up to 800 lncRNAs by NCounter System
- Gene expression and genotyping studies using real-time PCR
- Absolute quantification by Droplet Digital PCR System (viral load analysis...)
- Liquid biopsy (cfDNA): Rare mutation detection by ddPCR and analysis of SNVs, Indels, CNVs and fusions by NGS
- Analysis of SNVs, Indels and CNVs in peripheral blood cells and tissue by NGS or NCounter System

- Characterization of bacterial populations by 16S rRNA and shotgun sequencing
- Targeted sequencing for the characterization of Mycobacteria and SARS-CoV-2 (epidemiological monitoring protocol)
- RNA-Seq
- ChIP-Seq
- DNA methylation analysis by NGS
- NGS library preparation
- NGS (Next Generation Sequencing) by Illumina MiSeq
- Training and support in the use of data analysis software related to the Unit's technology

## KEY FACTS

In 2023, the Genomics Unit continued the trend of a steady increase in the number of projects and users since its creation in 2015; 23.112 research and clinical diagnostic samples were analysed in 2023 with the Unit's technologies and 151 users were supported. These users belonged to 27 of the 48 IMIBIC groups, 3 Departments of the University of Córdoba (Genetics Department-Faculty of Sciences, Pathological Anatomy Department-Faculty of Veterinary Science and Cellular Biology, Physiology and Immunology Department-Faculty of Sciences) and 4 Departments of Reina Sofia University Hospital (Pathological Anatomy, Oncology, Hematology and Clinical Biochemistry). In addition, several external centers have requested our services, such as CIMA-Center for Applied Medical Research-Navarra, ULL-University of La Laguna-Tenerife, UCLM-University of Castilla-La Mancha, UCM-Complutense University of Madrid, COBIOMIC Bioscience, TTD-Group for the Treatment of Digestive Tumors, and GEICAM-Spanish Breast Cancer Research Group.

The previously implemented protocols and services have been improved in accordance with the principles of good laboratory practice (GLP) to guarantee the quality, reproducibility and reliability of the results. The new single-cell and qPCR platforms incorporated to the Unit have been put into operation and new cfDNA-based services have been developed, such as the analysis of methylation by ddPCR and the analysis of SNVs, Indels, CNVs and fusions by NGS.

The Genomics Unit of IMIBIC is accredited since 2021 as "Clinical Genetics Unit" and participates in a multidisciplinary team, together with several departments of the Reina Sofia University Hospital (HURS), aimed at the implementation of genomic diagnostic protocols in the Andalusian Public Health Service. The Unit carries out services developed together with the Departments of Pathological Anatomy, Oncology and Hematology of the HURS, such as the PAM50-breast cancer prognostic gene signature (ProsignaTM), and is part of the Research Committee in Molecular Clinical Oncology, focused on the evaluation of NGS as a diagnostic, prognostic and therapeutic tool for oncology patients.

The Unit participates in the Pharmacogenetics Working Group of the SCReN (Spanish Clinical Research Network) of the National Institute of Health Carlos III, in the Pethema Foundation program for the implementation of NGS as a diagnostic tool for Myeloid Leukemia, and collaborates with the TTD (Group for the Treatment of Digestive Tumors) and GEICAM (Spanish Breast Cancer Research Group) groups. In addition, the Unit is part of several laboratory networks, such as the EATRIS network (European Infrastructure for Translational Medicine), Innolabs and the Novartis laboratory network for clinical trials.

In 2023, The Genomics Unit has been re-certified in according to the ISO 9001:2015 standards for its quality management system and has received a grant from the 2022 Call of the "Programa Estatal de Investigación y Equipamiento Científico-Técnico" (MICINN) for the financing of a new NGS sequencer.

**NUMBER OF IMIBIC USERS: 151 (27 IMIBIC GROUPS)**

**NUMBER OF EXTERNAL USERS: 14 (8 EXTERNAL CENTRES)**

**NUMBER OF PUBLICATIONS: 21**

**NUMBER OF ONGOING PROJECTS: N/A**

**COURSES AND TRAINING SESSIONS: 9**

## FEATURED ARTICLES

A total of 21 scientific articles were published in 2023 using the services and equipment of the Genomics Unit, including the following:

1. Characterization of the inflammatory proteome of synovial fluid from patients with psoriatic arthritis: Potential treatment targets Barroso N, López-Montilla MD, Cuesta-López L, Pérez-Sánchez C, Ruiz-Ponce M, López-Medina C, Ladehesa-Pineda ML, López-Pedrera C, Escudero-Contreras A, Collantes-Estévez E, Arias-de la Rosa I. *Front Immunol.* 2023 Mar 22;14:1133435. doi: 10.3389/fimmu.2023.1133435. PMID: 37033920; PMCID: PMC10073963 (GC05).
2. Splicing machinery is profoundly altered in systemic lupus erythematosus and antiphospholipid syndrome and directly linked to key clinical features. Lopez-Pedrera C, Patiño-Trives AM, Cerdó T, Ortega-Castro R, Sanchez-Pareja I, Ibañez-Costa A, Muñoz-Barrera L, Ábalos-Aguilera MC, Ruiz-Vilchez D, Seguí Azpilcueta P, Espinosa M, Barroso N, Escudero-Contreras A, Castaño JP, Luque RM, Ortega R, Aguirre MA, Perez-Sánchez C. *J Autoimmun.* 2023 Feb;135:102990. doi: 10.1016/j.jaut.2022.102990. Epub 2023 Jan 6. PMID: 36621176 (GC05).
3. Diagnosing and monitoring pancreatic cancer through cell-free DNA methylation: progress and prospects. García-Ortiz MV, Cano-Ramírez P, Toledano-Fonseca M, Aranda E, Rodríguez-Ariza A. *Biomark Res.* 2023 Oct 5;11(1):88. doi: 10.1186/s40364-023-00528-y. PMID: 37798621; PMCID: PMC10552233 (GC06).
4. Metabolic shift underlies tumor progression and immune evasion in S-nitrosoglutathione reductase-deficient cancer. Mena-Osuna R, Mantrana A, Guil-Luna S, Sánchez-Montero MT, Navarrete-Sirvent C, Morales-Ruiz T, Rivas-Crespo A, Toledano-Fonseca M, García-Ortiz MV, García-Jurado G, Gómez-España MA, González-Fernández R, Villar C, Medina-Fernández FJ, Villalba JM, Aranda E, Rodríguez-Ariza A. *J Pathol.* 2023 Apr 5. doi: 10.1002/path.6080. Epub ahead of print. PMID: 37017456 (GC06).

