

**The Maimonides Institute for Biomedical Research in Cordoba (IMIBIC, in Spanish) is made up of a group of researchers committed to carrying out high quality research, with the main focus on translational research, with the aim of improving the quality of life of the population at large through a better understanding of the most common health problems. It is positioned within the partnership framework with the University of Cordoba and is situated in the vicinity of Reina Sofia University Hospital, the Regional Centre for the Andalusian Public Health System, which is characterized by its high standards of health care and its solid commitment to the training of health professionals.**

**Its management body is the Foundation for Biomedical Research in Cordoba (FIBICO, in Spanish), which was founded on December 27th, 2007.**

**FIBICO is seeking to recruit a Project Manager for International Public Funded Projects:**

**JOB ROLE:**

- Project management of European and International research projects from approval to closure (assistance with financial, administrative and legal issues, including IPR issues and EC audits; preparation of project reporting);
- Coordination and supervision of the activities of the consortium;
- Support in the definition of a participation strategy in funded international research programme within the area of HEALTH (EC H2020, USA NIH, UK AICR);
- Support in the preparation/presentation of proposals (work programme definition, provision of costs and time estimates, consortium building, assistance in proposals writing), direct contacts with EU officers;

#### Minimum requirements:

- College or University degree (Bachelor, Master or Doctoral degree);
- Excellent written and oral communication skills in English and Spanish;

#### Requirements to assess:

- Master, courses and workshops on project preparation and management;
- Previous work experience in international project management.

#### **WORK ENVIRONMENT**

- The successful applicant will join a team of young and dynamic international scientists based in Cordoba;
- High international impact in the fields of biomedicine;
- Excellent multidisciplinary network of research and innovation, with collaborations with top international centers, clinic and industry;
- Enriching environment with excellent opportunities for career development;

#### **BENEFITS**

- Salary will depend on experience.
- Potential starting date: October 2013.
