

**IMIBIC CALL FOR EXPRESSIONS OF INTEREST: POST-DOCTORAL
RESEARCHERS**

Re: PostdocEXP2017

Description of IMIBIC

The Maimonides Biomedical Research Institute of Cordoba, IMIBIC, was established in April 2008 by an agreement between the Andalusian regional ministries of Health, of Innovation Science and Employment, and the University of Cordoba (UCO). IMIBIC is created with the objective of bringing together scientific research and medical practice, with the aim of speeding up the translation of research results into clinical practice and the development of new therapies.

IMIBIC is a mixed Institute of the University of Cordoba (UCO) and the Reina Sofia University Hospital (RSUH), structured in research groups commissioned by both institutions that cooperate in the implementation of the scientific programmes of the Institute. IMIBIC hosts over 500 clinicians, nurses, basic and translational researchers, and personnel in technical, management, and administrative areas. IMIBIC is accredited within the framework of health research centres of excellence recognised by the National Institute of Health Carlos III. IMIBIC is managed independently by the Foundation for Biomedical Research of Cordoba (FIBICO).

IMIBIC has the support of its sponsoring institutions: the University of Cordoba (UCO), a Higher Education and Research institution established in 1972 with over 2,300 employees, and ranked among the top research institutions at national level; and the Andalusian Health Service (SAS), to which RSUH is ascribed, which is an autonomous public entity responsible for health care provision in Andalusia, one of the largest regions in Europe, with 8.4 million inhabitants. Healthcare services are provided by SAS through a network of integrated healthcare facilities organized to ensure the accessibility of the population: 1,518 primary care centres, 47 hospitals, 14 Health Management areas and 93,366 employees distributed throughout Andalusia.

Aim of the call:

The Maimonides Biomedical Research Institute of Cordoba (IMIBIC) is seeking researchers with the following profile:

We are looking for candidates to apply for:

- **Miguel Servet contracts.** National Institute of Health Carlos III, call for award subventions within the Strategic Action in Health (Acción Estratégica en Salud) 2013-2016.