5. Circulating NPTX2 methylation as a non-invasive biomarker for prognosis and monitoring of metastatic pancreatic cancer. García-Ortiz MV, Cano-Ramírez P, Toledano-Fonseca M, Cano MT, Inga-Saavedra E, Rodríguez-Alonso RM, Guil-Luna S, Gómez-España MA, Rodríguez-Ariza A, Aranda E. *Clin Epigenetics*. 2023 Jul 22;15(1):118. doi: 10.1186/s13148-023-01535-4. PMID: 37481552; PMCID: PMC10362605 (GC06).
6. Uremic Toxins Induce THP-1 Monocyte Endothelial Adhesion and Migration through Specific miRNA Expression. Carmona A, Guerrero F, Muñoz-Castañeda JR, Jimenez MJ, Rodriguez M, Soriano S, Martin-Malo A. *Int J Mol Sci.* 2023 Aug 18;24(16):12938. doi: 10.3390/ijms241612938. PMID: 37629118; PMCID: PMC10455080 (GC07).
7. Rapamycin downregulates α-klotho in the kidneys of female rats with normal and reduced renal function. Espartero A, Vidal A, Lopez I, Raya AI, Rodriguez M, Aguilera-Tejero E, Pineda C. *PLoS One.* 2023 Nov 28;18(11):e0294791. doi: 10.1371/journal.pone.0294791. PMID: 38015969; PMCID: PMC10684065 (GC13).
8. Evolving Risk Classifications in AML in a Real-Life Scenario: After Changes upon Changes, Is It More and More Adverse? Aparicio-Pérez C, Prados de la Torre E, Sanchez-Garcia J, Martín-Calvo C, Martínez-Losada C, Casaño-Sánchez J, Serrano-López J, Serrano J. *Cancers (Basel).* 2023 Feb 23;15(5):1425. doi: 10.3390/cancers15051425. PMID: 36900222; PMCID: PMC10001051 (GC16).
9. Molecular Landscape and Validation of New Genomic Classification in 2668 Adult AML Patients: Real Life Data from the PETHEMA Registry. Sargas C, Ayala R, Larráyoz MJ, Chillón MC, Carrillo-Cruz E, Bilbao-Sieyro C, Prados de la Torre E, Martínez-Cuadrón D, Rodríguez-Veiga R, Boluda B, Gil C, Bernal T, Bergua JM, Algarra L, Tormo M, Martínez-Sánchez P, Soria E, Serrano J, Alonso-Domínguez JM, García-Boyero R, Amigo ML, Herrera-Puente P, Sayas MJ, Lavilla-Rubira E, Martínez-López J, Calasanz MJ, García-Sanz R, Pérez-Simón JA, Gómez-Casares MT, Sánchez-García J, Barragán E, Montesinos P, On Behalf Of Petehema Group. *Cancers (Basel).* 2023 Jan 10;15(2):438. doi: 10.3390/cancers15020438. PMID: 36672386; PMCID: PMC9856266 (GC16).
10. Altered splicing machinery in lung carcinoids unveils NOVA1, PRPF8 and SRSF10 as novel candidates to understand tumor biology and expand biomarker discovery. Blázquez-Encinas R, García-Vioque V, Caro-Cuenca T, Moreno-Montilla MT, Mangili F, Alors-Pérez E, Ventura S, Herrera-Martínez AD, Moreno-Casado P, Calzado MA, Salvatierra Á, Gálvez-Moreno MA, Fernandez-Cuesta L, Foll M, Luque RM, Alcalá N, Pedraza-Arevalo S, Ibáñez-Costa A, Castaño JP. *J Transl Med.* 2023 Dec 4;21(1):879. doi: 10.1186/s12967-023-04754-8. PMID: 38049848; PMCID: PMC10696873 (GC27).
11. Tumor suppressor role of RBM22 in prostate cancer acting as a dual-factor regulating alternative splicing and transcription of key oncogenic genes. Jiménez-Vacas JM, Montero-Hidalgo AJ, Gómez-Gómez E, Sáez-Martínez P, Fuentes-Fayos AC, Closa A, González-Serrano T, Martínez-López A, Sánchez-Sánchez R, López-Casas PP, Sarmento-Cabral A, Olmos D, Eyras E, Castaño JP, Gahete MD, Luque RM. *Transl Res.* 2023 Mar;253:68-79. doi: 10.1016/j.trsl.2022.08.016. Epub 2022 Sep 9. PMID: 36089245 (GC27).

## COURSES AND WORKSHOPS

- Specific training for research groups in experimental design, technical applications and data analysis related to Unit equipment:
  - » Training in data analysis using R-based software, NSolver: Groups GC01 and GC06
  - » Training in the Nanostring custom panel design: Groups GC06 and GE05
  - » Training in ddPCR data analysis using QuantaSoft analysis software: Groups GC06 and GE09
  - » Training in NGS data analysis using BaseSpace Sequence Hub: Groups GC06, GC08 and GC24
  - » Training in qPCR data analysis using LC96, QS5, QS7 Flex and Biomark HD analysis software: Groups GC02, GC05, GC06, GC07, GC10, GC11, GC13, GC16, GC26, GC27, GC29, GC30, GC31 and GE09
- Four application workshops were given:
  - » “QuantStudio 5 y 7: aplicaciones para PCR a tiempo real”
  - » “Soluciones en genómica de célula única: Sistemas C1 y Nadia”
  - » “Single cell spatial transcriptomics with Xenium - the platform for now and future”
  - » “Buenas prácticas de pipeteo, verificación y calibración de pipetas”

## BRIEF DESCRIPTION

The IMIBIC Clinical Research Unit promotes clinical research at the IMIBIC and Reina Sofia University Hospital and also aims to establish collaborations with other research centres

The Unit focuses on the development of clinical trials including design, feasibility, regulatory affairs, launch, management, monitoring, pharmacovigilance, data management, statistics and delivery of clinical assistance. All operations are GCP compliant.

The IMIBIC Clinical Research Unit consists of two facilities: The Provincial Hospital Clinical Research Unit and the General Hospital Clinical Research Unit. Both are adapted to perform phase I-IV clinical trials on patients.

The unit has a Clinical Research Plan which is included in the 2021-2025 Strategic Plan. This plan includes a set of indicators which enable the unit to monitor it in quantitative terms. This monitoring is evidenced by the Clinical Research Committee, which meets every six months.

Finally, it is important to highlight that the IMIBIC Clinical Research Unit is part of the SCREN Platform (**Spanish Clinical Research Network ISCI**III).

## EQUIPMENT AND FACILITIES

- 10 doctor's consulting rooms and a storeroom
- 2 hospital wards, each containing: a crash trolley with semi-automatic defibrillator and emergency medication, intravenous fluids, an insulin pump, healing trolleys, oxygen outlets in all positions and audiovisual system
- 14 armchairs and rooms with 3 single beds, all with ongoing monitoring
- Paediatric area
- 12-lead ECGs
- Measuring boards and scales
- Blood pressure monitor in each office
- Customized bathrooms
- Individual lockers for patients
- 2 living rooms for patients
- 2 waiting rooms for patients and family
- 1 multi-purpose room
- 2 laboratories for sample processing and centrifuges
- Freezers (-80°C and -20°C)
- 2 storerooms for materials
- High-definition ultrasound scanner
- 2 offices for study coordinators
- 2 offices for the CRA
- 1 meeting room
- 1 training room
- 5 archives

## MAIN SERVICES

- Methodological support
- Launch and regulatory affairs
- Study development
- Monitoring
- Pharmacovigilance
- Delivery of clinical assistance
- Feasibility and start-up support processes for pharmaceutical companies, CROs, and Investigators

## KEY FACTS

- NUMBER OF NEW PHASE I AND II CLINICAL TRIALS: **48**
- NUMBER OF NEW INDEPENDENT CLINICAL STUDIES (CLINICAL TRIALS, OBSERVATIONAL STUDIES AND CLINICAL INVESTIGATIONS WITH MEDICAL DEVICES) PROMOTED BY IMIBIC INVESTIGATORS: **2**
- NUMBER OF CLINICAL TRIALS (MANAGEMENT AND/OR MONITORING BY CLINICAL RESEARCH UNIT): **35**
- ANNUAL INVOICING FOR CLINICAL STUDIES (CLINICAL TRIALS, OBSERVATIONAL STUDIES AND CLINICAL RESEARCH WITH MEDICAL DEVICES) PROMOTED BY THE PHARMACEUTICAL INDUSTRY AND TOTAL VOLUME OF FINANCIAL REPORTS SIGNED DURING THE YEAR: **4.975 m€ (invoicing) and 6.955 m€ (total volume of financial reports signed)**
- PHARMA OR CRO CLINICAL TRIALS PROPOSALS RECEIVED BY CLINICAL RESEARCH UNIT AND REDIRECTED TO INVESTIGATORS: **162**
- CRO CONTRACTS FOR EXTERNAL SPONSORS: **4**

## FEATURED ARTICLES

- Trigo-Rodríguez M, Cárcel S, Navas A, et al. Role of IP-10 to Predict Clinical Progression and Response to IL-6 Blockade With Sarilumab in Early COVID-19 Pneumonia. A Subanalysis of the SARICOR Clinical Trial. Open Forum Infect Dis. 2023;10(4):ofad133. Published 2023 Mar 11. doi:10.1093/ofid/ofad133

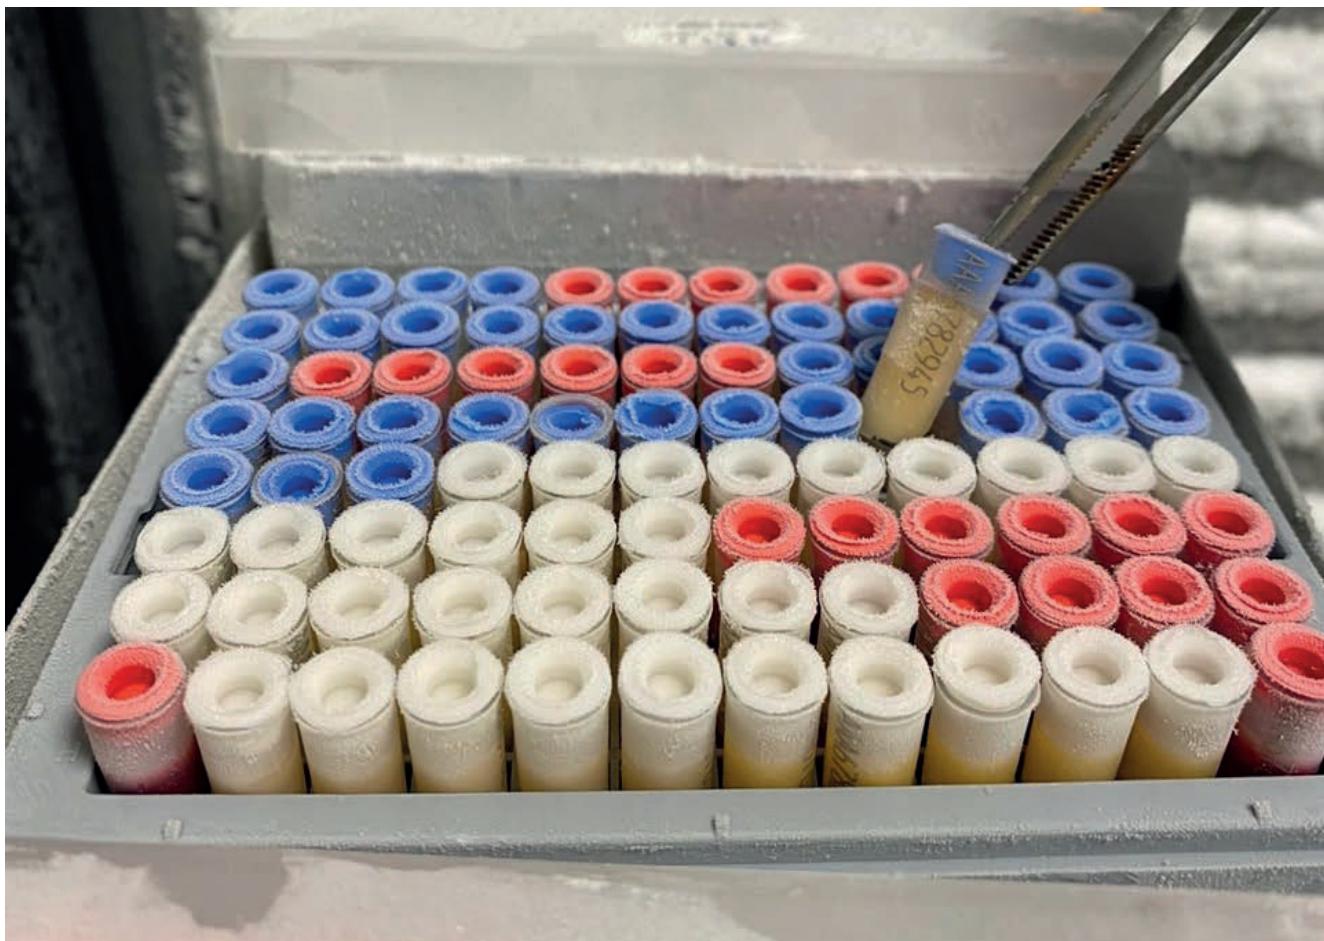

## KEY CLINICAL TRIALS (MANAGEMENT AND MONITORING BY CLINICAL RESEARCH UNIT)

- Estrategias de control y estudio fármaco-genético para el tratamiento personalizado del hígado graso asociado a disfunción metabólica en pacientes con prediabetes (PROMETEO-HG). N° de EudraCT: 2021-000152-19. 5 participating sites, 369 subjects recruited. Sponsor: CIBER. Clinical Research Unit as sub-contractor. Study included in SCReN Platform.
- Ensayo clínico de eficacia y seguridad de la combinación de profilaxis de duración reducida seguida de profilaxis inmunoguiada en receptores de trasplante pulmonar. Estudio CYTOCOR. N° EudraCT: 2018-003300-39. 7 participating sites, 149 subjects included. Sponsor: FIBICO. Study included in SCReN Platform.
- A Prospective, randomized, single blind, multicenter Phase III study on organ preservation with Custodiol-N solution compared with Custodiol solution in liver transplantation. Eudra-CT Number: 2019-001872-12. 7 participating sites, 143 subjects recruited. Sponsor: Dr. Franz Köhler Chemie GmbH. Clinical Research Unit as sub-contractor.
- REMAP-CAP: Randomized, Embedded, Multifactorial Adaptive Platform trial for Community-Acquired Pneumonia. N° EudraCT: 2015-002340-14. 5 participating sites, 84 subjects included. Sponsor: University of Utrecht. Clinical Research Unit as sub-contractor.
- Phase I-II clinical trial to evaluate the safety and tolerability of a new optimized anti CD19 CAR-T (AWARI) in patients with relapsed or refractory B lineage neoplasms. In Start-up process. Sponsor: FIBICO. Study included in SCReN Platform

## COURSES AND WORKSHOPS

- Basic Contents on Clinical Trials: Service of Preventive Medicine, Hospital Universitario Reina Sofía – 2-FEB-2023
- Welcome meeting Investigo staff – 12-JUN-2023
- Master in Traslational Biomedical Research: clinical trials module: University of Córdoba – 17-NOV-2023
- Good Clinical Research Documentation Practices (IMIBIC) -12-DEC-2023.
- Good Clinical Research Documentation Practices (SCReN) - 21-DEC-2023.

## 12.8. BIOBANK UNIT

### STAFF

**Rosa M<sup>a</sup> Ortega Salas, PhD**

Scientific Manager

**Fernando López López**

Technician

**José Carlos Cáceres**

Technician

**Rocío Muñoz Rodríguez**

Technician

**Marta Chacón Gámiz (from April 2023)**

Technician

### BRIEF DESCRIPTION

The Biobank Unit is a research support platform whose role is to serve as a link between doctors, researchers and patients donating biological samples for biomedical research in order to ensure compliance with all the legal and ethical guarantees in force.

The IMIBIC Biobank is part of the Andalusian Public Health System Biobank (SSPA), an initiative of the Department of Equality, Health and Social Policy of the Regional Government. It is part of the thematic network of Hospital Biobanks belonging to the National Institute of Health Carlos III (ISCIII), and a subprogram of the Thematic Networks for Cooperative Research in Health (RETICS).

## EQUIPMENT AND FACILITIES

The Unit has its own laboratory resources for sample transformation (safety booths, PCR cabinet, cryostat microtome, floating bath, centrifuge, histo bath, automated tissue processor for embedding in paraffin, paraffin wax dispenser, etc.) and other equipment such as:

- TissueSAFE: fully automated preparation of tissue samples under vacuum.
- Tissue Arrayer: assembles different tissue samples in a single 3D matrix for subsequent histological analysis.
- Quiacube: Automatic, compact system for analysis of DNA, RNA, plasmids and proteins from different samples.

For sample storage, there are currently three types of freezer: one for temperatures of 4°C, two for temperatures of -20°C, and seven for -80°C. There is also a room to store paraffin blocks at room temperature.

## MAIN SERVICES

The service portfolio is divided into four main areas:

- Custody: storing samples at different temperatures.
- Processing: transforming multiple types of biological sample in accordance with the procedures and technical criteria generally used by researchers in their projects.
- Provision of human samples and data on human health and disease research, selected according to the specific clinical and diagnostic criteria of researchers.
- Technical, scientific and ethical consultancy concerning the collection, storage, and management of human samples in biomedical research.

In 2021, the quality management system of the Cordoba Biobank node of the Andalusian Public Health System (SSPA) Biobank system was certified in accordance with ISO 9001:2015, which is the international standard regulating quality management systems. The scope of the quality management system implemented in the provincial nodes of the Biobank covers the provision, custody and processing of blood products or derivatives, tissues, substances or biological samples of human origin, and human embryonic and adult stem cell lines for use in research and teaching. In 2022, the certificate was renewed.

## KEY FACTS

NUMBER OF IMIBIC USERS: 19

NUMBER OF EXTERNAL USERS: 9

## FEATURED ARTICLES

1. Orthohepevirus C infection as an emerging cause of acute hepatitis in Spain: First report in Europe. PMID: 35167911. DOI: 10.1016/j.jhep.2022.01.028. J Hepatol. 2022 Aug;77(2):326-331
2. Optimization of the molecular diagnosis of the acute hepatitis E virus infection . PMID: 36965117. DOI: 10.1111/1751-7915.14247. Microb Biotechnol. 2023 Jun;16(6):1325-1332.
3. PRPF8 increases the aggressiveness of hepatocellular carcinoma by regulating FAK/AKT pathway via fibronectin 1 splicing. PMID: 36609600 DOI: 10.1038/s12276-022-00917-7. Exp Mol Med. 2023 Jan;55(1):132-142.

## PROJECTS

- Subvención para las Unidades de las Plataformas ISCIII de apoyo a la I+D+I en Biomedicina y Ciencias de la Salud de la Acción Estratégica en Salud 2017-2020. Código expediente PT20/00079. Subsidy for Units of ISCIII Support Platforms supporting R + D+ I in Biomedicine and Health Sciences, Strategic Health Action 2017-2020. File code PT20/00079.
- Ayudas públicas a proyectos de colaboración público-privada, del Programa Estatal para Impulsar la Investigación Científico- Técnica y su Transferencia, del Plan Estatal de Investigación Científica, Técnica y de Innovación 2021-2023, en el marco del Plan de Recuperación, Transformación y Resiliencia, y la convocatoria de tramitación anticipada correspondiente al año 2021. File code CPP2021-008897.

## COURSES AND WORKSHOPS

- Taller “Aspectos éticos y legales en la gestión y utilización de muestras biológicas humanas en proyectos de investigación”. 2<sup>a</sup> edición. 18 y 19 Septiembre de 2023.

## ISCIII PLATFORM BIOBANKS AND BIOMODELS

IMIBIC currently belongs to the ISCIII Biobanks and Biomodels Platform, supporting R + D+ i in Biomedicine and Health Sciences, Strategic Health Action 2017-2020. File code PT20/00079.

The ISCIII Biobanks and Biomodels Platform is an initiative of the Carlos III Health Institute. The Coordination team has organised the Platform's structure into four scientific-technological HUBS, which include: Biobanks, Organoids, Animal Models and 3D Printing. This structure makes it possible to manage and supply biological samples and associated clinical data. In the interest of promoting and incrementing scientific-technological resources in biomedical research, the PISCIIIB's services include organoids, animal models and 3D printing. (<https://www.isciiiobiobanksbiomodels.es/en/>).

The ISCIII Biobanks and Biomodels Platform has joined the European Biobanking Infrastructure (BBMRI-ERIC) as an observing member, acting as the national node in BBMRI-ERIC, one of the most relevant research platforms in the European Union.

The BIOBANKS HUB'S purpose to improve the competitiveness of spanish biomedical and health research, providing researchers with centralised access to collections and data associated with the samples.

ORGANOID HUB offers the highest level and quality and cutting-edge services in the guidance, validation and production of organoids from adult stem cells and pluripotent stem cells.

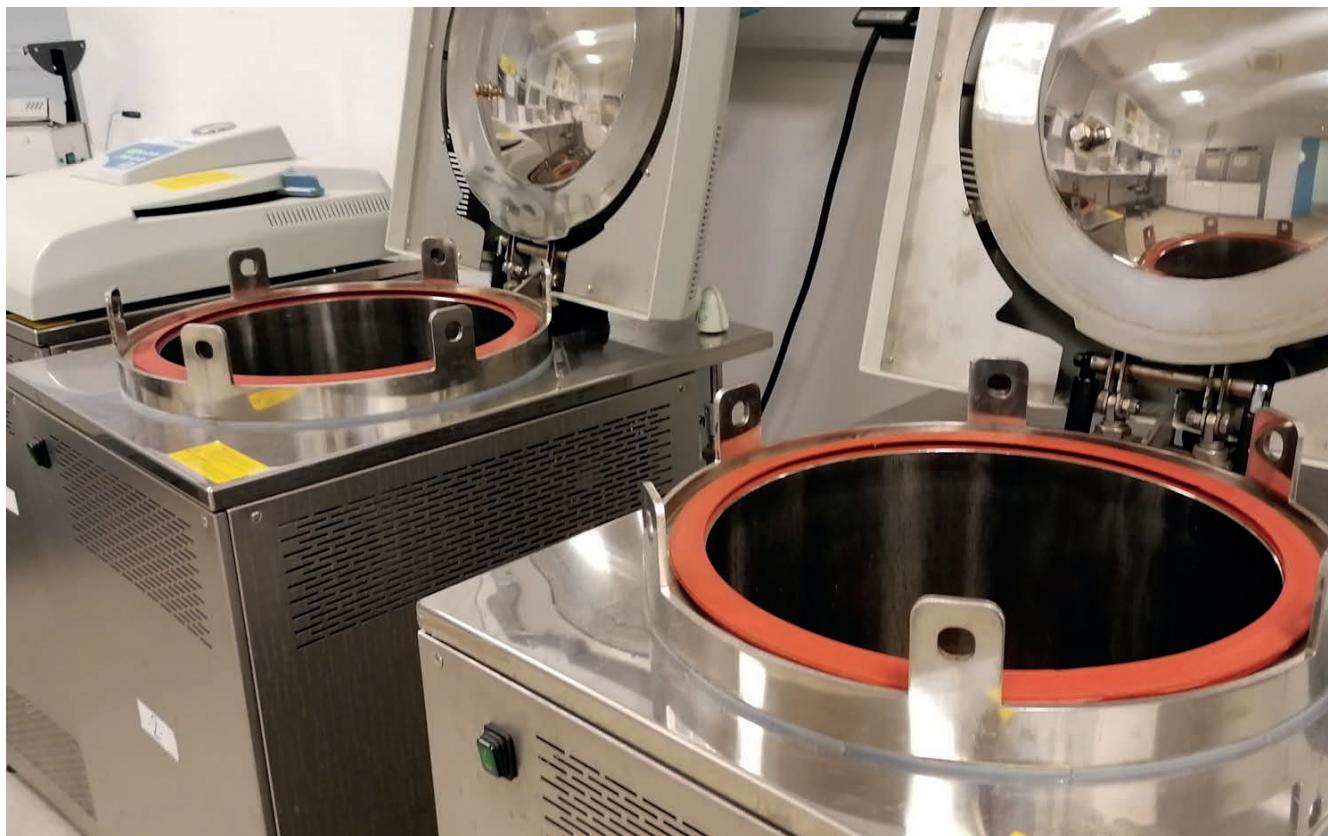

The ANIMAL MODEL HUB offers the highest quality and cutting-edge services in the advising and execution of animal experimentation models which encompass a wide number species as well as numerous experimental techniques.

The 3D (BIO)PRINTING HUB offer the highest level of cutting-edge quality and consulting services and delivery of 3D bioprinting and printing services as well as numerous experimental techniques.

## 12.9 GENERAL PROCEDURES UNIT

### STAFF

#### **Esther Rivero Cortés**

Senior Lab Manager - Head of Unit

#### **Sandra González Prieto**

Histology Technician, INVESTIGO21\_028

#### **María García Cruz**

Lab Technician, INVESTIGO\_SAE21

### BRIEF DESCRIPTION

The Central Unit for General Procedures plays a crucial role in managing the laboratories at the Maimonides Institute for Biomedical Research of Córdoba (IMIBIC). This service encompasses the organization, technical support, and oversight of technical, research, and administrative activities within the research laboratories.

Its responsibilities include the administration and maintenance of shared facilities, rooms, and scientific equipment, ensuring that experimental laboratory procedures proceed without interruptions and meet quality standards and good laboratory practices. Moreover, it promotes the efficient and sustainable use of shared specialized scientific equipment.

In addition, the Unit provides specialized technical services in Histology, supporting researchers in this specific area.

### EQUIPMENT AND FACILITIES

#### CENTRIFUGE ROOM

- Beckman Optima XPN100 Ultracentrifuge
- Beckman Optima L90K Ultracentrifuge
- Beckman Avanti J-26XP Centrifuge
- Kubota 2800 Refrigerated Centrifuge
- Eppendorf 5810-R Refrigerated Centrifuge
- Eppendorf 5424 Centrifuge
- Thermo Nanodrop ND 1000
- Stratagene MX3005P qRT-PCR
- Liebherr Combi for preservation at 4°C and -20°C
- Burdinola BST 1500 Fume Hood

- Duperthal Safety Cabinet
- Selecta S381 Oven
- Other auxiliary equipment

#### MULTIPLE EQUIPMENT ROOM

- Bio-Rad Universal Hood II for Bio-Rad's Molecular Imager Gel Doc and ChemiDoc Systems
- Merck Millipore Advantage A10 Water Purification System
- Milli-Q Merck Millipore Q-POD Water Dispenser
- Selecta S-100D Shaking Incubator
- Liebherr Combi for Preservation at 4°C and -20°C
- Exacta Safety Cabinet
- Telstar Micro V Laminar Flow Hood
- Other Auxiliary Equipment

#### STERILIZATION ROOM

- Selecta Presoclave-II Autoclave
- Selecta Presoclave-II Autoclave
- Selecta Presoclave-II Autoclave
- Selecta Autester ST-DRY-PV-B-23 Class B Autoclave
- Memmert UN110 Oven
- Memmert UN110 Oven
- Selecta Bag Sealer
- Selecta Omni GLH 02 Homogenizer
- Selecta Omni GLH 02 Homogenizer
- Crison GLP 21 pH Meter
- Denver Instrument TP-214 Precision Balance
- Selecta Ultrasons Ultrasonic Bath
- Omni Sonic RUPTOR 400 Sonicator
- Milli-Q Merck Millipore Q-POD Water Dispenser
- Liebherr Combi for Preservation at 4°C and -20°C
- Burdinola BST 1500 Fume Hood
- Other Auxiliary Equipment

#### HISTOLOGY LABORATORY

- Leica TP1020 Automatic Tissue Processor
- Leica Arcadia H and C Paraffin Embedding Station
- Memmert UN110 Oven
- Leica RM2255 Motorized Paraffin Microtome
- Leica CM 1860UV Cryostat for Frozen Sample Sectioning
- Leica ST 5010 XL Automatic Stainer
- Lauda Histological Floatation Bath
- Leica EGF Thermal Tweezers
- Sartorius Balance
- Burdinola BST 1500 Fume Hood
- Liebherr Combi for Preservation at 4°C and -20°C
- Exacta Safety Cabinet
- Other Auxiliary Equipment

#### TEMPORARY FREEZER STORAGE

- Deep freezer (-80°C) Thermo Scientific UFX60086V
- Deep freezer (-80°C) Eppendorf Cryocube F570-86
- Deep freezer (-80°C) Thermo Scientific UXF60086V
- Deep freezer (-80°C) Infrico ULT70086
- Deep freezer (-80°C) Effimed UFV-800

## MAIN SERVICES

- Histology Service, which includes tissue processing, paraffin embedding, sectioning of paraffin-embedded and frozen samples, histological staining, and slide preparation for microscopy. The Histology Laboratory of the Unit is equipped with specialized equipment that enables the automation of most processes included in our services, ensuring highly reproducible results.
- Management, technical support and supervision of the proper use of scientific equipment in the rooms and facilities of IMIBIC, as well as common auxiliary equipment (fume hoods, autoclaves, centrifuges, etc.).
- Implementation and promotion of Good Laboratory Practices at IMIBIC.
- Management of usage logs and the reservation system for scientific equipment shared by the Research Groups.
- Preparation of documentation (technical instructions, protocols, reports, SOPs, equipment lists, etc.) for the quality management system.

- Organization of autoclaving for the research groups' laboratory materials in the sterilization room.
- Supervision of proper management and disposal of laboratory waste in compliance with regulations. Coordination with the External Prevention Service in case of questions or suggestions. Providing support in training for laboratory waste management.
- Implementation and monitoring of the Trébol Environmental Best Practices Program at IMIBIC, in compliance with the University of Córdoba.
- Management of cold storage to ensure proper use of available space in case of failure of the research groups' -80°C freezers.
- Mentorship and training of new laboratory technicians.
- Provision of any other support and management of general procedures that may arise.

5. Estudio integral de los mecanismos asociados a la reversión inducida por dieta de la obesidad y diabetes (GC27).
6. PID2019-105564RB-I00 Interacción fisiopatológica entre obesidad y la glándula prostática: influencia del tejido adiposo sobre las maquinarias de control de la expresión génica y estabilidad genómica (GC27).
7. PI20/00375 Novel mechanisms and therapeutic targets involved in the progression of hemoglobin associated renal damage (GE06).

## COURSES AND WORKSHOPS

1. Course on Waste Management at IMIBIC, on the Moodle platform.
2. IMIBIC Trébol Programme.
3. Outreach activity for the International day of women and girls in Science, at CEIP Colón and CEIP López Diéguez.
4. Training Capsule: Good Laboratory Practices.
5. Organization of the technical training 'Laminar Flow Cabinets, Biosafety Cabinets, and Fume Hoods' conducted by Zwei Ingeniería.
6. Outreach activity by the Technical Units: A Coffee with UCAIB 2023.
7. 4 training sessions for the use of histology equipment.

## 12.10 TECHNOLOGICAL INNOVATION UNIT

### STAFF

**Cristina Montilla Aguilera**

Health Engineer technician

**Miguel de Alba Aparicio**

Software engineering technician

**Ignacio Isla Cros**

Software technician

**Ana Lara Jiménez**

Industrial Design engineering technician

### BRIEF DESCRIPTION

Technological Innovation. One of our basic functions is to apply the use of the new Information and Communication Technologies to the different research groups, so that they can be applied to their projects according to need, without the research team having to spend additional time learning them. Likewise, advisory and consultancy services are available to provide the most appropriate technological solutions.

Our main objective is to design and develop scientific-technological and industrial projects for research and clinical staff, with prototypes of medical devices.

Our laboratory is well equipped for the design and construction of 3D design prototypes, with 3D printing, electronic systems and development of software solutions. This is a major boost for innovation development and technology transfer related to the rapid prototyping of systems in the field of medicine.

## EQUIPMENT AND FACILITIES

- FDM 3D printers (2 units): Ultimaker S5 equipped with Air Manager S5 and Material Station.
- 3D printers SLA (2 units): Formlabs Form 3 and Form 3B+ with Form Wash, Form Finish Kit, Resin Tank and Build Platform.
- 3D design software - Solidworks 2023.
- CNC machine with protective cover: Stepcraft 840.
- Test stations for electronic devices and PCBs.
- Hanmatek SD1 and Proskit welding posts.
- Oscilloscope: Hantek Dso5202p, 2 channels 200Mhz, 1GSa / s.
- Laboratory power supply (2 units): Velleman LABPS23023. Power supply: RPS 24V 5<sup>th</sup>.
- Digital multimeter: Lomvum T28B.
- Apple Mac Mini for iOS app development.
- Desktop milling machine monoFab SRM-20.
- Laser cutting machine with camera LS900.
- Interactive table Tactable TSP-55.
- 3D Holographic display HoloFan 3DH Rd-100 PRO.
- CNC Machine BYAKKO LD 3000 6090.
- 3D Scanner Einscan Pro HD with Design Pack.
- Robot Kit Mecanum 4WD.
- Kit Dremel Model 4000.
- Function generators Promax.
- Binocular loupe Euromex.
- Welding post with flexible arms.

## MAIN SERVICES

- 3D modeling and printing with FDM and SLA technology.
- Design and manufacturing of devices, electronic equipment, and electromechanical systems in general.
- Segmentation of DICOM files for surgical planning.
- Electronic circuit prototyping and PCB schematic design.
- Low-level programming: microcontrollers, configurable hardware devices, etc.
- Web and mobile application development.
- Creation of Data Collection Notebooks (CRDs).
- Design and implementation of algorithms.
- Database construction

## PROJECTS

1. AYUDAS A LA I+D+I, EN EL ÁMBITO DEL PLAN ANDALUZ DE INVESTIGACIÓN, DESARROLLO E INNOVACIÓN (PAIDI 2020)/ Creación y Desarrollo de la Unidad de Ingeniería Biomédica e Innovación Tecnológica de Córdoba (CIBiT) asociada al Instituto Maimónides de Investigación Biomédica de Córdoba (IMIBIC)/ GRANTS FOR R + D + I, WITHIN THE SCOPE OF THE ANDALUSIAN RESEARCH PLAN / Creation and development of the Biomedical Engineering and Technological Innovation Unit of Córdoba (CIBiT) linked to the Maimonides Institute for Biomedical Investigation of Córdoba (IMIBIC) /Miguel González Andrades
2. Radiology app. Development of an app for tele-training in radiological medical imaging/ Marina Álvarez/ UGC Radiología.
3. Website and app for testing children to check whether growth is in accordance with biological age (DAUCO).
4. Website to calculate gender-equity model for liver allocation (GEMA)/Manuel Rodríguez Perálvarez/UGC Digestive.
5. Bibliography search tool EACO/Juan Ruano/UGC Dermatología
6. Grants for Hackathon (ESAL 2023)/ Grants call of guidelines developed by non-profit entities which encourage the social economic development of the municipality in 2023.

7. Management tool for HURS mental health unit GLADIS/Fernando Sarramea/UGC Mental health.
8. Web application for monitoring and correcting eating habits. Active user tracking will be facilitated with a series of weekly activities and an integrated support chat. Participation will be reinforced with scored activities, games, videos, user rankings and potential prizes (E2-DUCASS).
9. Development of anti-decubitus system for foot and ankle of bed-ridden patients – ANTELAS Project. Fernando Mayordomo, Physical Medicine.
10. “IVIC”, Drug administration intravenous device. Pablo López, GC31 Comprehensive Nursing Care, multidisciplinary perspective.
11. Design and 3D printing of casing of “Smartcloth”, a digital tablecloth for diabetic patients. Guillermo Molina, GA16 Lifestyles, Innovation and Health PI21/01602.
12. 3D Printing of a DNA model for “The European Researches Night”. María Teresa Roldán Arjona, GC22 Epigenetics.
13. Design and 3D printing of a mould for testing. Miguel González, GE07 Visual Quality.
14. Design and 3D printing of a plate for luminescent trips. Antonio Rivero, GC26 Clinical virology and zoonosis.
15. Design and 3D printing of a comb for multi-channel pipette. Antonio Rivero, GC26 Clinical virology and zoonosis.
16. Research, Development, and Testing with Diabetic Patients of Socks with Electrical Stimulation to Improve Blood Circulation. Fernando Mayordomo, UGC Rehabilitation.
17. Personalized Tissue-Engineered Veins (P-TEV) as the first cure for patients with chronic venous insufficiency. VERIGRAFT IBERIA S.L
18. Incorporation of Proteomic and Radiomic Tools to Improve the Detection and Stratification of Clinically Significant Prostate Cancer. Enrique Gómez Gómez, UGC Urology.
19. Real-life effectiveness of BIC/FTC/TAF in naïve patients with CD4+ less than 200 cells/mL or AIDS events. Antonio Rivero, GC26 Clinical Virology and Zoonoses.
20. Utilization of the GEMA Model Based on Artificial Intelligence to Correct Gender Disparities in Access to Liver Transplantation. Manuel Rodríguez Perálvarez, UGC Digestive.
21. Comparative Study of Happiness and Autonomy Levels in Patients Diagnosed with Bipolar Disorder versus the General Population. Jesús García Jiménez, San Cecilio University Hospital, Loja Community Mental Health Unit.
22. Optimization of Antibiotic Treatment Duration in Abdominal Sepsis Based on the Kinetics of Transcriptomic and Clinical Biomarkers (GENOTIME-COHORT Study). Julián Carlos de la Torre Cisneros, Angela Cano, GC03 Infectious Diseases.

## COURSES AND WORKSHOPS

1. Training: how to use the acquired 3D Scanner Einscan Pro HD with Design Pack
2. Training: how to use the acquired 3D bioprinting Regemat by the Microscopy Unit.
3. Webinar “Biomaterials for 3D Bioprinting: Existing and Future”.
4. Class taught at Biotechnological Hackathon 2023 aimed at engineering students.
5. Forum “100 Start ups Health”.
6. Class taught at “Coffee with UCAIBS” aimed at research staff.
7. Training: Specialist in Biomedical Design.
8. Forum “I Biotech Exhibition”.
9. Forum “ISCII Sessions of supporting I+D+I in Biomedicine and Health sciences”.

# 12.11 3D BIOPRINTING UNIT

## STAFF

### Gema García Jurado, PhD

Head of Unit. – Contract, ISCIII Biobanks and Biomodels Platform. PT20/00079.

### Alvaro Carrasco Carmona, PhD

Senior Technical Specialist – Contract, Investigo Program (2021-C23.I01.P03.S0020-0000004).

## BRIEF DESCRIPTION

3D bioprinting is a revolutionary technology that combines tissue engineering with additive manufacturing to create three-dimensional biological structures.

Our 3D bioprinting unit is dedicated to advancing research, innovation and clinical application of this cutting-edge technology.

Our main objectives are:

- To facilitate advances in regenerative and personalised medicine.
- To develop innovative biomedical solutions for diverse clinical applications.
- To collaborate with academic institutions, hospitals, and companies to translate research into viable products and therapies.

## EQUIPMENT AND FACILITIES

### » REG4LIFE BIOPRINTER (REGEMAT 3D)

- Biomaterials extrusion from -20 to 100°C
- Thermoplastic extrusion up to 250°C
- Biomaterials light-curing by Ultraviolet light 365nm and 405nm
- Syringes with 0.15 mm, 0.58 mm and 1.20 mm output diameters
- Real resolution in the X e Y axis (spindel movement) = 150 µm (0.15mm); Resolution in Z = 400 nm (0.4 microns). Theoretical resolution in the X and Y axis = 1.875 microns – 1875 nm
- Extrusion, bicomponent, coaxial, refrigerated, heated and high temperature syringes available
- Glass plate, Petri dish and multiwell as printing surfaces
- Automatic X, Y and Z calibration

### » APPLICATIONS

- Tissue and Organ Engineering: Tissue regeneration, Functional organs.
- Personalised medicine: Patient-specific tissue models.
- Drug Development: Tissue models for testing, Toxicity testing.
- Research in Biology and Medicine: Studies on disease, regeneration and development.
- Prosthetics and Medical Devices: Customised prostheses, Medical implants.
- Cosmetics: Product testing.

## MAIN SERVICES

Providing scientific and technical support throughout the entire bioprinting process, including both pre and post-bioprinting phases:

- Pre-bioprinting: Developing and implementing bioprinting assays and applications according to the user needs.
- Bioprinting: establishing the bioprinting parameters.
- Post-bioprinting: characterisation and biological evaluation of the bioprinted scaffold (cell viability, cell metabolisms and differentiation).

## KEY FACTS

The 3D bioprinting Unit belongs to the3D (BIO) Printing HUB to the ISCIII Biobanks and Biomodels Platform, supporting R & D+ i in Biomedicine and Health Sciences, Strategic Health Action 2017-2020. File code PT20/00079.  
The 3D BIOPRINTING HUB of the ISCIII Biobanks and Biomodels Platform contains 15 units spread all around our country in order to offer the highest level of cutting-edge quality and consulting services and delivery of 3D bioprinting and printing services as well as numerous experimental techniques.

## IMIBIC - RRI ACTIONS IN 2023

Scientific dissemination activities aimed at secondary school students: most of these scientific dissemination activities, adapted to the age/level of the participating students, the characteristics of the school and type of activity, were of the following types:

- **School Visits Programme 2023.** These visits are aimed, for the most part, at upper-level secondary school students (Bachillerato and ESO). During 2023, IMIBIC hosted 36 visits as part of this programme, with a total of 1292 students and 94 teachers. Various educational centres from our city took part in these visits, among them: CES Lope de Vega, IES Blas Infante, Colegio Fundación Zalima, IES Fuensanta, IES Fidiana and IES Villarrubia.
- **Presentation of IMIBIC as part of the School Visits Programme of the University Hospital Reina Sofía de Córdoba (HURS).** We have been involved in this activity for 12 consecutive years. The Institute participated in 16 organised visits, which were attended by 456 high school students and 25 teachers from various schools in Córdoba and the province.

Scientific dissemination activities for other social groups: The activities in this section, adapted to the characteristics, age and interests of the participating social groups, included:

- **Programme of visits to IMIBIC for students of Higher Level Training Cycles. (CFGs):** These visits are mainly aimed at students in the higher level training cycles of the Health family. In 2023, IMIBIC hosted 9 visits as part of this programme, with a total of 254 students and 25 teachers. Several educational centres in our city took part in these visits, such as, IES Juan de Aréjula, IES Antonio M<sup>a</sup> Calero, IES Sancti Petri and IES Fuensanta.
- **Programme of visits to IMIBIC for students from the University of Cordoba:** These visits are aimed at students from the Advanced Polytechnic School of Córdoba and the Faculty of Education Sciences and Psychology of the University of Cordoba. During 2023, IMIBIC hosted visits as part of this programme, with a total of 130 students and 4 lecturers.

Projects and events related to Responsible Research and Innovation (RRI) carried out or held during 2023 included, among others:

- **The E-ducass project:** this project was funded by the ISCIII as part of the Strategic Action in Health. The project is aligned with health literacy and focuses on novel solutions for vulnerable populations with health inequalities.
- **European Researchers Night:** In 2023, this event was aimed at patients belonging to different associations. This event adopted the format of a “colloquium” with the participation of a scientific moderator and two speakers: a clinical researcher and a basic researcher specialized in innovation. The aim of this event was for patients to learn in a very dynamic way about the work of these health professionals and its impact on healthcare.
- **I Race for Health Research:** On June 18, 2023, IMIBIC organized the First Race for Health Research in collaboration with all the hospitals of Cordoba and with the support of the University of Cordoba. The main objective of this sporting proposal was to give visibility to biomedical research in our province. A total of 1,000 people took part in the race.
- **“Conoce a tu Enfermera” Campaign:** IMIBIC collaborated in this campaign of the Official College of Nurses of Cordoba, with the aim of giving visibility to the figure and role of nurses in the health research carried out at IMIBIC.
- **“Retrata la Ciencia” Campaign:** In commemoration of the International Day of Women and Girls in Science, celebrated every February 11, the initiative “Retrata la Ciencia – Investigadoras Sin Filtro” was launched. This action consisted of a photographic exhibition of IMIBIC female researchers in the corporate social networks to highlight the work of women researchers in our institute.
- **“Nutriconsejos”:** This is a project in social networks consisting of the periodic dissemination of tips on healthy eating habits that users can apply in their routine to improve their health. In this way, useful information is provided on a relevant topic for a society that is increasingly aware of the importance of nutritional education.
- **“¿Sabías qué...?”:** Activity in social networks whose objective was to transmit notions related to biomedical research, exposing the definition of the most common terms in scientific dissemination. In this way, the most commonly used biomedical terminology is made known among users.

Within the framework of the RRI actions, also worth highlighting is the participation of key non-scientific actors in some of the internal committees, including the Equality, Training, Innovation and Clinical Research Committees, as well as the grants for Open Access publications as part of IMIBIC's Own Plan (*Plan Propio*).

The background of the image is a vibrant, abstract pattern of glowing particles. It features a dense concentration of small, multi-colored dots (red, yellow, green, blue) against a dark, almost black, background. A prominent diagonal band of bright, multi-layered bands of light (yellow, green, blue) cuts across the upper portion of the frame. In the lower half, there are larger, more isolated clusters of these glowing particles, some appearing as small circles and others as larger, more diffuse shapes. The overall effect is reminiscent of a microscopic view of a living tissue or a complex digital simulation.

**GOALS FOR 2024**

**14**

## **THE INSTITUTIONAL GOALS FOR THE YEAR 2024, APPROVED BY THE GOVERNING COUNCIL OF THE INSTITUTE, ARE AS FOLLOWS:**

- To carry out actions to ensure the generational replacement of principal investigators with a clinical profile.
- To carry out strategies that allow for a closer approach to society
- To establish strategies to promote clinical research (industry meetings, close monitoring of Clinical Management Units' needs, etc.).
- Attracting new researchers (Ramón y Cajal, Emergia, International reserchers...).
- Establishing strategies to increase success in competitive calls for proposals.

## 15.2 CLINICAL TRIALS

THESES DEFENDED IN 2023

PhD STUDENT	TITLE OF THE THESIS	IMIBIC GROUP
Cano Yuste, Ángela María	Risks of infection and mortality among patients colonized with KPC-producing Klebsiella pneumoniae: Validation of scores and proposal for management	GC03
Páez Vega , Aurora María	Clinical trial to stop valganciclovir prophylaxis in CMV-seropositive renal transplant patients who maintain CD8+ CMV-specific cellular immunity after receiving thymoglobulin	GC03
<b>JIMÉNEZ IZQUIERDO, RAFAEL MANUEL</b>	<b>New mechanisms of control of the tumor suppressor protein FBXW7 mediated by DYRK2 kinase.</b>	<b>GC04</b>
Alcaraz Clariana, Sandra	CLINICAL APPLICATIONS OF LUMBAR PARASPINAL MECHANICAL PROPERTIES AND LUMBOPELVIC KINEMATICS IN SUBJECTS WITH MECHANICAL AND INFLAMMATORY LOW BACK PAIN	GC05
Gómez García, Ignacio	CHARACTERIZATION OF THE EXTRA-MUSCULOSKELETAL MANIFESTATIONS AND THEIR INFLUENCE ON THE PHENOTYPE OF SPONDYLOARTHRITIS	GC05
Pérez Sánchez, Laura	CHARACTERISATION OF THE ATHEROTHROMBOTIC RISK IN PATIENTS WITH ANTIIPHOSPHOLIPID SYNDROME BY TRANSCRIPTOMIC ANALYSES	GC05
Sánchez-Agesta Martínez, Marina	NEW DIAGNOSTIC AND THERAPEUTIC APPROACHES IN EXTRACAPILAR GLOMERULONEPHRITIS	GC07
<b>Martín Piedra , Laura</b>	<b>MEDIUM-TERM EVOLUTION OF METABOLIC RISK PHENOTYPES IN CARDIOVASCULAR PATIENTS AFTER DIETARY INTERVENTION: MEDITERRANEAN DIET OR LOW-FAT DIET (CORDIOPREV STUDY)</b>	<b>GC09</b>
Millán Orge, Marta	PREDICTION OF CARDIOVASCULAR DISEASE IN CORONARY PATIENTS BY A CLINICAL EVENT RECURRENCE SCORE AND THE INFLUENCE OF DIET. CORDIOPREV STUDY	GC09
<b>Pérez Cardelo, María Magdalena</b>	<b>DIETARY STRATEGIES IN THE MANAGEMENT OF TYPE 2 DIABETES IN PATIENTS WITH CORONARY HEART DISEASE: FROM THE CORDIOPREV STUDY</b>	<b>GC09</b>
<b>Romero Cabrera, Juan Luis</b>	<b>ASSESSMENT OF CARDIOVASCULAR RISK IN PATIENTS WITH DISRUPTION OF CIRCADIAN RHYTHM ON SECONDARY PREVENTION AND FOLLOWING A DIETARY INTERVENTION (MEDITERRANEAN DIET OR LOW-FAT DIET)</b>	<b>GC09</b>
<b>Romero Cabrera, Juan Luis</b>	<b>ASSESSMENT OF CARDIOVASCULAR RISK IN PATIENTS WITH DISRUPTION OF CIRCADIAN RHYTHM ON SECONDARY PREVENTION AND FOLLOWING A DIETARY INTERVENTION (MEDITERRANEAN DIET OR LOW-FAT DIET)</b>	<b>GC09</b>
<b>Perdices López, Cecilia María</b>	<b>MICRORNAS AND GRK2 AS MODULATORS OF KISS1/GPR54 SYSTEM: PHYSIOPATHOLOGICAL ROLE IN PUBERTAL ALTERATIONS AND OBESITY INDUCED HYPOGONADISM</b>	<b>GC10</b>

PhD STUDENT	TITLE OF THE THESIS	IMIBIC GROUP
Ruiz Cruz, Miguel	"Novel regulatory mechanisms of Kiss1 neurons during reproductive axis development and in conditions of metabolic stress: Analysis of the roles of microRNAs and elements of the secretory pathway"	GC10
Tercero Alcázar, Carmen	Extracellular matrix and fibrosis in adipose tissue in obesity and insulin resistance.	GC11
López Baltanás, Rodrigo	INFLUENCE OF MAGNESIUM SUPPLEMENTATION ON OXIDATIVE STRESS, INFLAMMATION AND VASCULAR DYSFUNCTION ASSOCIATED TO CHRONIC KIDNEY DISEASE: IN VIVO AND IN VITRO STUDIES	GC13
Martín Dorado, Ernesto	Benefit of canagliflozin in patients with type 2 diabetes after hospitalization for acute heart failure	GC15
Rodríguez Diego, Sara	<b>THE ROLE OF TWO-DIMENSIONAL SPECKLE-TRACKING ECHOCARDIOGRAPHY IN NON-INVASIVE DIAGNOSIS OF ASYMPTOMATIC ACUTE CELLULAR REJECTION IN HEART TRANSPLANT RECIPIENTS</b>	GC15
Rodríguez Benítez, María Victoria	INVASIVE AND NON-INVASIVE METHODS TO STUDY INFLAMMATORY PARAMETERS IN PREMATURE NEWBORNS WITH NRCROTIZING ENTEROCOLITIS	GC23
Aranburu Imatz, Alejandra	Epidemiology of care for chronically ill patients aged 50 years and older, cared for at the "Azienda ULSS1 Dolomiti" (Veneto-Italy) in the Pre-COVID 2017/2019 COVID 2020 period.	GC31
Curcio, Felice	<b>RISK ASSESSMENT OF PRESSURE INJURIES AND PREVENTION IN NEWBORNS ADMITTED TO INTENSIVE CARE</b>	GE10
Luque Álcaraz, Olga María	NURSING RESPONSIBILITY IN ENVIRONMENTAL SUSTAINABILITY	GE10
Muñoz Gómez, Rafaela	Validation of the STOP-Bang questionnaire for the diagnosis of sleep apnea-hypopnea syndrome in the population aged 40 years or older.	GE10
Pastor López, Ángeles	Care for the elderly at social risk, experiences of a complex social and health reality.	GE10
Valle Martos, Rosario	URIC ACID AND LIVER FUNCTION MARKERS RELEVANCE IN METABOLIC SYNDROME, ENDOTHELIAL DYSFUNCTION AND INFLAMMATION, IN RESPONSE TO THE TREATMENT OF CHILDHOOD OBESITY	GA05

The highlighted theses have been awarded an international mention.
